ALPHABETICAL INDEX

OF THE MATTER CONTAINED

IN THE

PHILOSOPHICAL TRANSACTIONS

OF

THE ROYAL SOCIETY

OF LONDON;

From { Vol. LXXI. to Vol. CX. } Inclusive.
{ The Year 1781 to The Year 1820 }

LONDON,

PRINTED BY W. BULMER AND W. NICOL, CLEVELAND ROW, ST. JAMES'S;
AND SOLD BY G. AND W. NICOL, PALL-MALL, BOOKSELLERS TO HIS MAJESTY,
AND PRINTERS TO THE ROYAL SOCIETY.

MDCCCXXI.

Vol. LXXI. corresponds with that published in 1781.

LXXXI.	1791.
XCI.	1801.
CI.	1811.
CX.	1820.

A CONTINUATION

TO THE

ALPHABETICAL INDEX

OF THE

MATTER CONTAINED IN THE PHILOSOPHICAL TRANSACTIONS;

From { Vol. LXXI to Vol. CX. } Inclusive.
{ The Year 1781 to The Year 1820. }

N. B. An Asterisk is prefixed to the subjects noticed in the Index to the preceding Volumes of the Transactions.

A

	Vol.	Page.
ABERRATION. An experiment proposed for determining, by the aberration of the fixed stars, whether the rays of light vary in different media. *P. Wilson.*	LXXII.	58
On the maximum of the aberration of light. *Brinkley.*	CIX.	241
ABRUZZO. A journey into the province of Abruzzo, and a voyage to the Island of Ponza. *Sir W. Hamilton.*	LXXVI.	365
ACID. On a test liquor to show its presence. *Watt.*	LXXIV.	419
Some researches on the acids hitherto undecompounded. - - *H. Davy.*	XCIX.	39
On its action upon hyperoxymuriates. *Sir H. Davy.*	CV.	214
(Acetic) A solvent for resins. *Hatchett.*	XCVI.	129
(Animal*) Nova experimenta chemica quæ ad penitiorem acidi e pinguedine eruti cognitionem valere videntur. - *Crellius.*	LXXII.	8

		Vol.	Page.
Acid. (Benzoic) Formed from dragon's blood.	*Hatchett.*	XCV.	298
On its decomposition.	*De Crell.*	LXXXIX.	56
(Boracic) Its use in the analysis of stones.	*Hatchett.*	XCV.	231
(Carbonic) On the quantity of carbon in it.	*Allen.*	XCVII.	267
(Fluoric) On its different combinations.	*J. Davy.*	CII.	352
(Lithic) Remarks on.	*Pearson.*	LXXXVIII.	19
Of an acid principle prepared from it.	*Prout.*	CVIII.	420
(Mineral) On their attractive powers.	*Kirwan.*	LXXIII.	15
(Molybdic) Experiments on its analysis.	*Hatchett.*	LXXXVI.	323
(Muriatic) On its decomposition.	*Henry.*	XC.	188
Sundry experiments on it.	*Chenevix.*	XCII.	126
It is not formed in galvanic processes.	*H. Davy.*	XCVII.	5
Researches on it.	*H. Davy.*	C.	231
Experiments upon it.	*Henry.*	CII.	238
(Nitrous) On its freezing in Hudson's Bay.	*Cavendish.*	LXXVIII.	166
On its production from phlogiston.	*Cavendish.*	——	261
On its production.	*Milner.*	LXXIX.	300
Its action upon various substances.	*Hatchett.*	XCVI.	115
(Vegetable) On its nature and combinations.	*Donovan.*	CV.	231
(Vitriolic) On its congelation	*Keir.*	LXXVII.	267
On its freezing in Hudson's Bay.	*Cavendish.*	LXXVIII.	166
Aconite. The effects of its juice on the animal œconomy.	*Brodie.*	CI.	185
Adair, M. The remarkable effects of lightning upon him.	*Brereton.*	LXXI.	42

		Vol.	Page.
ADJUSTMENT. Of circular instruments.	*Pond.*	XCVI.	428
ÆRA. On that of the Mahometans called the Hejera.	*Marsden.*	LXVIII.	414
AËROSTATION. On the manner of guiding air balloons.	*De Galves.*	LXXIV.	469
ÆTNA.* A description of a new sort of rain which fell there.	*Giovni.*	LXXII.	1
AFFINITY. On the affinities of substances in spirits of wine.	*Kirwan.*	LXXVI.	155
(Chemical) On its suspension, and its relations to electrical bodies.	*H. Davy.*	XCVII.	24
AGATE. On its polarizing power.	*Brewster.*	CIV.	188
AGRICULTURE.* On different sorts of lime used in it.	*Tennant.*	LXXXIX.	305
AGRUME. That term explained.	*Hamilton.*	LXXIII.	195
AIR* (In general). Upon its resistance.	*Edgeworth.*	LXXIII.	136
Experiments upon it.	*Cavendish,*	LXXIV.	119
Remarks on the above.	*Kirwan.*	——	154
Answer to the above	*Cavendish.*	——	170
Reply to the above.	*Kirwan.*	——	178
Experiments on air.	*Cavendish.*	LXXV.	372
On an unusual horizontal refraction of it.	*Vince.*	LXXXIX.	13
(Appearances*) Of a luminous appearance.	*Cavallo.*	LXXI.	329
(Atmospheric) Its analysis.	*Pepys.*	XCVII.	253
On the changes produced by respiration.	*Allen.*	XCVIII.	249
(Expansion) Frigorific experiments on its mechanical expansion.	*Darwin.*	LXXVIII.	43
(Electricity*) A journal of atmospheric electricity.	*Read.*	LXXXI.	185
Continuation of the above.	*Read.*	LXXXII.	225
(Fixed*) On its decomposition.	*Tennant.*	LXXXI.	182

		Vol.	Page.
Air. (Fixed*) On its decomposition.	*Pearson.*	LXXXII.	289
(Hepatic) Experiments upon it.	*Kirwan.*	LXXVI.	118
Ditto.	*Hassenfratz.*	LXXVII.	305
Some remarks upon it.	*Crawford.*	LXXX.	391
(Inflammable*) On the affinities of phlogisticated and light inflammable airs.	*Austin.*	LXXVIII.	379
On its analysis.	*Austin.*	LXXX.	51
(Nitrous*) On its production.	*Milner.*	LXXIX.	300
(Pump*) On an improved one.	*Cavallo.*	LXXIII.	435
On one of a new construction.	*Austin.*	CIII.	138
(and Water) On the constituent parts of water and dephlogisticated air.	*Watt.*	LXXIV.	329
Sequel to the above.	*Watt.*	LXXIV.	354
Experiments relating to air and water.	*Priestley.*	LXXV.	279
On the production of dephlogisticated air from water with various substances.	*Count Rumford.*	LXXVII.	84
Alburnum. Variations of its density.	*T. A. Knight.*	XCV.	91
On the inverted action of the vessels of trees.	*T. A. Knight.*	XCVI.	293
Not essential to the production of bark.	*T. A. Knight.*	XCVII.	112
On the inconvertibility of bark into alburnum.	*T. A. Knight.*	XCVIII.	103
On its origin and office.	*T. A. Knight.*	——	313
On its functions.	*T. A. Knight.*	XCIX.	173
Some observations on it.	*T. A. Knight.*	CVI.	292
On that of the spring and winter felled oak trees.	*T. A. Knight.*	CX.	156
Alcohol. On the quantity contained in several kinds of wine.	*Brande.*	CI.	337
Appendix to the above.	*Brande.*	CIII.	82

		Vol.	Page.
ALCOHOL. On the alcohol of sulphur.	{ *Berzelius.* *Marcet.* }	CIII.	171
ALDEBARAN.* Remarks on an eclipse of.	*Maskelyne.*	LXXXIV.	438
ALGÆ. On the fructification of the submersed algæ,	*De Serra.*	LXXXVI.	494
ALGEBRA.* On finding the values of algebraical quantities by converging serieses.	*Waring.*	LXXVII.	71
On the resolution of algebraic equations.	*Wilson.*	LXXXIX.	265
ALGOL. On the variation of its light.	*Goodricke.*	LXXIII.	474
On the same subject.	*Englefield.*	LXXIV.	1
On its obscuration.	*Pruhl.*	——	4
Appendix to the above.	*Pruhl.*	——	5
On the variation of its light.	*Goodricke.*	——	287
ALKALI. On a method of preparing a test liquor to show its presence.	*Watt.*	LXXIV.	419
On the formation of volatile alkali.	*Austin.*	LXXVIII.	379
On a method of analyzing stones containing fixed alkali.	*H. Davy.*	XCV.	231
On their electrical energies.	*H. Davy.*	XCVII.	35
On the effects produced by electricity.	*H. Davy.*	XCVIII.	1
New analytical researches on alkalies.	*H. Davy.*	XCIX.	39
Experiments on the metals from.	*H. Davy.*	C.	16
ALLOY. On the various alloys of gold.	*Hatchett.*	XCIII.	43
ALMANACK. Nautical, the most perfect work of the kind.	*Piazzi.*	LXXXIX.	60
ALTITUDE. An improvement in the quadrant for the resolution of problems.	*Smeaton.*	LXXIX.	1
AMALGAM. On that procured from ammonia.	*H. Davy.*	XCVIII.	333
AMAZONS. An account of the river.	*Rennell.*	LXXI.	93
AMBERGRISE.* An account of it.	*Schwediawer.*	LXXIII.	226
On a quantity found in a spermaceti whale.	*Coffin.*	LXXXI.	43

		Vol.	Page.
Ambuscade. On the recovery of the Dutch frigate.	*Whidbey.*	XCIII.	321
America.* On the nature and customs of the Indians of North America.	*M'Causland.*	LXXVI.	229
Amethyst. Remarks on the oriental.	*De Bournon.*	XCII.	244
Amidine. An intermediate substance between gum and starch.	*De Saussure.*	CIX.	52
Ammonia. On the decomposition of the sulphate of ammonia.	*Hatchett.*	LXXXVI.	285
Remarks on the hyperoxygenized muriate of.	*Chenevix.*	XCII.	149
On its nature.	*H. Davy.*	XCVIII.	35
New method of analyzing it	*Henry.*	XCIX.	430
Various observations on it.	*J. Davy.*	CII.	360
On the amalgam procured from it.	*H. Davy.*	XCVIII.	333
Amnios. On the composition of its liquor.	*Pearson.*	XCIX.	333
Ampelopsis. The effects of light on its tendrils.	*T. A. Knight.*	CII.	315
Amphibia. Observations on this class, particularly on venomous serpents.	*Gray.*	LXXIX.	21
Of a doubtful animal called Proteus anguinus.	*Schreibers.*	XCI.	341
On the circulation of their blood.	*Home.*	CVII.	5
On the organs and secretions of some of them.	*J. Davy.*	CVIII.	303
Analogy. On that which subsists between the calculus of functions and other branches of analysis.	*Babbage.*	CVII.	197
Analysis.* On a method of effecting it by electricity.	*H. Davy.*	XCVII.	52
Of the waters of the Dead Sea and Jordan.	*Marcet.*	——	296
Of various points of analysis.	*J. F. W. Herschel.*	CIV.	440
Analytical.* On the independence of the analytical and geometrical methods of investigation.	*Woodhouse.*	XCII.	85

		Vol.	Page.
ANALYTICAL.* Researches on the nature of certain bodies.	*H. Davy.*	XCIX.	39
Appendix to the above.	*H. Davy.*	——	450
ANARRHICHAS LUPUS. A description of its teeth.	*André.*	LXXIV.	274
ANATOMY.* Of the ophidium barbatum.	*Broussonet.*	LXXI.	436
Of the organ of hearing of fish.	*Hunter.*	LXXII.	379
Of whales.	*Hunter.*	LXXVII.	371
Of a whale.	*Abernethy.*	LXXXVI.	27
Of the sea otter.	*Home.*	——	385
Of a male rhinoceros.	*Thomas.*	XCI.	145
Of the proteus anguinus.	*Schreibers.*	——	241
Of the ornithorhynchus paradoxus.	*Home.*	XCII.	67
On that of the teredo navalis.	*Home.*	XCVI.	276
Of the wombat, and its female organs.	*Home.*	XCVIII.	304
On that of the squalus maximus.	*Home.*	XCIX.	206
Of the squalus maximus, and its branchial artery.	*Home.*	CIII.	227
On that of the dugong.	*Home.*	CX.	315
ANCIENTS.* On the colours they used in painting.	*H. Davy.*	CV.	97
ANCON. A new variety in the breeds of sheep.	*Humphreys.*	CIII.	93
ANGLE.* A general theory for the mensuration of the angle subtended by two objects.	*Atwood.*	LXXI.	395
Of a micrometer for taking the angle of position.	*Herschel.*	——	500
On measuring small angles with accuracy.	*Herschel.*	LXXII.	82
Experiments to ascertain how far telescopes enable us to determine small angles.	*Herschel.*	XCV.	31
On a new property of the tangents of the three angles of a plane triangle.	*Garrard.*	XCVIII.	120

		Vol.	Page
ANIMAL INCOGNITUM. On its grinding teeth.	*Home.*	XCI.	319
ANIMALS. On their power of producing cold.	*Crawford.*	LXXI.	479
On the influence of the vegetable kingdom on the animal creation.	*Ingen-housz.*	LXXII.	426
(Fossils*) On some remains of fishes.	*Home.*	CIV.	571
Appendix to the above.	*Home.*	CVI.	318
Second appendix.	*Home.*	CVIII.	24
(Substances) On their conversion into a fatty matter resembling spermaceti.	*Gibbes.*	LXXXV.	239
(Fluids) On albumen and other animal fluids.	*Brande.*	XCIX.	373
On animal secretions.	*Home.*	XCIX.	385
(Heat) On the influence of the brain on its generation.	*Brodie.*	CI.	36
On the same subject.	*Brodie.*	CII.	378
ANNUITIES. On finding their values.	*Morgan.*	LXXXIV.	235
ANOMALY.* Methods of calculating the excentric from the mean anomaly of a planet.	*Robertson.*	CVI.	127
On the anomaly in the variation of the magnetic needle on ship-board.	*Scoresby.*	CIX.	96
ANTELOPE. On some bags near its eyes.	*Russell.* / *Home.*	XCIV.	73
ANTIMONY.* Various experiments upon it.	*Pearson.*	LXXXI.	345
On a treble sulphuret of lead, antimony, and copper.	*De Bournon.*	XCIV.	30
Analysis of the above.	*Hatchett.*	——	63
Its combination with chlorine.	*J. Davy.*	CII.	188
ANTIPATHES. Experiments on various species of.	*Hatchett.*	XC.	351
ANTS.* Of the termites of hot countries.	*Smeathman.*	LXXI.	139
On sugar ants.	*Castles.*	LXXX.	346
APHRODITA ACULEATA. Its respiratory organs.	*Home.*	CV.	258

		Vol.	Page.
Apoplexy.* The excitability of the muscles not impaired in that disease.	*Phillips.*	CV.	81
Apparatus. An apparatus for the analysis of gases,	*Henry.*	XCVIII.	282
For dividing instruments.	*Troughton.*	XCIX.	116
For ascertaining the changes on air by animal respiration.	*Brodie.*	CII.	380
Apple. Experiments on its fecundation.	*T. A. Knight.*	LXXXIX.	201
Aquarius. Of its comparative brightness.	*Herschel.*	LXXXVI.	194
Notes on the above.	*Herschel.*	——	212
Aquila. Of its comparative brightness.	*Herschel.*	——	197
Notes on the above.	*Herschel.*	——	215
Arbury Hill. On the variation in the length of the pendulum there.	*Kater.*	CIX.	374
Arc.* On the conveniency of measuring an arc of the meridian near Geneva.	*Pictet.*	LXXXI.	106
(Circular) On an elementary manner of obtaining their serieses.	*L'Huilier.*	LXXXVI.	142
Results of the measurement of an arc on the meridian.	*Lambton.*	CVIII.	486
Arch.* Of some luminous arches.	*Hey.*	LXXX.	32
Of a luminous arch.	*F. J. H. Wollaston.*	——	43
Of a luminous arch.	*Hutchinson.*	——	45
Of a luminous arch.	*J. Franklin.*	——	46
Of some luminous arches.	*Pigott.*	——	47
Height of a luminous arch in 1784.	*Cavendish.*	——	101
(Geometry) On a new property of the tangents of three arches trisecting the circumference of a circle.	*Maskelyne.*	XCVIII.	122
Archimedes.* Proof of a principle in the lever assumed by him.	*Vince.*	LXXXIV.	83
On his demonstration relative to the parabolic conoid.	*Attwood.*	LXXXVI.	96

		Vol.	Page.
ARDEA ARGALA. On the solvent glands and gizzards.	*Home.*	CIII.	77
ARGAND LAMP. A comparison of the oil consumed and light emitted, with those of a common lamp.	*Ct. Rumford.*	LXXXIV.	98
ARGONAUTA. On an error of naturalists respecting the inhabitant of this shell.	*Home.*	CVII.	297
ARMADILLO. On the structure of its stomach.	*Home.*	XCVII.	156
ARMAGH. Astronomical observations there.	*Pond.*	XCVI.	453
ARMS. On some ancient metallic arms and utensils.	*Pearson.*	LXXXVI.	395
ARRAGONITE. Remarks on it.	*De Bournon.*	XCIII.	331
ARSENIATES. Of those of copper and iron from Cornwall.	*De Bournon.*	XCI.	169
Analysis of the above.	*Chenevix.*	—	193
On a native arseniate of lead.	*Gregor.*	XCIX.	195
ARSENIC. Its effect on gold.	*Hatchett.*	XCIII.	47
On its combinations with chlorine.	*J. Davy.*	CII.	186
ARSENICANE. Its properties and composition.	*J. Davy.*	—	188
ARTERIES.* On those of whales.	*Hunter.*	LXXVII.	415
On a peculiarity of those of slow-moving animals.	*Carlisle.*	XC.	98
Continuation of the above.	*Carlisle.*	XCIV.	17
On their functions.	*Young.*	XCIX.	1
On the branchial artery of the squalus maximus.	*Home.*	CIII.	227
On the influence of the nerves upon their action.	*Home.*	CIV.	583
ASCENSION.* On the right ascension of Mercury out of the meridian.	*Smeaton.*	LXXVII.	318
ASS. On its stomach.	*Home.*	XCVII.	151
On its spleen.	*Home.*	XCVIII.	133
ASSAFŒTIDA. Of a plant yielding it.	*Hope.*	LXXV.	36

	Vol.	Page.
ASTEROIDS. A name given to certain celestial bodies.	*Herschel.* XCII.	228
Term applied to the star discovered by Mr. Harding.	*Herschel.* XCV.	57
ASTRONOMY.* On that of the Hindoos.	*Marsden.* LXXX.	575
(Nautical) On the principal problems of it.	*Mendoza y Rios.* LXXXVII.	43
(Observations*) On the rotation of the planets round their axis.	*Herschel.* LXXI.	115
Astronomical observations.	*N. Pigott.* ——	347
Ditto.	*F. Wollaston.* LXXIV.	181
Ditto.	*De Zach.* LXXV.	137
Ditto, at York.	*E. Pigott.* LXXVI.	423
On two lately-discovered celestial bodies.	*Herschel.* XCII.	213
On a new celestial body.	*Herschel.* XCVII.	260
On atmospherical refraction, as it affects astronomical observations.	*Groombridge.* C.	190
Some astronomical observations, the result of which appears to throw some new light on the organization of the celestial bodies.	*Herschel.* CI.	269
On the sidereal part of the heavens, and its connection with the nebulous.	*Herschel.* CIV.	248
On the dispersive power of the atmosphere, as it affects them.	*Lee.* CV.	375
On the local arrangement of the celestial bodies, and on the milky way.	*Herschel.* CVII.	302
(Physical) An improved solution of a problem in physical astronomy.	*Hellins.* LXXXVIII.	527
An appendix to the above.	*Hellins.* XC.	86
On the integration of certain differential expressions with which problems in physical astronomy are connected.	*Woodhouse.* XCIV.	19

		Vol.	Page.
Atmosphere.* On the quantities of moisture absorbed by various substances.	*Ct. Rumford.*	LXXVII.	240
A journal of atmospheric electricity.	*Read.*	LXXXI.	185
Continuation of the above.	*Read.*	LXXXII.	225
On the atmospheres of Venus and the Moon.	*Schroeter.*	LXXXII.	309
The effects of electrical atmosphere upon frogs.	*Volta.*	LXXXIII.	11
On the twilight of that of Venus.	*Schroeter.*	LXXXV.	126
Appendix to the above.	*Schroeter.*	——	156
On a singular instance of atmospheric refraction.	*Latham.*	LXXXVIII.	357
On the variations to which it is exposed.	*Vince.*	LXXXIX.	13
On atmospherical refraction.	*Groombridge.*	C.	190
Extent of that of a comet.	*Herschel.*	CII.	122
On atmospherical refraction.	*Groombridge.*	CIV.	337
Changes produced by the respiration of rabbits.	*Brodie.*	—	383
On its dispersive power.	*Lee.*	CV.	375
On its temperature.	*J. Davy.*	CVII.	275
Attraction.* On that of various saline substances.	*Kirwan.*	LXXI.	7
On the resolution of attractive powers.	*Waring.*	LXXIX.	185
Table of elective attractions.	*Young.*	XCIX.	148
Of homogeneous ellipsoids.	*Ivory.*	—	345
On the attraction of spheroids of every description.	*Ivory.*	CII.	1
Of an extensive class of spheroids.	*Ivory.*	—	46
Of such solids as are terminated by planes of solids, of greatest attraction.	*T. Knight.*	—	247
Auk. On the formation of its digestive organs.	*Home.*	CII.	397
Aurora Borealis.* A curious account, by Professor Gmelin.	*Blagden.*	LXXIV.	228

	Vol.	Page.
AURORA BOREALIS.* Its effects on the magnetic needle. - - *Cavallo.*	LXXVII.	24
AURUM FULMINANS. On its explosive force. *Ct. Rumford.*	LXXI.	321
AXIS.* On the rotation of the planets round their axes. - - *Herschel.*	LXXI.	115
On the inclination of the axis of Mars. *Herschel.*	LXXIV.	233
On the rotatory motion of a body about any axis passing through its center of gravity. *Landon.*	LXXV.	311
AZIMUTH.* Of an improvement in the quadrant of altitude for the resolution of problems, dependant on azimuth and altitude. *Smeaton.*	LXXIX.	1
AZOTE. Whether absorbed in respiration. *Allen.* *Pepys.*	XCVIII.	264
Experiments to ascertain if it is evolved when oxygen is respired. - - *Allen.* *Pepys.*	XCIX.	413
A new substance formed by its combination with chlorine. - - - *H. Davy.*	CIII.	1

B

		Vol.	Page
Baffin's Bay. On irregularities of the compass during the voyage of discovery in 1819.	*Sabine.*	CIX.	112
On the dip and variation of the needle during the same voyage.	*Sabine.*		132
On the red snow found there.	*Bauer.*	CX.	165
Bakerian Lectures. Upon the resistance of bodies moving in fluids.	*Vince.*	LXXXVIII.	1
On an unusual refraction of the air.	*Vince.*	LXXXIX.	13
On the mechanism of the eye.	*Young.*	XCI.	23
On the theory of light and colours.	*Young.*	XCII.	12
On horizontal refraction, and on measuring the dip at sea.	*Dr. Wollaston.*	XCIII.	1
On physical optics.	*Young.*	XCIV.	1
On the force of percussion.	*Dr. Wollaston.*	XCVI.	13
On chemical agencies of electricity.	*H. Davy.*	XCVII.	1
On some new phenomena of chemical changes produced by electricity.	*H. Davy.*	XCVIII.	1
Some new analytical researches on the nature of certain bodies.	*H. Davy.*	XCIX.	39
Some new electro-chemical researches on various objects.	*H. Davy.*	C.	16
Some combinations of oxymuriatic gas and oxygene.	*H. Davy.*	CI.	1
On the elementary particles of certain crystals.	*Dr. Wollaston.*	CIII.	51
On some new electro-chemical phenomena.	*Brande.*	CIV.	51
Balæna mysticetus. Peculiarities of its organ of hearing.	*Home.*	CII.	83
Balances. Of the hydrostatic balance.	*Evelyn.*	LXXXVIII.	139

		Vol	Page
Balances. Method of determining their accuracy,	*Ct. Rumford*	LXXXIX.	183
Bark.* (Medicine) A new species found in St. Lucia.	*Davidson.*	LXXIV.	452
Its annual consumption in this country.	*Heberden.*	LXXXVI.	83
(of Trees*) On the tanning principle contained in it.	*Biggin.*	LXXXIX.	259
On its formation.	*T. A. Knight.*	XCVII	103
On its inconvertibility into albursum.	*T. A. Knight.*	XCVIII.	103
Barometer.* Of a thermometrical.	*Cavallo.*	LXXI	509
Of a marine barometer.	*Flinders.*	XCVI.	239
On a diurnal variation between the tropics.	*Horsburgh.*	XCV.	177
Of a thermometrical, for measuring altitudes.	*F. J. H. Wollaston.*	CVII.	183
On the measurement of Snowdon by the thermometrical barometer.	*F. J. H. Wollaston.*	CX.	295
Barytes. On its decomposition.	*H. Davy.*	XCVIII.	42
On its decomposition.	*H. Davy.*	——	339
On its composition.	*H. Davy.*	C.	63
Experiments with its muriate.	*Brodie.*	CII.	218
Method of procuring it pure.	*H. Davy.*	CV.	211
Basalt.* Of the Island of Ponza.	*Hamilton.*	LXXVI.	373
On its affinity with granite.	*Beddoes.*	LXXXI.	48
Observations on it.	*Watt.*	XCIV.	279
On the alterations on the surface of the basaltic counties of Derry and Antrim.	*Richardson.*	XCVIII.	187
Base. Of the measurement of a base on Hounslow Heath.	*Roy.*	LXXV.	385
Ditto on the coast of Coromandel.	*Topping.*	LXXXII.	99
Bason. Of the mineral bason in several counties of Wales.	*Greville.*	XCVI.	342

		Vol.	Page.
Bat. Of the vampire bat.	*Home.*	XCVII.	158
Bayreuth. Of some remarkable caves in that Principality, and of some fossil bones found therein.	*Mar. Anspach.*	LXXXIV.	402
Beam-compass. Description of the beam-compass.	*Evelyn.*	LXXXVIII.	137
Its application to the division of instruments.	*Cavendish.*	XCIX.	221
Beaver.* On its stomach.	*Home.*	XCVII.	147
Bees.* Observations on them.	*Hunter.*	LXXXII.	128
On the economy of bees.	*T. A. Knight.*	XCVII.	234
Bella donna.* The effects of its juice on the eye.	*Wells.*	CI.	380
Benares. On the Observatory there.	*Williams.*	LXXXIII.	45
Of the method of making ice there.	*Williams.*	——	56
Appendix to the above.	*Williams.*	——	129
Bengore. Description of the promontory, and its stratification.	*Richardson.*	XCVIII.	189
Benjamin tree. A botanical description of that of Sumatra.	*Dryander.*	LXXVII.	307
Benzoic acid. Formed from dragon's blood.	*Hatchett.*	XCV.	298
Berzelius M. His arguments of chlorine being a compound of oxygen, referred to.	*H. Davy.*	CIV.	71
Bezoar.* Observations on oriental bezoar.	*Pearson.*	LXXXVIII.	46
Bile.* Observations on it.	*Brande.*	XCIX.	382
Binomial. The binomial theorem demonstrated by multiplication.	*Robertson.*	LXXXV.	258
Newton's binomial theorem demonstrated by algebra.	*Sewell.*	LXXXVI.	382
A new demonstration of the binomial theorem, when the exponent is a positive or negative fraction.	*Robertson.*	XCVI.	305
A new demonstration of the binomial theorem.	*T. Knight.*	CVI.	331
Appendix to the above.	*T. Knight.*	CVII.	245

		Vol.	Page.
Birds.* An account of a new English bird of the genus motacilla.	*Lightfoot.*	LXXV.	8
On the conversion of the substance of a bird into a hard fatty matter.	*Sneyd.*	LXXXII.	197
On the structure of their eyes.	*Smith.*	LXXXV.	263
On the gizzards of grazing birds.	*Home.*	C.	184
On an appendix to the small intestines of birds.	*Macartney.*	CI.	257
Of the solvent glands in their digestive organs.	*Home.*	CII.	394
Birth.* Calculations upon parturition and population.	*Bland.*	LXXI.	355
A remarkable case of numerous births.	*Garthshore.*	LXXVII.	344
Bismuth. On gold alloyed with bismuth.	*Hatchett.*	XCIII.	66
On gold alloyed with sundry metals.	*Hatchett.*	——	104
Bitter-spar. On its primitive crystal.	*Dr. Wollaston.*	CII.	159
Bitumen. On the change of some of the proximate principles of vegetables into bitumen.	*Hatchett.*	XCIV.	385
Black wadd. Experiments upon it.	*Wedgwood.*	LXXIII.	284
Bladder. On the effects of a bladder with hot water applied to the pit of the stomach.	*Currie.*	LXXXII.	206
On the changes which blood undergoes when extravasated into it.	*Home.*	LXXXVI.	486
Experiments to prove that fluids pass directly from the stomach to the circulation of the blood, and thence to the bladder, without going through the thoracic duct.	*Home.*	CI.	163
Blood.* On the changes it undergoes when extravasated into the urinary bladder.	*Home.*	LXXXVI.	486
On its colour.	*Wells.*	LXXXVII.	416
Hydraulic investigations relative to its motion.	*Young.*	XCVIII.	164

		Vol.	Page.
Blood.* On its circulation without a heart.	*Home.*	XCIX.	161
On the aeration of the fœtal blood in different classes of animals.	*Home.*	C.	205
On the non-existence of sugar in that of persons labouring under diabetes mellitus.	*Dr. Wollaston.*	CI.	96
On fluids passing directly to the circulation of the blood.	*Home.*	—	163
Chemical researches on it.	*Brande.*	CII.	90
On the relation between the nervous and sanguiferous systems.	*Philip.*	CV.	424
On the effects of medicines upon the circulating blood, particularly that of the colchicum autumnale upon the gout.	*Home.*	CVI.	257
An appendix to the above.	*Home.*	—	262
Of its circulation in the class vermes, and the principle upon which it differs from higher classes.	*Home.*	CVII.	1
On its changes in the act of coagulation.	*Home.*	CVIII.	172
Appendix to the above.	*Home.*	—	185
A farther investigation of its component parts.	*Home.*	CX.	1
Boar, wild. On its grinding teeth, and those of the animal incognitum.	*Home.*	XCI.	319
Bodies.* (in Motion) On those affected by friction.	*Vince.*	LXXV.	165
Upon their resistance in fluids.	*Vince.*	LXXXVIII.	1
Bones.* Experiments on shell and bones.	*Hatchett.*	LXXXIX.	315
(Fossil) On fossil bones from Bayreuth.	*Mar. Anspach.*	LXXXIV.	402
Observations on the above.	*Hunter.*	——	407
Experiments on them.	*Hatchett.*	LXXXIX.	333
Borax. On its production.	*Blane.*	LXXVII.	297
On its production in Thibet.	*Da Rovato.*	——	301

		Vol.	Page.
BORAX. On the decomposition of its acid.	*De Orell.*	LXXXIX.	56
BOVEY. Analytical experiments on a peculiar substance which is found with the Bovey coal.	*Hatchett.*	XCIV.	385
BOUTAN. On the vegetable and mineral productions of Boutan and Thibet. -	*Saunders.*	LXXIX.	79
BOW. On the Newtonian prismatic blue bow.	*Herschel.*	XCIX.	266
On two primary prismatic bows.	*Herschel.*	C.	151
BRACES. On those used by Mr. Seppings in the construction of ships. - -	*Young.*	CIV.	324
On diagonal braces in ships of war.	*Seppings.*	CVIII.	1
BRAHE, TYCHO. On the pains he took in dividing circles. - - -	*Smeaton.*	LXXVI.	1
BRAIN.* On its influence on the action of the heart, and on the generation of animal heat.	*Brodie.*	CI.	36
Further experiments on the above.	*Brodie.*	CII.	378
On its functions. - -	*Home.*	CIV.	469
On the effects of opium, spirits of wine, and tobacco. - -	*Phillips.*	CV.	74
BRAZIL.* On platina and native palladium from thence. - -	*Dr. Wollaston.*	XCIX.	189
Account of a vegetable wax from Brazil.	*Brande.*	CI.	261
On a mass of native iron from thence.	*Mornay.*	CVI.	270
Experiments on it. -	*Dr. Wollaston.*	—	281
BREAK-WATER. On some fossil remains of a rhinoceros discovered in a cavern of lime-stone.	*Home.*	CVII.	176
BREEDING. On the mode of breeding of the oviparous shark. - -	*Home.*	C.	205
BRENTFORD. On some organic remains found there.	*Trimmer.*	CIII.	131
BRIDLINGTON. On an ebbing and flowing stream discovered in the harbour. -	*Storer.*	CV.	54

	Vol.	Page.
Brightness. (of Stars) First catalogue of their comparative brightness. - *Herschel.*	LXXXV.	187
Second catalogue. - *Herschel.*	——	458
Third catalogue. - *Herschel.*	LXXXVII.	293
Fourth catalogue. - *Herschel.*	LXXXIX.	121
Buds. On their formation in tuberous rooted plants. *T. A. Knight.*	XCIII.	288
On their reproduction. - *T. A. Knight.*	XCV.	257
Burrampooter. An account of the Ganges and Burrampooter. - - *Rennell.*	LXXI.	87
Butters. Remarks on the butters of metals. *Chenevix.*	XCII.	164
Buxaduar. On its climate and productions. *Saunders.*	LXXIX.	80

C

CAC CAN

		Vol.	Page.
CACTUS TUNA.* A kind of Indian fig, an irritable vegetable.	*Smith.*	LXXVIII.	161
CALAMINES.* An analysis of some calamines.	*Smithson.*	XCIII.	12
CALCULI.* On human calculi.	*Lane.*	LXXXI.	223
Remarks on them.	*Dr. Wollaston.*	LXXXVII.	390
On their composition.	*Pearson.*	LXXXVIII.	15
On their structure.	*Brande.*	XCVIII.	223
Observations on the above.	*Home.*	——	244
Of a calculus from the human bladder of uncommon magnitude.	*Earle.*	XCIX.	303
On cystic oxide, a new species.	*Dr. Wollaston.*	C.	223
CALENDAR.* On the civil year of the Hindoos, and three Hindoo almanacs.	*Cavendish.*	LXXXII.	383
CALOMEL. Remarks on it, and Scheele's method of preparing it.	*Chenevix.*	XCII.	154
Analysis of it.	*H. Davy.*	CI.	26
CALORIC. On some of its leading doctrines.	*Ure.*	CVIII.	388
CAMBRIDGE. (New England) On its longitude.	*Willard.*	LXXI.	502
CAMEL. On its rate of travelling.	*Rennell.*	LXXXI.	129
On its stomach, reservoirs for water, and its urine.	*Home.*	XCVI.	357
CAMERA. On a periscopic camera obscura and microscope.	*Dr. Wollaston.*	CII.	370
CANCER. On its matter.	*Crawford.*	LXXX.	391

		Vol.	Page.
CANDLE.* On the light emitted by candles.	*Ct. Rumford.*	LXXXIV.	100
On the reflection of the heat. -	*Herschel.*	XC.	297
CARBON. Experiments on it. -	*Henry.*	LXXXVII.	401
Of carbon in carbonic acid. -	*Allen.*	XCVII.	267
Analytical researches on carbonaceous matter.	*H. Davy.*	XCIX.	39
CARIBBEE.* (Islands) Reasons for supposing that the volcanos there communicate with those on the continent of America. -	*Anderson.*	LXXV.	30
CAROTIDS. On a nervous affection cured by their pressure. - -	*Parry.*	CI.	89
CASSOWARY. On its solvent glands. -	*Home.*	CII.	399
On its solvent glands and gizzards.	*Home.*	CIII.	77
CASUARIUS EMU. On its solvent glands and gizzards.	*Home.*	CIII.	77
CAT.* On the luminous appearance of its eyes.	*Home.*	LXXXIX.	2
CATARACT.* Case of sight recovered at seven years of age, after being deprived of it in infancy.	*Ware.*	XCI.	382
Of two children born with cataracts, with experiments on their proportional knowledge of objects immediately after they were removed.	*Home.*	XCVII.	83
CATERPILLAR.* Of the black canker caterpillar, which destroys the turnips in Norfolk.	*Marshall.*	LXXIII.	217
CAVERN.* Of some remarkable caves in the principality of Bayreuth. - -	*Mar. Anspach.*	LXXXIV.	402
CAVIA AGUTI. On its intestinum ileum.	*Carlisle.*	XCIV.	19
CAYENNE PEPPER. Danger of using it to excess.	*Schotte.*	LXXIII.	93
CENTRIFUGAL FORCE. Its effect on the growth of seeds. - -	*T. A. Knight.*	XCVI.	102
CENTRIPETAL FORCES. On them. -	*Waring.*	LXXVIII.	67

		Vol.	Page.
CHÆTODON. Description of its teeth.	*André.*	LXXIV.	274
Description of the ecan bonna. -	*Bell.*	LXXXIII.	7
CHAIN. On steel chains used for surveying.	*Mudge.*	LXXXV.	423
CHALK.* A great deal in the South of England.	*Barker.*	LXXXI.	281
CHAMOUNY. A curious phenomenon observed there.	*Ct. Rumford.*	XCIV.	23
CHANK. The mode in which the animal sheds its eggs.	*Home.*	CVII.	298
CHANNEL.* On the danger of approaching the British Channel, by the current that prevails to the westward of Scilly -	*Rennell.*	LXXXIII.	182
On the westerly winds raising the level of the British Channel. -	*Rennell.*	XCIX.	400
Farther observations on the current to the westward of Scilly. - -	*Rennell.*	CV.	182
CHARCOAL.* On its power of absorbing water.	*Allen.*	XCVII.	271
Its nature. - -	*H. Davy.*	XCIX.	72
CHEMISTRY. New electro-chemical phenomena.	*Brande.*	CIV.	51
On objects of chemical enquiry.	*H. Davy.*	—	62
CHERMES LACCA. Its natural history.	*Roxburgh.*	LXXXI.	228
CHINA.* On an astringent vegetable substance.	*Brande.*	CVII.	39
CHLORINE. On its combinations with different metals.	*J. Davy.*	CII.	169
On the fallacy of water being formed by its decomposition. - -	*H. Davy.*	CVIII.	169
CLORANTHUS. A new genus of plants.	*Schwartz.*	LXXVII.	359
CHORDS. Of the vibrations of chords.	*Young.*	XC.	134
CHRONOLOGY.* On that of the Hindoos.	*Marsden.*	LXXX.	560
CHRONOMETER. On the errors in longitude at sea, from the action of the iron in ships upon them.	*Fisher.*	CX.	196

		Vol.	Page.
CHYAZATES. A term given to the triple prussiates.	*Tennant.*	CIV.	582
On chyazic acids.	*Porrett.*	CV.	220
CHYLE.* On the process of its conversion from animal and vegetable substances.	*Home.*	XCVII.	139
CIPO DE CUNANAM. A description of a curious plant growing in Brazil.	*Mornay.*	CVI.	279
CIRCLE. (Transit.) A description of one for determining the place of celestial objects as they pass the meridian.	*F. Wollaston.*	LXXXIII.	133
On an improved reflecting circle.	*Mendoza y Rios.*	XCI.	363
Of an astronomical circle, and some remarks on the construction of circular instruments.	*Pond.*	XCVI.	420
A method of dividing astronomical circles.	*Kater.*	CIV.	419
(Geometry) Halley's quadrature of the circle improved.	*Hellins.*	LXXXIV.	217
On a new property of the tangents of the three angles of a plane triangle.	*Garrard.*	XCVIII.	120
On some properties of tangents to circles.	*Hey.*	CIV.	348
CLAY-PIT. On a substance found at Diss.	*Wiseman.*	LXXXVIII.	567
COAL.* On a peculiar substance in the Bovey coal.	*Hatchett.*	XCIV.	385
On fossil and vegetable coal	*Hatchett.*	XCVI.	130
On the application of its gas to economical purposes.	*Murdoch.*	XCVIII.	124
On the means of lighting coal mines without explosion.	*Clanny.*	CIII.	200
Ditto Ditto	*H. Davy.*	CVI.	1
An invention for lighting mines with safety.	*H. Davy.*	—	23
Further experiments on it.	*H. Davy.*	—	115

		Vol.	Page.
COAL.* On the composition and analysis of the inflammable gaseous compounds resulting from the destructive distillation of coal and oil.	*Brande.*	CX.	11
COBRA DE CAPELLO. On the expansion of the skin of its neck.	*Home.*	XCIV.	346
COCCUS LACCA. Its natural history.	*Kerr.*	LXXI.	374
COCHINEAL.* On gold shells so called.	*Lightfoot.*	LXXVI.	169
CODFISH.* On the structure of its stomach.	*Home.*	XCVII.	145
COHESION.* An essay on the cohesion of fluids.	*Young.*	XCV.	65
COINS.* On the various alloys, gravity, and wear of gold.	*Hatchett.*	XCIII.	43
COLBURN. On a family having supernumerary fingers and toes.	*Carlisle.*	CIV.	94
COLCHICUM AUTUMNALE. On its effects upon the gout.	*Home.*	CVI.	257
Appendix to the above.	*Home.*	—	262
Second Appendix to the above.	*Home.*	CVII.	262
COLD. (Chemistry) On the cold produced by the evaporation of fluids.	*Cavallo.*	LXXI.	509
On the point of mercurial congelation.	*Hutchins.*	LXXIII.	303*
Observations on Mr. Hutchins's experiments on mercurial congelation.	*Cavendish.*	LXXIII.	303
History of the congelation of quicksilver.	*Blagden.*	——	32
Experiments on freezing mixtures in Hudson's Bay.	*M'Nab.*	LXXVI.	241
On the congelation of the vitriolic acid.	*Keir.*	LXXVII.	267
On the production of artificial cold.	*Beddoes.*	——	282
On the cooling of water below its freezing point.	*Blagden.*	LXXVIII.	125
On lowering the point of congelation in water.	*Blagden.*	——	277

		Vol.	Page.
Cold. (Chemistry) On the production of artificial cold.	*Walker.*	LXXVIII.	395
On the congelation of quicksilver in England.	*Walker.*	LXXIX.	199
Of the method of making ice at Benares.	*Williams.*	LXXXIII.	56
Appendix to the above	*Williams.*		129
On the best methods of producing artificial cold	*Walker.*	LXXXV.	270
On artificial cold by means of muriate of lime.	*Walker.*	XCI.	120
On a method of freezing at a distance.	*Dr. Wollaston.*	CIII.	71
On the production of cold by the evaporation of sulphuret of carbon.	*Marcet.*		252
(Natural philosophy*) Further experiments on cold.	*Wilson.*	LXXI.	386
On the influence of cold upon the health of the inhabitants of London.	*Heberden, jun.*	LXXXVI.	279
Collision.* Experiments upon the collision of bodies.	*Smeaton.*	LXXII.	337
Colours.* (Chemistry) On the colours used in painting by the ancients.	*H. Davy.*	CV.	97
On the colouring matters of some vegetables.	*Smithson.*	CVIII.	110
(Natural philosophy*) On the ocular spectra of light and colours.	*Darwin.*	LXXVI.	313
Of the powers of the prismatic colours to heat and illuminate objects.	*Herschel.*	XC.	255
On the theory of light and colours.	*Young.*	XCII.	12
Some cases of the production of colours.	*Young.*		387
On the effects of simple pressure in producing the complementary colours by polarised light.	*Brewster.*	CV.	60

		Vol.	Page.
Colours.* (Natural philosophy*) On some phenomena of colours exhibited by thin plates.	*Knox.*	CV.	161
On the colours in some specimens of calcareous spar.	*Brewster.*	CV.	270
Coluber naja. On the voluntary expansion of the skin of its neck.	*Home.*	XCIV.	346
Columbite. Its analysis.	*Dr. Wollaston.*	XCIX.	248
Columbium. On the identity of columbium and tantalum.	*Dr. Wollaston*	XCIX.	246
Combination.* On the combinations of different metals and chlorine, &c.	*J. Davy*	CII.	169
On those of fluoric acid.	*J. Davy.*	—	352
On those of phosphorus and sulphur.	*J. Davy.*	—	405
Combustion. On the light of bodies in a state of.	*Morgan.*	LXXV.	190
Comet.* Of a comet in 1781.	*Herschel.*	LXXI.	492
Ditto in 1783.	*E. Pigott.*	LXXIV.	20
Ditto in 1783.	*E. Pigott.*	—	460
On the expected return of the comet of 1532 and 1661 in the year 1788.	*Maskelyne.*	LXXVI.	426
Of a new comet in 1786.	*Miss Herschel.*	LXXVII.	1
Remarks on the above.	*W. Herschel.*	—	4
Observations on the above.	*F. Wollaston.*	—	55
Observations on a comet in 1789.	*Herschel.*	LXXIX.	151
Account of a comet in 1791.	*Herschel.*	LXXXII.	23
Of the discovery of a comet in 1793.	*Gregory.*	LXXXIII.	50
Observations on the above.	*Maskelyne.*	—	53
Of the discovery of a comet in 1793.	*Miss Herschel.*	LXXXIV.	1
Of the discovery of a new comet in 1795.	*Miss Herschel.*	LXXXVI.	131

		Vol.	Page
Comet.*	Observations of the expected comet in 1807. *Herschel.*	XCVII.	264
	Observations of a comet, to investigate its magnitude, and nature of its illumination. *Herschel.*	XCVIII.	145
	Observations of a comet, and on the construction of its different parts. - *Herschel.*	CII.	115
	Observations and remarks, as above, on another. *Herschel.*	—	229
	A method of deducing a first approximation to the orbit of a comet from three geocentric observations. - - *Ivory.*	CIV.	121
Cometic.	Of the solar agency in the production of cometic phenomena. - *Herschel.*	CII.	136
Compass.*	On the permanency of its variation in Jamaica. - - *Robertson.*	XCVI.	348
	Irregularities of its direction on board ship. *Sabine.*	CIX.	112
	On the dip, variation, and force, of the needle, on the voyage for discovering a N. W. passage, 1818. - - *Sabine.*	—	132
Concretions.*	On gouty and urinary concretions. *Dr. Wollaston.*	LXXXVII.	386
	On the composition of urinary concretions. *Pearson.*	LXXXVIII.	15
Condenser.	A new construction of an air pump. *Austin.*	CIII.	138
Conferva rivularis.	Its power of extracting air from water. - *Count Rumford.*	LXXVII.	109
Conic sections.*	Of their rectification. *Hellins.*	XCII.	448
Copper.*	A process for separating silver from it. *Keir.*	LXXX.	367
	A description of some arseniates from Cornwall. *De Bournon.*	XCI.	169
	Analysis of the above, and of the red octaëdral copper ore. - - *Chenevix.*	—	193

		Vol.	Page
COPPER.* On a triple sulphuret of copper, lead, and antimony.	*De Bournon.*	XCIV.	30
Analysis of the above.	*Hatchett.*	—	63
On its combination with chlorine.	*J. Davy.*	CII.	170
Of a new species of copper ore.	*Thomson.*	CIV.	45
CORMORANT. On its solvent glands.	*Home.*	CII.	396
CORN.* A process to purify corn tainted by must.	*Hatchett.*	CVII.	36
CORNEA.* On the morbid actions of the cornea of the eye, and its treatment, considered.	*Home.*	LXXXVII.	1
CORPORA LUTEA. Of an error into which physiologists have fallen respecting it.	*Home.*	CVII.	256
On corpora lutea.	*Home.*	CIX.	59
CORROSIVE SUBLIMATE. Its analysis.	*H. Davy.*	CI.	26
CORUNDUM. On the corundum stone from Asia.	*Greville.*	LXXXVIII.	403
On its varieties, called oriental ruby, sapphire, &c.	*De Bournon.*	XCII.	233
Analysis of it, and of some substances which accompany it.	*Chenevix.*	—	327
Method of making grindstones with it.	*Hatchett.*	XCIV.	215
COTES. On a remarkable application of his theorem.	*J. F. W. Herschel.*	CIII.	8
COURTOIS, M. The discoverer of a new substance which becomes a violet coloured gas by heat.	*H. Davy.*	CIV.	74
COW.* On its teeth.	*Home.*	LXXXIX.	251
CRETINISM. Some account of it.	*Reeve.*	XCVIII.	111
CRIMPING. Experiments on crimping fish.	*Carlisle.*	XCV.	23
CROCODILE.* On sundry petrified bones of it.	*Camper.*	LXXVI.	445
CRYOPHORUS. Description of an instrument so called.	*Dr. Wollaston.*	CIII.	73

		Vol.	Page.
Crystal.* Experiments with that of Iceland.	*Brougham.*	LXXXVII.	378
On the oblique refraction of Iceland crystal.	*Dr. Wollaston.*	XCII.	381
On the crystals of the compound sulphuret from Huelboys.	*Smithson.*	XCVIII.	55
On those of carbonate of lime, bitter-spar, &c.	*Dr. Wollaston.*	CII.	155
On the elementary particles of certain crystals.	*Dr. Wollaston.*	CIII.	51
On the affections of light transmitted through crystallized bodies.	*Brewster.*	CIV.	187
On the communication of the structure of doubly refracting crystals to glass and other substances, by mechanical powers.	*Brewster.*	CVI.	156
On the laws which regulate the absorption of polarised light by doubly refracting crystals.	*Brewster.*	CIX.	11
On the action of crystalline bodies on homogeneous light.	*J. F. W. Herschel.*	CX.	45
Crystalline.* On the crystalline humour.	*Home.*	LXXXIV.	21
On the power of the eye when deprived of the crystalline lens.	*Home.*	XCII.	1
On its structure in fishes and quadrupeds.	*Brewster.*	CVI.	311
Cuckoo.* On its natural history.	*Jenner.*	LXXVIII.	219
Cupim. (White ants) Account of their nests in Brazil.	*Mornay.*	CVI.	278
Cuprane.* A composition of chlorine and copper.	*J. Davy.*	CII.	170
Current.* On a current to the westward of Scilly.	*Rennell.*	LXXXIII.	182
Further observations on the same.	*Rennell.*	CV.	182
Curves.* Methodus inveniendi lineas curvas ex proprietatibus variationis curvaturæ.	*Landerbeck.*	LXXIII.	456
Ditto Ditto.	*Landerbeck.*	LXXIV.	477

Vol. Page.

CUSTOMS.* Those of the Indians of North America.
M'Causland. LXXVI. 229

CYLINDERS. On the penetration of a hemisphere by an indefinite number of equal and similar ones.
T. Knight. CII. 310

CYSTIC OXIDE. A new species of urinary calculus.
Dr. Wollaston. C. 223

D

DAM DEC

		Vol.	Page.
Damps.* On the fire damp of coal mines, and the methods of lighting the mines without explosion.	*H. Davy.*	CVI.	1
An invention for lighting coal mines by consuming the fire damp.	*H. Davy.*	—	23
Farther experiments, with observations on flame.	*H. Davy.*	—	115
Dead sea.* An analysis of its waters, and of the river Jordan.	*Marcet.*	XCVII.	296
Deafness.* On the effects which take place on the destruction of the membrana tympani, and on the removal of a particular species of deafness.	*A. Cooper.*	XCI.	435
Deal rods.* Table of their expansion, with observations.	*Roy.*	LXXV.	437
Death.* On the modes in which it is produced by vegetable poisons.	*Brodie.*	CI.	178
Decandolle. His observation on the effects of light on the succulent shoots of trees and plants, noticed.	*T. A. Knight.*	CII.	317
Decks. On the mode of laying the planks of them.	*Young.*	CIV.	332
Declination.* Of the right ascension and declination of Mercury near his greatest elongation, in 1786.	*Smeaton.*	LXXVII.	318
Demonstrations of the late Dr. Maskelyne's formulæ for finding the longitude and latitude of a celestial object from its right ascension and declination.	*Robertson.*	CVI.	138
Decomposition. A table of elective attractions, and on the sequences of double decompositions.	*Young.*	XCIX.	148

		Vol.	Page.
DEER.* On some bags near their eye.	*Home.*	XCIV.	73
DE LAMBRE. Investigations on a measurement of an arc of the meridian, noticed.	*Rodriguez.*	CII.	324
His formulæ on the calculation of spheroids noticed.	*Rodriguez.*	—	338
DELPHINUS GANGETICUS. A description of its teeth.	*Home.*	CVIII.	417
DENSITY. Experiments to determine the density of the earth.	*Cavendish.*	LXXXVIII.	469
On the mean density of the earth.	*Young.*	CIX.	84
DENUDATION DERBYSHIRE. An account of the great Derbyshire denudation.	*Farey.*	CI.	242
DETONATION.* On a new detonating compound.	*H. Davy.*	CIII.	1
Further observations upon it.	*H. Davy.*	—	242
DEVONSHIRE.* Some experiments on a mineral from Devonshire, consisting principally of alumine and water.	*H. Davy.*	XCV.	155
DIABETES MELLITUS. On the non-existence of sugar in the blood of persons labouring under this disease.	*Dr. Wollaston.*	CI.	96
DIAL. Description of an equatorial dial at the Observatory at Benares.	*Williams.*	LXXXIII.	47
DIAMOND.* On its nature.	*Tennant.*	LXXXVII.	123
On its nature.	*Allen.*	XCVII.	279
On its combustion.	*H. Davy.*	CIV.	557
On the cutting diamond.	*Dr. Wollaston.*	CVI.	265
DIFFERENCES. On the integration of certain differential expressions.	*Woodhouse.*	XCIV.	219
Of the general term of an important series in the inverse method of finite differences.	*Brinkley.*	XCVII.	114
Several new theorems of finite differences.	*J. F. W. Herschel.*	CVI.	25
Two general propositions in the method of differences.	*T. Knight.*	CVII.	234

		Vol.	Page.
DIP.	On horizontal refractions, and the dip of the horizon of the sea. — — *Huddart.*	LXXXVII.	29
	On a method of measuring the dip at sea. *Dr. Wollaston.*	XCIII.	1
	On the dip of the magnetic needle at the apartments of the Royal Society, from 1786 to 1805. *Gilpin.*	XCVI.	385
	On the dip, variation, and force of the magnetic needle, on the voyage in search of a N. W. passage in 1818. — — *Sabine.*	CIX.	132
DISEASE.*	A species of sarcocele in a black man, with some account of its being an endemial disease in Senegal. — — — — *Schotte.*	LXXIII.	85
DISPERSIVE.	A method of examining refractive and dispersive powers by prismatic reflection. *Dr. Wollaston.*	XCII.	365
	On the dispersive power of the atmosphere, and its effect on astronomical observations. *S. Lee.*	CV.	375
DISSECTION.*	(of Animals) Of an hermaphrodite dog. — — — *Home.*	LXXXIX.	157
	(of Human bodies) Of an extraordinary intro-susception. — — *Lettsom.*	LXXVI.	305
	Of a human fœtus, in which the circulation of the blood was carried on without a heart. *Brodie.*	XCIX.	161
DISTANCES.*	Observations for ascertaining the relative distances of clusters of stars. *W. Herschel.*	CVIII.	429
DISTILLING.*	On the means of producing a double distillation by the same heat. *Tennant.*	CIV.	587
DIVIDING.*	On dividing instruments by ocular inspection, so contrived that no error can occur. *Troughton.*	XCIX.	105
	On an improvement in the dividing of instruments. — — *Cavendish.*	—	221
	On a method of examining the divisions of instruments. — — — *Lax.*	—	232

		Vol.	Page.
Dividing.* An improved method of dividing astronomical instruments. - -	*Kater.*	CIV.	419
Dog.* Observations tending to show that the dog, wolf, and jackall, are all of the same species.	*Hunter.*	LXXVII.	253
A supplement to the above. -	*Hunter.*	LXXIX.	160
Of an hermaphrodite dog. -	*Home.*	LXXXIX.	157
Dormouse. On the structure of its stomach.	*Home.*	XCVII.	148
Dover Castle. On the temperature of the water in the well. - - - -	*Six.*	LXXVIII.	111
Dropsy.* Of a dropsy of the ovarium.	*Martineau.*	LXXIV.	471
Drugs.* An account of the tabasheer.	*Russell.*	LXXX.	273
Dryness.* On that of the year 1788.	*Hutchinson.*	LXXIX.	37
On hygrometry, or a state of dryness.	*De Luc.*	LXXXI.	1
Duct, thoracic. Not the organ through which fluids pass to the circulation of the blood.	*Home.*	CI.	165
Dugong. On its milk tusks and organ of hearing.	*Home.*	CX.	144
Some account of it. - -	*Raffles.*	—	174
On its anatomy. - -	*Home.*	—	315

E

		Vol.	Page.
EAR.* On the membrana tympani.	*Home.*	XC.	1
The effects of the destruction of the membrana tympani.	*Home.*	—	151
Farther observations upon the same subject, and an account of an operation to remove a particular species of deafness.	*A. Cooper.*	XCI.	435
On sounds inaudible by certain ears.	*Dr. Wollaston.*	CX.	306
EARTH.* On the earth's diurnal motion.	*Herschel.*	LXXI.	115
On the density of the earth.	*Cavendish.*	LXXXVIII.	469
Its mean density, deduced from experiments on Scheballien.	*Playfair.*	CI.	376
On the probability of error in calculating its density.	*Young.*	CIX.	70
(Nat. Philosophy) On the temperature of the earth below the surface in different climates.	*Hunter.*	LXXVIII.	53
EARTHQUAKE. An account of several earthquakes felt in Wales, in 1780.	*Pennant.*	LXXI.	193
One felt at Hafodunos, in 1780.	*Lloyd.*	—	331
Of one near St. Asaph, in 1782.	*Lloyd.*	LXXIII.	104
Several felt in Italy, in 1783.	*Hamilton.*	——	169
One felt in Calabria, in 1783.	*Ippolito.*	——	209
One felt in the North of England, in 1786.	*More.*	LXXVII.	35
One felt in Lincolnshire, in 1792.	*Turnor.*	LXXXII.	283
One felt in various parts of England, in 1795.	*Gray.*	LXXXVI.	353

		Vol.	Page.
Earths. (Chemistry) On the combinations of the metals of the earths with oxygen and oxymuriatic gas.	*H. Davy.*	CI.	19
Eau medicinale. A specific remedy for the gout.	*Home.*	CVI.	257
Echineis remora. Description of this animal.	*Home.*	CVI.	151
Eclipses.* Of the sun in 1778, at Bath.	*Herschel.*	LXXI.	138
Of the sun in 1781, in America.	*Herschel.*	—	505
Of the sun in 1788, at various places.	*Piazzi.*	LXXIX.	55
Of the moon in 1790; some remarkable phenomena.	*Herschel.*	LXXXII.	27
Of the sun in 1793, at Slough.	*Herschel.*	LXXXIV.	39
Of the sun in 1793, at Lilienthal.	*Schroeter.*	——	262
Of the satellites of Jupiter in 1807, at Madras.	*Goldingham.*	XCVIII.	322
On the solar eclipse predicted by Thales.	*Baily.*	CI.	220
Ecliptic.* Observations at the Observatory of Dublin for determining its obliquity.	*Brinkley.*	CIX.	241
Eggs.* Experiments on the impregnation of the eggs of silk-worms.	*Hunter.*	LXXXII.	186
On the use of the yelk in the formation of the embryo in them.	*Home.*	CVI.	301
Electricity.* On the method of rendering sensible the weakest electricity.	*Volta.*	LXXII.	237
On the non-conducting power of a perfect vacuum.	*Morgan.*	LXXV.	272
On a doubler of electricity.	*Bennet.*	LXXVII.	288
On manifesting the presence and quantity of electricity.	*Cavallo.*	LXXVIII.	1
On charging and discharging a glass.	*Gray.*	——	121
Of an instrument to collect small quantities of electricity.	*Cavallo.*	——	255

		Vol.	Page.
ELECTRICITY.* On the conversion of a mixture of dephlogisticated and phlogisticated air into nitrous acid by it.	*Cavendish.*	LXXVIII.	261
On the production of the two states of electricity without friction or communication with the earth.	*Nicholson.*	——	403
Experiments on electricity.	*Nicholson.*	LXXIX.	265
A journal of atmospheric electricity, kept at Knightsbridge, from 1789 to 1790.	*Read.*	LXXXI.	185
A journal of atmospherical electricity at Knightsbridge, from 1790 to 1791.	*Read.*	LXXXII.	225
Of the discovery of animal electricity.	*Volta.*	LXXXIII.	10
Experiments on atmospheric air with the doubler of electricity.	*Read.*	LXXXIV.	266
On the nature of the gas produced by passing electricity through water.	*Pearson.*	LXXXVII.	142
On the electricity excited by contact.	*Volta.*	XC.	403
On the chemical production and agency of electricity.	*Dr. Wollaston.*	XCI.	427
On some chemical agencies of electricity.	*H. Davy.*	XCVII.	1
Some new phenomena of chemical electricity.	*H. Davy.*	XCVIII.	1
Electro-chemical researches on the decomposition of the earths.	*H. Davy.*	XCVIII.	33
Electro-chemical researches.	*H. Davy.*	C.	16
ELECTROMETER.* An account of a new one.	*Brook.*	LXXII.	384
Description of a new one.	*Bennet.*	LXXVII.	26
Appendix to ditto.	*Bennet.*	——	32
ELECTROPHORUS. Its advantages in investigating atmospherical electricity.	*Volta.*	LXXII.	239
ELEPHANT.* On its manners, habits, and natural history.	*Corse.*	LXXXIX.	31

		Vol.	Page.
Elephants.* On the different species of Asiatic elephants, and their mode of dentition.	*Corse.*	LXXXIX.	205
On the structure of its teeth, and those of the sus æthiopicus.	*Home.*	——	237
Of an elephant's tusk, in which the head of a spear was found imbedded.	*Combe.*	XCI.	165
On its stomach.	*Home.*	XCVII.	154
On some organic remains found near Brentford.	*Trimmer.*	CIII.	135
Ellipsoids.* On the attractions of homogeneous ellipsoids.	*Ivory.*	XCIX.	345
Elm.* On the infusions of its bark.	*H. Davy.*	XCIII.	266
On the substance called ulmin.	*Smithson.*	CIII.	64
Emery.* On its composition.	*Tennant.*	XCII.	398
Eprouvette. Description of a very accurate one for gun-powder.	*Count Rumford.*	LXXI.	229
Equations.* Of a quadratic equation.	*Ld. Stanhope.*	LXXI.	195
On the assistance of the tables of sines, tangents, &c. in the resolution of adfected equations.	*Wales.*	——	454
A new method of finding the equal roots of an equation by division.	*Hellins.*	LXXII.	417
On the roots of equations.	*Wood.*	LXXXVIII.	369
On the resolution of algebraic equations.	*Wilson.*	LXXXIX.	265
Methods of clearing equations of quadratic, cubic, quadrato-cubic, and higher surds.	*Allman.*	CIV.	23
An essay towards the calculus of functions.	*Babbage.*	CV.	389
On the developement of exponential functions.	*J. F. W. Herschel.*	CVI.	25
An essay towards the calculus of functions.	*Babbage.*	CVI.	179
On the fluents of irrational functions.	*Bromhead.*	CVI.	335

		Vol.	Page.
EQUATIONS.* On the analogy which subsists between the calculus of functions and other branches of analysis.	*Babbage.*	CVII.	197
On circulating functions, and on the integration of a class of equations of finite differences.	*J. F. W. Herschel.*	CVIII.	144
A new method of solving numerical equations by continuous approximation.	*Horner.*	CIX.	308
EQUATORIAL TELESCOPE.* An account of it.	*Shuckburgh.*	LXXXIII.	67
EQUINOX.* On the precession of the equinoxes.	*Vince.*	LXXVII.	363
On ditto.	*Robertson.*	XCVII.	57
EQUIVALENTS. A synoptic scale of chemical equivalents.	*Dr. Wollaston.*	CIV.	1
ERROR. On the probabilities of error in physical observations.	*Young.*	CIX.	70
EVAPORATION.* On evaporation.	*De Luc.*	LXXXII.	400
EUDIOMETER. An account of a new one.	*Cavendish.*	LXXIII.	106
On a new one, with experiments upon it.	*Pepys.*	XCVII.	247
EXCISE. On the best method of proportioning the excise upon spirituous liquors.	*Blagden.*	LXXX.	321
Supplement to the above.	*Blagden.*	LXXXII.	425
Appendix to the foregoing.	*Gilpin.*	——	439
EXCRESCENCES.* On certain horny excrescences of the human body.	*Home.*	LXXXI.	95
EXPANSION OF FLUIDS.* Description of instruments, with experiments.	*Dr. Blagden.*	LXXXII.	432
EXPECTORATED. On expectorated matter.	*Pearson.*	XCIX.	313
EXPLOSION.* On methods of lighting mines so as to prevent their explosion.	*H. Davy.*	CVI.	1
An invention for giving light in explosive mixtures by consuming the fire-damp.	*H. Davy.*	—	23
Farther experiments on the explosive mixtures, confined by wire gauze.	*H. Davy.*	—	115

		Vol.	Page.
EYES.* A microscopic description of the eyes of the monoculus polyphemus Linnæi.	*André.*	LXXII.	440
Experiments on the ocular spectra of light and colours.	*Darwin.*	LXXVI.	313
On the structure of the eyes of birds.	*Smith.*	LXXXV.	263
Remarks on them.	*Home.*	LXXXVI.	3
On the actions of the straight muscles and cornea, with their treatment.	*Home.*	LXXXVII.	1
Of the orifice in the retina of the human eye.	*Home.*	LXXXVIII.	332
On its mechanism.	*Young.*	XCI.	23
On its power to adjust itself to different distances when deprived of the crystalline lens.	*Home.*	XCII.	1
On the chemical nature of the humours of the eye.	*Chenevix.*	XCIII.	195
Of two children born with cataracts, with observations upon their removal.	*Home.*	XCVII.	83
An account of a membrane in the eye, now first described.	*Macartney.*	CIX.	300

F

		Vol.	Page.
Fairy rings. On fairy rings.	*Dr. Wollaston.*	XCVII.	133
Fallopian tubes.* Experiments upon those of rabbits.	*Haighton.*	LXXXVII.	173
Fanter. Their manner of dividing the year.	*Dobson.*	LXXI.	56
Fat.* Chemical experiments on fat.	*Crellius.*	LXXII.	8
On its formation in living animals.	*Home.*	CIII.	146
On its formation in the intestine of the tadpole.	*Home.*	CVI.	301
Fecundation. On that of vegetables.	*T. A. Knight.*	LXXXIX.	195
Feet.* Some account of the feet of those animals whose progressive motion can be carried on in opposition to gravity.	*Home.*	CVI.	149
Farther observations on the same subject.	*Home.*	—	322
Feldspath. A substance common both to basaltes and granite.	*Beddoes.*	LXXXI.	54
Ferranea. The name given to a combination of chlorine and iron.	*J. Davy.*	CII.	182
Fever.* Reasons why poor women so generally escape the puerperal fever.	*Bland.*	LXXI.	361
(Powder) On the composition of Dr. James's powder.	*Pearson.*	LXXXI.	317,
Fibrolite. Remarks on.	*De Bournon.*	XCII.	289
Analysis of it.	*Chenevix.*	—	335
Fingers.* Of a family having supernumerary fingers and toes.	*Carlisle.*	CIV.	94
Fins. On those of the proteosaurus.	*Home.*	CX.	159

		Vol.	Page.
Fire. On the opinions and veneration of the ancients concerning it.	*Crawford.*	LXXI.	479
(Damp) On that of coal mines, and methods to prevent explosion.	*H. Davy.*	CVI.	1
Of an invention for lighting in explosive mixtures of fire-damp.	*H. Davy.*	CVI.	23
Continuation of the above.	*H. Davy.*	—	115
Fish.* Of a phenomenon on the Island of Sumatra.	*Marsden.*	LXXI.	383
Of the ophiduim barbatum Linnæi.	*Broussonet.*	—	436
Of its organ of hearing.	*Hunter.*	LXXII.	379
On the teeth of cartilaginous fishes.	*André.*	LXXIV.	274
Of a new electrical fish.	*Paterson.*	LXXVI.	382
On a remarkable failure of haddocks in 1792.	*Abbs.*	LXXXII.	367
Of a species of chætodon called ecan bonna.	*Bell.*	LXXXIII.	7
On the action of their muscles.	*Carlisle.*	XCVI.	1
Of the intervertebral substance in fish and quadrupeds.	*Home.*	XCIX.	177
Of the squalus maximus, and the gradation between the whale tribe and cartilaginous fishes.	*Home.*	——	206
Of some fossil remains resembling fishes.	*Home.*	CIV.	571
Of the influence of the spinal marrow on the action of the heart.	*Clift.*	CV.	91
On the organs of respiration in animals which hold an intermediate place between the class pisces and vermes.	*Home.*	CV.	256
On the structure of the crystalline lens in fishes.	*Brewster.*	CVI.	311
Flame.* The nature of that of combustible bodies considered.	*H. Davy.*	CVI.	116
Some researches on flame.	*H. Davy.*	CVII.	45

	Vol.	Page
FLOATING BODIES. Of the stability of ships and other floating bodies.	*Atwood.* LXXXVI.	46
Upon the resistance of bodies moving in fluids.	*Vince.* LXXXVIII.	1
On the stability of ships.	*Atwood.*	201
FLOORS. On the construction of the floors of ships.	*Young.* CIV.	334
FLORENCE. On the combustion of the diamond by means of the lens in the cabinet of natural history there.	*H. Davy.* CIV.	558
FLUENTS.* A method of finding fluents by continuation.	*Vince.* LXXVI.	432
On the fluents of irrational functions.	*Bromhead.* CVI.	335
FLUIDS.* On the motion and resistance of fluids.	*Vince.* LXXXV.	24
On the resistance of bodies moving in them.	*Atwood.* LXXXVI.	128
On the resistance of bodies moving in fluids.	*Vince.* LXXXVIII.	1
On the cohesion of fluids.	*Young.* XCV.	65
Researches on the blood, and some other animal fluids.	*Brande.* CII.	90
FLUORIC. Combinations and compounds.	*H. Davy.* CIII.	267
A peculiar substance named fluorine.	*H. Davy.*	278
Experiments on fluoric compounds.	*H. Davy.* CIV.	62
FLUOR SPAR. On the substances produced in the chemical processes on fluor spar.	*H. Davy.* CIII.	263
On the communication of the structure of doubly refracting crystals to fluor spar.	*Brewster.* CVI.	156
FŒTUS.* On the first appearances of that of rabbits.	*Cruikshank.* LXXXVII.	197
Of the dissection of a human fœtus, in which the circulation of the blood was carried on without a heart.	*Home.* XCIX.	161

		Vol.	Page
Fœtus.* Of an extraordinary human fœtus.	*Gibson.*	C.	123
On the aëration of its blood.	*Home.*	—	216
Of a case of the human fœtus found in the ovarium, of the size it usually acquires at the end of the fourth month.	*Granville.*	CX.	101
Folkstone.* On a subsidence of the ground.	*Lyon.*	LXXVI.	220
Forest. Of a submarine forest.	*Correa de Serra.*	LXXXIX.	145
Fossil.* Of a stag's head and horns found in Derbyshire.	*Barker.*	LXXV.	353
On some fossil bones found in Germany.	*Mar. Anspach.*	LXXXIV.	402
On some fossil bones found in Germany.	*Hunter.*	LXXXIV.	407
On a submarine forest on the coast of England.	*Correa de Serra.*	LXXXIX.	145
On some organic remains found near Brentford.	*Trimmer.*	CIII.	131
On a fossil human skeleton from Guadaloupe.	*König.*	CIV.	107
On some remains of a species of fish.	*Home.*	—	571
Appendix to the above.	*Home.*	CVI.	318
Of some remains of a rhinoceros discovered in a lime-stone rock, near Plymouth.	*Home.*	CVII.	176
Additional facts respecting some fossil remains, upon which two papers have been printed.	*Home.*	CVIII.	24
Of the fossil skeleton of the proteosaurus.	*Home.*	CIX.	209
Continuation of the above.	*Home.*	—	212
Freezing. On a method of freezing at a distance.	*Dr. Wollaston.*	CIII.	71
See *Cold* and *Frost*.			
Friction.* On the motion of bodies affected by friction.	*Vince.*	LXXV.	165
On the source of heat, which is excited by friction.	*Count Rumford.*	LXXXVIII.	80

		Vol.	Page.
Frigate. An account of the sinking and recovery of the Dutch frigate Ambuscade, near the Great Nore, in 1801.	*Whidbey.*	XCIII.	321
Fringes. Observations on the fringes exhibited in the crystallization of glass.	*Brewster.*	CVI.	98
Frog. On its stomach.	*Home.*	XCVII.	161
Frost.* On a remarkable frost on the 23d June, 1783.	*Cullum.*	LXXIV.	416
On freezing mixtures in Hudson's Bay, in 1784.	*M'Nab.*	LXXVI.	241
On the congelation of quicksilver in England.	*Walker.*	LXXIX.	199
Of the method of making ice at Benares.	*Williams.*	LXXXIII.	56
Appendix to the above.	*Williams.*	——	129
On the best methods of producing artificial cold.	*Walker.*	LXXXV.	270
On the production of artificial cold by muriate of lime.	*Walker.*	XCI.	120
Fructification.* It chiefly depends on rain falling at the latter end of the season of flowering.	*Hutchinson.*	LXXIX.	39
On that of the submersed algæ.	*Correa de Serra.*	LXXXVI.	494
Fungi. On those which constitute the colouring matter of the red snow in Baffin's Bay.	*Bauer.*	CX.	165

G

GAL GAS

		Vol.	Page.
Galam. Of a species of sarcocele in a black man, in the Island of Senegal; with an account of its being an endemial disease in the country of Galam. - - -	*Schotte.*	LXXIII.	85
Gall bladder. Experiments to prove that fluids pass directly from the stomach to the circulation of the blood, and from thence into the gall bladder, &c. without passing through the thoracic duct. - - -	*Home.*	CI.	163
Galls. Experiments on the infusions of them.	*Davy.*	XCIII.	239
A species of galls called oong poey, used by the Chinese in dying black. -	*Brande.*	CVII.	39
Galvanism. Combinations formed by metallic plates and fluids. - -	*H. Davy.*	XCI.	397
On its effects in restoring the action of the lungs. - - -	*Home.*	CVII.	22
Ganges. An account of the Ganges and Burrampooter. - - -	*Rennell.*	LXXI.	87
Gas. On its probable agency in earthquakes.	*Gray.*	LXXXVI.	380
On the nature of that produced by passing electric discharges through water.	*Pearson.*	LXXXVII.	142
On carbonated hydrogenous gas.	*Henry.*	——	401
Its effects on spontaneous light. -	*Hulme.*	XCI.	407
On the quantity absorbed by water.	*Henry.*	XCIII	29
Appendix to ditto - -	*Henry.*	—	274
Of the application of gas from coal to economical purposes. - -	*Murdoch.*	XCVIII.	194
Of an apparatus for the analysis of gases, and experiments on the gas from coal.	*Henry.*	——	282

		Vol.	Page.
Gas.	On analyzing ammonia by combustion with gas.	*Henry.* XCIX.	430
	On the combinations of oxymuriatic gas.	*H. Davy.* CI.	1
	Appendix to the above.	*H. Davy.* ——	155
	On a compound of oxide and chlorine.	*H. Davy.* CII.	144
	On a violet coloured gas.	*H. Davy.* CIV.	74
	On the gases produced from the action of acids on the salts called hyper-oxymuriate.	*H. Davy.* CV.	214
	On the combustion of gaseous mixtures.	*H. Davy.* CVII.	77
	On those produced by the distillation of pit-coal and oil.	*Brande.* CX.	11
Generation.	Of an extraordinary production of human generation.	*Clarke.* LXXXIII.	154
	On the mode of generation of the kangaroo.	*Home.* LXXXV.	221
	On the organs of generation of the drake.	*Home.* XCII.	361
	On the female organs of the wombat.	*Home.* XCVIII.	304
	On the generation of the lamprey and myxine.	*Home.* CV.	265
Gentoo.	Of a monster of the human species.	*Reichel.* LXXIX.	157
Geography.*	On that of the North-eastern part of Asia, and whether Asia and America are contiguous.	*Burney.* CVIII.	9
Geometry.*	General theorems, chiefly porisms, in the higher geometry.	*Brougham.* LXXXVIII.	378
Georgium sidus.	Its first discovery.	*Herschel.* LXXIII.	1
	On its diameter and magnitude.	*Herschel.* ——	4
	On this planet and its satellites.	*Herschel.* LXXVIII.	364
	(Satellites) On the discovery of two satellites.	*Herschel.* LXXVII.	125
	On the planet and its satellites.	*Herschel.* LXXVIII.	364

	Vol.	Page.
GEORGIUM SIDUS. (Satellites) On the discovery of four other satellites, and their appearances. *Herschel.*	LXXXVIII.	47
A series of observations on them, and an account of the apparatus used. *Herschel.*	CV.	293
GIANT'S CAUSEWAY.* On the quality of the granite. *Beddoes.*	LXXXI.	51
GIZZARDS.* On those of grazing birds. *Home.*	C.	184
Of the solvent glands and gizzards of sundry birds from New South Wales. *Home.*	CIII.	77
GLACIERS. Of a curious phenomenon on the glaciers of Chamouny. - *Count Rumford.*	XCIV.	23
GLANDS.* Of a small lobe of the human prostate gland. - - - *Home.*	XCVI.	195
On the structures of the solvent glands in the digestive organs of birds. - *Home.*	CII.	394
On the solvent glands of several birds from New South Wales. - - *Home.*	CIII.	77
On the coagulating power of the secretion of the gastric glands. - - *Home.*	—	96
Of the colouring matter of the black bronchial glands. - - - *Pearson.*	—	159
Of the glands that secrete the mucus of which the nests of the Java swallows are composed. *Home.*	CVII.	332
On the gastric glands of the human stomach. *Home.*	—	347
GLASS.* (Electricity) On the manner in which glass is charged with the electric fluid, and discharged. - - - *Gray.*	LXXVIII.	121
Its decomposition by electricity. *H. Davy.*	XCVII.	17
(Optics) On the properties impressed upon light by the action of glass at different temperatures. - - - *Brewster.*	CIV.	436

		Vol.	Page.
Glass.*	(Optics) On the optical properties of heated glass and unannealed glass drops. *Brewster.*	CV.	1
	On new properties of heat exhibited in its propagation along plates of glass. *Brewster.*	CVI.	46
	On the communication of the structure of doubly refracting crystals to glass. *Brewster.*	—	156
	(Rods) Remarks on them during the trigonometrical survey. - - *Brewster.*	LXXXV.	417
Glossopora.	On the hirudo complanata and stagnalis, now formed into a distinct genus under this name. - - *Johnson.*	CVII.	339
Glow-worms.*	Experiments on their luminous matter. - - *M^c Cartney.*	C.	283
Glucine.	Experiments made to decompose it. *H. Davy.*	XCVIII.	353
Gold.*	Experiments on mixing gold with tin. *Alchorne.*	LXXIV.	463
	On the discovery of native gold in Ireland. *Lloyd.*	LXXXVI.	34
	On the same discovery. - - *Mills.*	——	38
	On the action of nitre upon gold and platina. *Tennant.*	LXXXVII.	219
	Report to the Privy Council on the state of the coin, and the constitution of the Mint. *Hatchett.*	XCIII.	43
Goniometry.*	Description of a reflective goniometer. *Dr. Wollaston.*	XCIX.	253
Gout.*	On gouty and urinary concretions. *Dr. Wollaston.*	LXXXVII.	386
	On the beneficial effects of many medicines, and particularly the colchicum autumnale. *Home.*	CVI.	257
	Appendix to the above. - *Home.*	—	262
	Farther observations on the above. *Home.*	CVII.	262

		Vol.	Page.
GRADUATION. On that of astronomical instruments.	*Smeaton.*	LXXVI.	1
See *Dividing*.			
GRAFT.* On the grafting of trees.	*T. A. Knight.*	LXXXV.	290
GRAVITY.* On the specific gravities of various saline substances.	*Kirwan.*	LXXI.	7
On that of gunpowder.	*Thompson.*	—	323
On the specific gravities of various saline substances.	*Kirwan.*	LXXII.	179
On specific gravities at different degrees of heat.	*Kirwan.*	LXXV.	267
An instrument for ascertaining the specific gravities of fluids.	*Schmiesser.*	LXXXIII.	164
On the specific gravity of gold.	*Hatchett.*	XCIII.	43
On the influence of gravitation on the growth of plants.	*T. A. Knight.*	XCVI.	100
On the specific gravity of the rocks of Schehallien.	*Playfair.*	CI.	347
On the specific gravity of sea waters in different parts of the ocean.	*Marcet.*	CIX.	161
GRAZING BIRDS. On their gizzards.	*Home.*	C.	184
GREENWICH.* On the latitude and longitude of the Observatory.	*Maskelyne.*	LXXVII.	151
On the mode proposed for determining the relative situation of the Observatories of Greenwich and Paris.	*Roy.*	——	188
GRINDSTONE. Method of making them with lac and corundum.	*Hatchett.*	XCIV.	215
GUADALOUPE. On a fossil human skeleton found there.	*König.*	CIV.	107
GUAIACUM. Chemical experiments upon it.	*Brande.*	XCVI.	89
GUINEA PIGS. Effects of woorara on them.	*Brodie.*	CI.	194

	Vol.	Page.
GULPH STREAM. On the heat of the water there. *Blagden.*	LXXI.	334
GUM LAC.* Natural history of the insect which produces it. - - - *Kerr.*	LXXI.	374
GUNPOWDER.* Experiments upon it, with a method of determining the velocities of military projectiles, and an accurate eprouvette described. *Count Rumford.*	LXXI.	229
On the force of fired gunpowder. *Count Rumford.*	LXXXVII.	222

H

		Vol.	Page.
Haddocks. On a remarkable failure of them on the coasts of Northumberland, Durham, and Yorkshire.	*Abbs.*	LXXXII.	367
Hafodunos. Of an earthquake near Denbigh.	*Lloyd.*	LXXI.	331
Halo.* Description of a set of halo's and parhelia seen in North America in 1771.	*Barter.*	LXXVII.	44
Hanby. On the appearance of the soil on opening a well there.	*Englefield.*	LXXI.	345
Hare. On its stomach.	*Home.*	XCVII.	146
Harmattan. An account of that singular African wind.	*Dobson.*	LXXI.	46
Harrogate. On the sulphur wells there.	*Bp. of Landaff.*	LXXVI.	171
Harwich.* Of the king's well there.	*Page.*	LXXIV.	6
Hastings. On a singular instance of atmospherical refraction seen there.	*Latham.*	LXXXVIII.	357
Hawk. On its stomach.	*Home.*	XCVII.	159
Head.* An account of a child with a double head.	*Home.*	LXXX.	296
Hearing.* Of the organ of hearing in fish.	*Hunter.*	LXXII.	379
Of some peculiarities in the organ of hearing in the balæna mysticetus Linnæi.	*Home.*	CII.	83
Of the organs of hearing of the dugong.	*Home.*	CX.	144
Heart.* On the foramina thebesii of the heart.	*Abernethy.*	LXXXVIII.	103
Of a very unusual formation of the human heart.	*Wilson.*	——	346

		Vol.	Page
HEART.* Of malformation in the heart of an infant.	*Standert.*	XCV.	228
On the functions of the heart and arteries.	*Young.*	XCIX.	1
Of the dissection of a human fœtus, in which the circulation of the blood was carried on without a heart.	*Brodie.*	——	161
On the influence of the brain on the action of the heart.	*Brodie.*	CI.	36
On the relation between the heart and the nervous system.	*Philip.*	CV.	65
On the influence of the spinal marrow on the action of the heart in fishes.	*Clift.*	—	91
HEAT.* (Philosophy) On the heat of the water in the Gulph Stream.	*Blagden.*	LXXI.	334
An attempt to make a thermometer for the higher degrees of heat.	*Wedgwood.*	LXXII.	305
Experiments upon heat.	*Count Rumford.*	LXXVI.	273
An experiment on heat.	*Fordyce.*	LXXVII.	310
Experiments upon heat.	*Count Rumford.*	LXXXII.	48
On the source of heat excited by friction.	*Count Rumford.*	LXXXVIII.	80
On the weight ascribed to heat.	*Count Rumford.*	LXXXIX.	179
On the heat of prismatic colours.	*Herschel.*	XC.	255
On the heat of the solar and terrestrial rays, and a view of the laws of light and heat.	*Herschel.*	—	293
On heat, and on the action of bodies which intercept it.	*Prevost.*	XCII.	403
On the nature of heat, and the mode of its communication.	*Count Rumford.*	XCIV.	77
On the generation of animal heat.	*Brodie.*	CI.	37
On the influence of the brain on the generation of animal heat.	*Brodie.*	CII.	378

		Vol.	Page.
HEAT.* Experiments on animal heat.	*J. Davy.*	CIV.	50
(Meteorology) On the variation of local heat.	*Six.*	LXXIV.	428
The mean heat in London from 1763 to 1772.	*Heberden.*	LXXVIII.	66
Experiments on local heat.	*Six.*	——	103
HEAVENS.* On the construction of the heavens.	*Herschel.*	LXXIV.	437
On the same subject.	*Herschel.*	LXXV.	213
On the time necessary to sweep them.	*Herschel.*	XC.	84
Remarks on their construction	*Herschel.*	XCII.	477
On the construction of the heavens, tending to throw some light upon the organization of the celestial bodies.	*Herschel.*	CI.	269
On the sidereal part of the heavens, and its connection with the nebulous.	*Herschel.*	CIV.	248
HELIX IANTHINA. Deposits its ova upon its own shell.	*Home.*	CVII.	299
HEMISPHERE. Of the penetration of a hemisphere by an indefinite number of equal and similar cylinders.	*T. Knight.*	CII.	310
HEMP SEED.* Experiments with Chinese hemp seed.	*Fitzgerald.*	LXXII.	46
HEPBURN COLLIERY. Six specimens of fire-damp, collected from that mine, analyzed.	*H. Davy.*	CVI.	5
HERCULIS 55TH. On the disappearance of that star.	*Herschel.*	LXXXII.	26
On the periodical star α Herculis	*Herschel.*	LXXXVI.	452
On the motion of ζ Herculis.	*Herschel.*	XCIII.	378
HERLAND. On the discovery of silver in the Herland copper mine.	*Hitchins.*	XCI.	159
HERMAPHRODITE.* On a particular dog, and on hermaphrodites in general.	*Home.*	LXXXIX.	157

		Vol.	Page.
Herodotus. His account of the solar eclipse referred to.	*F. Baily.*	CI.	220
Herrings. Experiments on their light.	*Hulme.*	XC.	163
Hibernation. Remarks on that of animals.	*Carlisle.*	XCV.	17
Hindoos. On their chronology.	*Marsden.*	LXXX.	560
Correction of an error in a paper on their chronology.	*Marsden.*	LXXXII.	195
On their civil year, and an account of three Hindoo almanacs.	*Cavendish.*	——	383
Hippopotamus. Some organic remains found near Brentford.	*Trimmer.*	CIII.	135
On the structure of its stomach.	*Home.*	XCVII.	166
Hog. On the structure of its stomach.	*Home.*	XCVII.	153
Hornblende. Remarks on.	*De Bournon.*	XCII.	295
Hottentots. Remarks on some of their customs.	*Count Rumford.*	XCIV.	132
Hounslow. Of the measurement of a base on the Heath.	*Roy.*	LXXV.	385
Huddersfield. On some very singular balls of stone found in the works of the Huddersfield canal.	*Outram.*	LXXXVI.	350
Hudson's bay.* Experiments on freezing mixtures.	*Cavendish.*	LXXVI.	241
On freezing nitrous and vitriolic acid.	*Cavendish.*	LXXVIII.	166
Huelbovs. On the compound sulphuret, and of its crystals.	*Smithson.*	XCVIII.	55
Hyacinths. Found among crude platina.	*Dr. Wollaston.*	XCV.	318
Hydatids.* Remarks on them.	*Home.*	LXXXV.	204
Hydraulics.* Investigations subservient to a lecture on the motion of the blood.	*Young.*	XCVIII.	164

	Vol.	Page
Hygrometer.* On hygrometry. -	*De Luc.* LXXXI.	1
Appendix to the above. -	*De Luc.* ——	389
Hyperbola.* Of the rectification of the hyperbola.	*Hellins.* XCII.	448
On ditto, by means of two ellipses,	*Hellins.* CI.	110

I

JAC ICE

		Vol.	Page.
JACKALL. Observations tending to show that the wolf, jackall, and dog, are all of the same species. - - -	*Hunter.*	LXXVII.	253
A supplement to the same subject.	*Hunter.*	LXXIX.	160
JAMAICA.* Some observations on the heat of wells and springs in the Island of Jamaica, and on the temperature of the earth below the surface in different climates. - -	*Hunter.*	LXXVIII.	53
On the permanency of the variation of the compass at Jamaica. - -	*Robertson.*	XCVI.	348
JAMES'S POWDER. Experiments to investigate its composition. - - -	*Pearson.*	LXXXI.	317
Experiments upon it, with a method of preparing, in a humid way, a similar substance.	*Chenevix.*	XCI.	375
JAVA SWALLOW. Some account of their nests, and of the glands that secrete the mucus of which they are composed. - -	*Home.*	CVII.	332
JAW.* Account of a case of a locked jaw.	*Home.*	XCI.	21
Tradition respecting those of the first man.	*Home.*	—	324
IBIS. Some account of the Egyptian ibis.	*Pearson.*	XCV.	264
ICE.* Of the method of making ice at Benares.	*Williams.*	LXXXIII.	56
Further observations on the same subject.	*Williams.*	——	129
On ice found in the bottoms of rivers.	*T. A. Knight.*	CVI.	286
ICELAND.* Experiments with Iceland crystal.	*Brougham.*	LXXXVII.	378

		Vol.	Page.
ICELAND.* On the oblique refraction of Iceland crystal.	*Dr. Wollaston.*	XCII.	381
JELLY.* On the nature of star-shot jelly.	*Home.*	C.	212
On the chemical nature of that surrounding the ova of frogs and fishes.	*Home.*	—	217
IMAGES. On double images caused by atmospherical refraction.	*Dr. Wollaston.*	XC.	239
On the effects of simple pressure in producing that crystallization which forms two oppositely polarised images.	*Brewster.*	CV.	60
On the multiplication of images.	*Brewster.*	—	270
IMMERSION. Experiments on the influence of it in water.	*Currie.*	LXXXII.	199
IMPREGNATION.* Concerning animal impregnation.	*Haighton.*	LXXXVII.	159
On that of rabbits, and its effects.	*Cruikshank.*	——	197
INDIANS. Relative to the nature and customs of those of North America.	*M'Causland.*	LXXVI.	229
INDIGO.* It yields a tanning substance by the action of nitric acid.	*Hatchett.*	XCV.	294
INFLAMMATION.* Account of a spontaneous inflammation.	*Humfries.*	LXXXIV.	426
INFLUENCE. On the comparative influence of male and female parents on their offspring.	*T. A. Knight.*	XCIX.	392
INK. On ancient inks, with a method for recovering the legibility of decayed writings.	*Blagden.*	LXXVII.	451
Method of making ink of lac.	*Hatchett.*	XCIV.	191
INSECT.* Natural history of the insect which produces the gum lacca.	*Kerr.*	LXXI.	374
INSTINCTS. On the supposed hereditary ones of animals.	*T. A. Knight.*	XCVII.	240

		Vol.	Page.
Instruments.* (Mathematical) Description of a micrometer for taking the angle of position.	*Herschel.*	LXXI.	500
A new construction of eye-glasses for such telescopes as may be applied to mathematical instruments.	*Ramsden.*	LXXIII.	94
Of three simple instruments for drawing architecture and machinery in perspective.	*Peacock.*	LXXV.	366
On the graduation of astronomical instruments, with Mr. Hindley's method of dividing circles into any given number of parts.	*Smeaton.*	LXXVI.	1
Of a new electrical instrument capable of collecting a diffused or little quantity of electricity.	*Cavallo.*	LXXVIII.	255
Of an instrument producing two states of electricity, without friction or communication with the earth.	*Nicholson.*	——	403
Experiments with the doubler of electricity, with a view to determine its utility.	*Read.*	LXXXIV.	266
Of a method of dividing instruments by ocular inspection, in which no error can occur but what is chargeable to vision.	*Troughton.*	XCIX.	105
Of an improvement in the manner of dividing astronomical instruments.	*Cavendish.*	—	221
A method of examining the divisions of astronomical instruments.	*Lax.*	—	232
Of a reflective goniometer.	*Dr. Wollaston.*	—	253
On a periscopic camera obscura and microscope.	*Dr. Wollaston.*	CII.	370
Of a single lens micrometer.	*Dr. Wollaston.*	CIII.	119
An improved method of dividing astronomical circles, and other instruments.	*Kater.*	CIV.	419

		Vol.	Page.
INSTRUMENTS.* (Mathematical) A new instrument for performing mechanically the involution and evolution of numbers.	*Roget.*	CV.	9
(Musical) Of the temperature of those in which the tones, keys or frets, are fixed, as in the harpsichord, &c.	*Cavallo.*	LXXVIII.	238
INTERVERTEBRAL. On the nature of the intervertebral substance in fish and quadrupeds.	*Home.*	XCIX.	177
INTESTINES.* On a remarkable transposition of the viscera.	*Baillie.*	LXXVIII.	350
Two instances of uncommon formation in the viscera of the human body.	*Abernethy.*	LXXXIII.	59
Of an appendix to the small intestines of birds.	*M'Cartney.*	CI.	257
On the formation of fat in the intestines of living animals.	*Home.*	CIII.	146
INTRO-SUSCEPTION. Dissection of an extraordinary intro-susception.	*Lettsom.*	LXXVI.	305
INVESTIGATION. On the independence of the analytical and geometrical methods of investigation, and the advantages to be derived from their separation.	*Woodhouse.*	XCII.	85
INVESTIGATOR. Concerning the differences in the magnetic needle on board the Investigator, from an alteration in the direction of the ship's head.	*Flinders.*	XCV.	186
IODINE. On a new substance thus called.	*H. Davy.*	CIV.	74
Farther experiments on it.	*H. Davy.*	—	487
On a solid compound of iodine and oxygene.	*H. Davy.*	CV.	203
JORDAN. An analysis of the waters of the Dead Sea and the river Jordan.	*Marcet.*	XCVII.	296
IRIDIUM. Ore of it mixed with crude platina.	*Dr. Wollaston.*	XCV.	317
IRIS, LUNAR. Account of several.	*Tunstall.*	LXXIII.	100

		Vol.	Page.
Iron. Of some scoria from iron works resembling the vitrified filaments described by Sir Wm. Hamilton.	*More.*	LXXII.	50
Of a mass of native iron found in South America.	*De Celis.*	LXXVIII.	37
Of some appearances attending the conversion of cast into malleable iron.	*Beddoes.*	LXXXI.	173
Further observations on the same subject.	*Beddoes.*	LXXXII.	257
Remarks on the properties and composition of the different states of iron.	*Pearson.*	LXXXV.	322
Of the arseniates of copper and of iron from the County of Cornwall.	*De Bournon.*	XCI.	169
Analysis of the arseniates described above.	*Chenevix.*	—	193
On various kinds of native iron.	*Howard.*	XCII.	168
On a lump of native iron said to have fallen in India.	*Greville.*	XCIII.	200
On a new species of oxide of iron.	*De Bournon.*	XCIII.	325
On some of the sulphurets of iron.	*Hatchett.*	XCIV.	315
On the magnetic attraction of oxides of iron.	*Lane.*	XCV.	281
On the sulphate of iron.	*Pepys.*	XCVII.	249
On its combination with chlorine.	*J. Davy.*	CII.	181
On the discovery of a mass of native iron in Brazil.	*Mornay.*	CVI.	270
Experiments on the above mass.	*Dr. Wollaston.*	—	281
(Filings) Experiments on their magnetism.	*Bennet.*	LXXXII.	92
(Spar) On its primitive crystal.	*Dr. Wollaston.*	CII.	161
Ischia. Account of a column of boiling water in the sea.	*Sir Wm. Hamilton.*	LXXVI.	370

	Vol.	Page.
IVORY.* The temperature of water has a sensible effect upon its expansion. - *De Luc.*	LXXXI.	15
JUPITER.* Sundry observations made with a view to determine whether the earth's diurnal motion is perfectly equable. - - *Herschel.*	LXXI.	121
His occultation by the moon. *Schroeter.*	LXXXII.	355
(Satellites) Observations of their brightness, variation, motions, and comparative size. *Herschel.*	LXXXVII.	332
Eclipses of them at Madras. *Goldingham.*	XCVIII.	322

K

		Vol.	Page.
Kanguroo. On the mode of generation of the kanguroo, with a description of the organs themselves.	*Home.*	LXXXV.	221
Observations on its stomach.	*Home.*	XCVII.	151
On its digestive functions.	*Home.*	——	165
Description of its ova.	*Home.*	CIX.	235
Kilburn wells. Description of them, and analysis of their water.	*Schmeisser.*	LXXXII.	115
Kite. On an electrical kite.	*Nicholson.*	LXXIX.	275
Knife edges. Of the apparatus and measures employed for the measurement of the distance between the knife edges of his pendulum, and for the comparison of the British standard measures of the highest authority.	*Kater.*	CVIII.	49

L

LAC LAT

		Vol.	Page.
LAC, WHITE. On a wax-like substance resembling the pé la of the Chinese, called at Madras—white lac.	*Pearson.*	LXXXIV.	383
Analytical experiments on lac.	*Hatchett.*	XCIV.	191
LACTEALS.* Whence they receive their fluids.	*Carlisle.*	XCV.	8
LAMB.* Account of a monstrous lamb.	*Carlisle.*	XCI.	139
LAMPREY. On the mode of generation of the lamprey and myxine.	*Home.*	CV.	265
LAMPYRIDES. Their organization for the production of light.	*M'Cartney.*	C.	275
LANGUARD FORT. Of the king's wells there.	*Page.*	LXXIV.	6
LANTERN. Descriptions of those used in coal mines.	*H. Davy.*	CVI.	12, 22
LATITUDE.* A method of finding the latitude of a place, by means of two altitudes of the sun, and the time elapsed betwixt the observations.	*Lax.*	LXXXIX.	74
Demonstration of the late Dr. Maskelyne's formulæ for finding the latitude and longitude of a celestial object from its right ascension and declination, and *vice versa*.	*Robertson.*	CVI.	138
(Of places*) That of York, determined from a variety of astronomical observations.	*Pigott.*	LXXVI.	409
On that of the Royal Observatory at Greenwich.	*Maskelyne.*	LXXVII.	151
On that of some remarkable places near the Severn.	*Pigott.*	LXXX.	385

		Vol.	Page.
Latitude.* (Of places*) On that of several places in Denmark.	*Bugge.*	LXXXIV.	43
That of Greenwich.	*quoted from Pond.*	CIX.	389
Lavender. Called nardus Italica by the Romans.	*Blane.*	LXXX.	288
Leach.* Has no anus.	*Hunter.*	LXXV.	341
Its respiratory organs described.	*Home.*	CV.	259
On the hirudo vulgaris.	*Johnson.*	CVII.	13
On the hirudo complanata and stagnalis now formed into a distinct genus, under the name glossopora.	*Johnson.*	CVII.	339
Lead.* Of the Carinthian molybdate of lead.	*Hatchett.*	LXXXVI.	285
On a triple sulphuret of lead, antimony, and copper.	*De Bournon.*	XCIV.	30
Analysis of the above.	*Hatchett.*	—	63
On a native arseniate of lead.	*Gregor.*	XCIX.	195
Leaves.* Contain three kinds of vessels.	*T. A. Knight.*	XCV.	100
On the action of detached leaves of plants.	*T. A. Knight.*	CVI.	289
Leonis. On the motion of γ Leonis.	*Herschel.*	XCIII.	366
Lever.* On its fundamental property, with a proof of the principle assumed by Archimedes.	*Vince.*	LXXXIV.	33
Libavius. Experiments on the liquor.	*H. Davy.*	XCIX.	93
Life.* Table of the chance of life, from infancy to 26 years of age.	*Bland.*	LXXI.	369
Light.* On the light of bodies in a state of combustion..	*Morgan.*	LXXV.	190
On the production of light by heat and by attrition.	*T. Wedgwood.*	LXXXII.	28
Appendix to the above.	*T. Wedgwood.*	——	270

		Vol.	Page.
Light.* On a method of measuring the comparative intensities of light. -	*Count Rumford.*	LXXXIV.	67
On the inflection, reflection, and colours of light.	*H. Brougham.*	LXXXVI.	227
On the affections and properties of light.	*H. Brougham.*	LXXXVII.	352
On the reflexibility of its rays. -	*Prevost.*	LXXXVIII.	311
On the chemical properties that have been attributed to light. -	*Count Rumford.*	——	449
Inquiries concerning sound and light.	*T. Young.*	XC.	106
On the spontaneous emission of light.	*Hulme.*	—	161
A comparative view of the laws to which the rays which occasion light and heat are subject.	*Herschel.*	—	293
On the variable emission of light and heat by the sun. - - -	*Herschel.*	—	265
Additional observations on the same subject.	*Herschel.*	—	354
Continuation of the above. -	*Herschel.*	XCI.	403
On some properties of light. -	*Brewster.*	CIII.	101
On lighting coal mines without explosion.	*Clanny.*	—	200
On the maximum of its aberration.	*Brinkley.*	CIX.	241
On the action of crystalline bodies on homogeneous light. -	*J. F. W. Herschel.*	CX.	45
(Meteor*) Of a luminous appearance in the heavens. - - -	*Cavallo.*	LXXI.	329
(Optics*) On the ocular spectra of light and colours. - - -	*Darwin.*	LXXVI.	313
On a difficulty in the theory of vision, depending on the refrangibility of light.	*Maskelyne.*	LXXIX.	256
On the refrangibility of light. -	*Prevost.*	LXXXVIII.	311
On the theory of light and colours.	*Young.*	XCII.	12

		Vol.	Page.
Light.* (Optics*) On the light of the Cassegrainian and Gregorian telescopes. -	*Kater.*	CIII.	206
On the affections of light transmitted through crystallized bodies. -	*Brewster.*	CIV.	187
On the polarization of light. -	*Brewster.*	—	219
Farther experiments on the Cassegrainian and Gregorian telescopes. -	*Kater.*	—	231
On new properties of light by mother of pearl and other bodies. -	*Brewster.*	—	397
On the properties of light by the action of glass of different temperatures. -	*Brewster.*	—	436
On the depolarization of light.	*Brewster.*	CV.	29
On the effects of pressure in the formation of light and colours. -	*Brewster.*	—	60
On the polarization of light by reflection.	*Brewster.*	—	125
On the structure of the crystalline lens in fishes and quadrupeds, as ascertained by its action on polarized light. - -	*Brewster.*	CVI.	311
On the absorption of polarized light.	*Brewster.*	CIX.	11
On the action of crystallized surfaces upon light.	*Brewster.*	—	145
(Lightning*) Of a violent storm at East Bourne in 1780. - - -	*Brereton.*	LXXI.	42
Proceedings on the accident at Heckingham in 1781. -	*Royal Society.*	LXXII.	355
An account of wire being shortened by it.	*Nairne.*	LXXIII.	223
Some extraordinary effects of it in 1789.	*Withering.*	LXXX.	293
Lime.* On different sorts of lime used in agriculture.	*Tennant.*	LXXXIX.	305
On a new species of hard carbonate of lime.	*De Bournon.*	XCIII.	325

		Vol.	Page.
LIME.* On the primitive crystals of carbonate of lime.	*Dr. Wollaston.*	CII.	159
LINEAS CURVAS. Methodus inveniendi lineas curvas.	*Landerbeck.*	LXXIII.	456
Continuation of the above.	*Landerbeck.*	LXXIV.	477
LIQUOR.* On the state in which spirit exists in fermented liquors.	*Brande.*	CI.	337
Continuation of the above.	*Brande.*	CIII.	82
LOBSTERS.* How affected by ballast being cast into the sea.	*Abbs.*	LXXXII.	368
LOGARITHMS.* An advantageous method of arranging the differences of logarithms.	*Nicholson.*	LXXVII.	246
Mr. Jones's computation of the hyperbolic logarithm of 10, with an improvement of Mr. Emerson's computation.	*Hellins.*	LXXXVI.	135
New method of computing logarithms.	*Manning.*	XCVI.	327
On logarithmic transcendents.	*Herschel.*	CIV.	449
On the construction of logarithmic tables.	*T. Knight.*	CVII.	217
LONDON.* Of the influence of cold upon the health of the inhabitants of London.	*Heberden, jun.*	LXXXVI.	279
LONGITUDE.* On the errors in longitude at sea, from the action of the iron in the ships upon the chronometers.	*Fisher.*	CX.	196
(Of places) Of Cambridge, in New England.	*Willard.*	LXXI.	502
Of York, with a method recommended for determining the longitude of places, by observation of the moon's transit over the meridian.	*Pigott.*	LXXVI.	409
Of the Royal Observatory.	*Maskelyne.*	LXXVII.	151
Of some places near the Severn.	*Pigott.*	LXXX.	385
Of Dunkirk and Paris.	*Dalby.*	LXXXI.	236
Of several places in Denmark.	*Bugge.*	LXXXIV.	43

		Vol.	Page.
Luminous. Observations upon luminous animals.	*Macartney.*	C.	258
Lungs.* Of the black spots of the lungs.	*Pearson.*	CIII.	157
On the effects of galvanism in restoring the due action of the lungs.	*Philip.*	CVII.	22
On their elasticity.	*Carson.*	CX.	29
Lymph.* Analysis of it.	*Brande.*	CII.	96
Lynx. On its stomach.	*Home.*	XCVII.	157

M

		Vol.	Page.
Magnesia. Experiments on the composition of the muriate of magnesia.	*Marcet.*	XCVII.	300
Its composition.	*H. Davy.*	C.	63
On its effects in the prevention of uric acid.	*Brande.*	—	136
Additional observations on the same subject.	*Brande.*	CIII.	213
On the manufacture of the sulphate near Genoa.	*Holland.*	CVI.	294
Magnet.* A new suspension of the magnetic needle; also an air vane of great sensibility, and experiments on iron filings and brass.	*Bennet.*	LXXXII.	81
On the attraction of oxides of iron.	*Lane.*	XCV.	281
(Declination of*) On the variation and on the dip of the needle, at the apartments of the Royal Society, from 1786 to 1805.	*Gilpin.*	XCVI.	385
On the dip of the needle during the voyage in search of a N. W. passage in 1818.	*Sabine.*	CIX.	132
(Experiments on*) Magnetical experiments.	*Cavallo.*	LXXVI.	62
Further experiments.	*Cavallo.*	LXXVII.	6
(Variation of*) Of the diurnal variation in the Island of Sumatra.	*Macdonald.*	LXXXVI.	340
On that in St. Helena, and continuation of the above.	*Macdonald.*	LXXXVIII.	397
The differences observed on board the Investigator from an alteration in the direction of the ship's head.	*Flinders.*	XCV.	186

		Vol.	Page.
MAGNET.* (Variation of*) On the permanency of the variation at Jamaica. -	*Robertson.*	XCVI.	348
On the variation at the apartments of the Royal society, from 1786 to 1805 inclusive.	*Gilpin.*	—	385
On the anomaly in the variation, as observed on ship-board. - -	*Scoresby.*	CIX.	96
On the irregularities observed during the voyage of discovery in Davis' Straights, in 1818.	*Sabine.*	—	112
On the dip and variation during that voyage.	*Sabine.*	—	132
MAGNIFYING POWERS. On obviating some doubts concerning the great powers used.	*Herschel.*	LXXII.	173
MAHOMETANS. On the era called the Hejera.	*Marsden.*	LXXVIII.	414
MAMMALIA. On their digestive functions.	*Home.*	XCVII.	99
MANGANESE. Its effects on gold. -	*Hatchett.*	XCIII.	62
MANUSCRIPTS.* Catalogue of the Sanscrita, presented by Sir William and Lady Jones.	*Wilkins.*	LXXXVIII.	582
Catalogue of the Oriental ditto.	*Wilkins.*	LXXXIX.	335
MARINE ANIMALS. Description of a new one.	*Home.*	LXXV.	333
MARS.* (Observations on) in 1777.	*Herschel.*	LXXI.	127
in 1779.	*Herschel.*	—	128
On its remarkable appearance in the Polar regions. - - -	*Herschel.*	LXXIV.	233
On Venus and Mars, with a view to determine their heliocentric longitude, motion, and orbits. - - -	*Bugge.*	LXXX.	21
On computing the perturbations of its motion.	*Hellins.*	LXXXVIII.	527
MASTICATION. How that of ruminating animals is performed - - -	*Home.*	XCVI.	371

		Vol.	Page.
Measurement. Observations on the measurement, in England, of three degrees of the meridian.	*Mendoza y Rios.*	CII.	321
Of the results deduced from the measurement made in the East Indies of an arc of the meridian.	*Lambton.*	CVIII.	486
Measures. Tables for reducing the quantities, by weight, in any mixture of pure spirit and water, and for determining the proportion, by measure, of each of the two substances in such mixtures.	*Gilpin.*	LXXXIV.	275
An account of some endeavours to ascertain a standard of weight and measure.	*Evelyn.*	LXXXVIII.	133
Mécanique céleste. On the grounds of the method given by Laplace for computing the attractions of spheroids.	*Ivory.*	CII.	1
Mechanics.* On a new method of applying the screw.	*Hunter.*	LXXI.	58
Upon the collision of bodies.	*Smeaton.*	LXXII.	337
Medicago falcata. On the organs of generation in this plant.	*Smith.*	LXXVIII.	162
Medulla. That of plants conveys no sap.	*T. A. Knight.*	XCVI.	295
Effects of injury to the medulla spinalis.	*Home.*	CIV.	485
Upon the extent of the expansion and contraction of timber in different directions, relative to the position of the medulla of the tree.	*T. A. Knight.*	CVII.	269
Membrane.* On the component parts of it.	*Hatchett.*	XC.	327
Menstruum.* An account of a new compound acid menstruum.	*Keir.*	LXXX.	359
Mercury. (Metal) Experiments on its expansion.	*Cavallo.*	LXXI.	309
On a new fulminating mercury.	*Howard.*	XC.	204
On the action of platina and mercury on each other.	*Chenevix.*	XCV.	104

		Vol.	Page.
Mercury. (Planet) Of its transit over the sun, in 1782.	*Hamilton.*	LXXIII.	453
Of the same, in 1782.	*Wallot.*	LXXIV.	312
Of the same, in 1786, at Louvain.	*Pigott.*	LXXVI.	384
Of the same, in 1786, ditto.	*Pigott.*	——	389
Of the same, in 1786, at Dresden.	*Köhler.*	LXXVII.	47
Of the same, in 1786, at St. Petersburgh.	*Rumovski.*	——	48
Of the right ascension and declination out of the meridian, in Sept. 1786, with an investigation of a method of allowing for refraction in such observations.	*Smeaton.*	——	318
Of its transit over the sun, in 1802, in England.	*Herschel.*	XCIII.	214
Mere of Diss. Its effect on various substances immersed in it.	*Wiseman.*	LXXXVIII.	567
Analysis of its water.	*Hatchett.*	——	572
Metals.* On the dissolution of metals in acids, and their precipitations.	*Keir.*	LXXX.	359
On the cause of the additional weight metals acquire by being calcined.	*Fordyce.*	LXXXII.	374
Of a metal from North America, unknown in 1801.	*Hatchett.*	XCII.	49
Of a new metal under the title of palladium.	*Chenevix.*	XCIII.	290
On two metals found after the solution of platina.	*Tennant.*	XCIV.	411
On a new metal found in crude platina.	*Dr. Wollaston.*	—	419
On the metals obtained from the alkaline earths.	*H. Davy.*	XCVIII.	333
On the combinations of metals and chlorine.	*J. Davy.*	CII.	169
Meteor.* Description of a meteor in August 1783.	*Cavallo.*	LXXIV.	108

		Vol.	Page.
METEOR.* Of two meteors in 1783.	*Aubert.*	LXXIV.	112
Of a meteor in August 1783.	*Cooper.*	—	116
Of the same.	*Edgeworth.*	—	118
Of some fiery meteors in 1783.	*Blagden.*	—	201
Of the meteor in August 1783.	*Pigott.*	—	457
Of the explosion of one near Benares.	*Howard.*	XCII.	175
Of one seen in America.	*Howard.*	—	202
METEOROLOGICAL OBSERVATIONS.* Journals on the coast of Labradore, in 1781.	*De La Trobe.*	LXXI.	197
Of rain in Yorkshire, 1778 to 1781.	*Lloyd.*	LXXII.	71
Journal in Somersetshire, 1782.	*Atkins.*	LXXIV.	58
Ditto at Knightsbridge, 1789.	*Read.*	LXXXI.	185
Ditto continued, 1790.	*Read.*	LXXXII.	225
Abstracts of Thomas Barker's register of the barometer, thermometer and rain, at Lyndon, in Rutland,	in 1780.	LXXI.	351
	in 1781.	LXXII.	281
	in 1782.	LXXIII.	242
	in 1783.	LXXIV.	283
Also of the rain in Surry and Hampshire,	in 1784.	LXXV.	481
	in 1785.	LXXVI.	236
	in 1786.	LXXVII.	368
Also on the annual growth of trees,	in 1787.	LXXVIII.	408
	in 1788.	LXXIX.	162
	in 1789.	LXXXI.	89
	in 1790.	——	278
	in 1791.	LXXXII.	362
	in 1792.	LXXXIII.	220
	in 1793.	LXXXIV.	174

		Vol.	Page.
METEOROLOGICAL OBSERVATIONS.* Abstracts of Thomas Barker's register, &c.; also on the annual growth of trees,	in 1794.	LXXXV.	410
	in 1795.	LXXXVI.	483
	in 1796.	LXXXVIII.	130
Also on the recovery of injured trees,	in 1797.	LXXXIX.	24.
	in 1798.	XC.	46
Journals kept by order of the President and Council,	for 1780.	LXXI.	199
	1781.	LXXII.	285
	1787.	LXXVIII.	191
	1788.	LXXIX.	113
After 1788, the annual journal will be found as an appendix to each volume.			
METRE. On the length of the French mètre. *Kater.*		CVIII.	103
MICA. Remarks on. *De Bournon.*		XCII.	296
MICROMETER.* Of one for taking the angle of position. *Herschel.*		LXXI.	500
Of a lamp-micrometer, and method of using it. *Herschel.*		LXXII.	163
On the dark and lucid disk, and periphery micrometers. *Herschel.*		LXXIII.	4
Observations made by an equatorial micrometer. *Smeaton.*		LXXVII.	318
A simple one for measuring small angles. *Cavallo.*		LXXXI.	283
Of a single lens micrometer. *Dr. Wollaston.*		CIII.	119
On the method of cutting rock crystal for them. *Dr. Wollaston.*		CX.	126
MICROSCOPE.* On a periscopic camera obscura and microscope. *Dr. Wollaston.*		CII.	370
MIDWIFERY. Calculations on parturition. *Bland.*		LXXI.	355
MILKY WAY. On its extent and condition. *Herschel.*		CVII.	302

		Vol.	Page.
Mimosa. On the irritable vegetables mimosa sensitiva and pudica.	*Smith.*	LXXVIII.	161
Mines and Minerals.* Of the minerals of Boutan and Thibet.	*Saunders.*	LXXIX.	79
A mineral substance from New South Wales.	*J. Wedgwood.*	LXXX.	306
A new metal from North America.	*Hatchett.*	XCII.	49
On a mineral from Devonshire consisting of alumine and water.	*H. Davy.*	XCV.	155
Of the mineral bason in several counties of Wales.	*Martin.*	XCVI.	342
On the Relistian tin mine.	*Carne.*	XCVII.	293
On lighting coal mines without explosion.	*Clanny.*	CIII.	200
On the same subject, and on fire-damp.	*H. Davy.*	CVI.	1
Invention for lighting mines and consuming the damp.	*H. Davy.*	—	23
Minium.* A discovery of native minium.	*Smithson.*	XCVI.	267
Appendix to the above.	*Smithson.*	CI.	177
Mirror.* On the causes which prevent the proper action of them.	*Herschel.*	XCIII.	214
Mist. On their formation in particular situations.	*H. Davy.*	CIX.	123
Mofete. On those which follow an eruption of Mount Vesuvius.	*Hamilton.*	LXXXV.	106
Mole. On its stomach.	*Home.*	XCVII.	155
Molybdate. On the Carinthian molybdate of lead.	*Hatchett.*	LXXXVI.	285
Monoculus polyphemus. A microscopic description of its eyes.	*André.*	LXXII.	440
Monsters.* Of a monstrous birth in the East Indies.	*Torlese.*	LXXII.	44
Of a monster in the East Indies.	*Riechel.*	LXXIX.	157

		Vol.	Page.
Monsters.* Of a child with a double head in the East Indies.	*Home.*	LXXX.	296
Appendix to the above.	*Home.*	LXXXIX.	28
Remarks on those which have superfluous parts.	*Home.*	——	174
Of a monstrous lamb from Blandford.	*Carlisle.*	XCI.	139
Of a family with superfluous fingers and toes.	*Carlisle.*	CIV.	94
Moon.* Of three volcanoes there.	*Herschel.*	LXXVII.	229
On the atmosphere of the moon.	*Schroeter.*	LXXXII.	309
On the same subject.	*Schroeter.*	——	337
Remarks on its mountains.	*Schroeter.*	LXXXIV.	263
On a light in the dark part.	*Wilkins.*	——	429
Remarks on the above.	*Maskelyne.*	——	435
(Eclipse*) On that of Sept. 10, 1783.	*Pigott.*	LXXVI.	415
Remarkable phenomena during that of October 22, 1790.	*Herschel.*	LXXXII.	27
(Longitude*) On a method of determining the longitude of places by observations of the moon's transit.	*Pigott.*	LXXVI.	409
Morne Garou. Of that mountain in the Island of St. Vincent, and its volcano.	*Anderson.*	LXXV.	16
Mortality.* On the bills of mortality at York.	*White.*	LXXII.	35
On those of Holy Cross, in Shropshire.	*Gorsuck.*	——	53
On the causes of the excess of males above that of females.	*Clarke.*	LXXVI.	349
Motacilla. Of an English bird of this genus.	*Lightfoot.*	LXXV.	8
Mother of pearl. On its optical phenomena.	*Brewster.*	CIV.	397
Motion.* On the equability of the earth's diurnal motion.	*Herschel.*	LXXI.	115

		Vol.	Page.
MOTION.* On the motion of bodies affected by friction.	*Vince.*	LXXV.	165
Of the rotatory motion of a body about any axis through its centre of gravity.	*Landen.*	——	311
On spherical motion.	*Wildbore.*	LXXX.	496
MOUNTAIN.* Of Morne Garou, in the Island of St. Vincent.	*Anderson.*	LXXV.	16
Conjectures on St. Peter's mountain, near Maestricht.	*Camper.*	LXXVI.	443
On the heights of those in the North of England.	*Greatorex.*	CVIII.	395
MUCUS. Observations on it, and of liquid albumen.	*Brande.*	XCIX.	353
MULTINOMIAL. On the expansion of any functions of multinomials.	*T. Knight.*	CI.	49
MUMMY.* On some Egyptian mummies opened in London.	*Blumenbach.*	LXXXIV.	177
Of two mummies of the Egyptian Ibis.	*Pearson.*	XCV.	264
MURAL. Observations with the mural circle at Greenwich, in 1812.	*Pond.*	CIII.	123
Ditto, in 1813.	*Pond.*	—	304
Ditto, compared with those of Dr. Bradley, in 1756.	*Pond.*	CV.	387
MURIATES. Remarks on oxygenized muriates.	*Chenevix.*	XCII.	134
MUSCLES.* On muscular motion.	*Fordyce.*	LXXVIII.	23
On the conversion of animal muscle into a substance much like spermaceti.	*Gibbes.*	LXXXIV.	169
On the external muscles of the eye.	*Hosack.*	——	207
On muscular motion.	*Home.*	LXXXV.	1
On muscular motion.	*Home.*	LXXXV.	202
On the influence of galvanism on animal muscle.	*Wells.*	——	246
On muscular motion.	*Home.*	LXXXVI.	1

		Vol.	Page.
Muscles.* On the straight muscles and cornea of the eye.	*Home.*	LXXXVII.	1
On the muscles of slow-moving animals.	*Carlisle.*	XCIV.	17
On muscular motion.	*Carlisle.*	XCV.	1
On the action of the muscles of fishes.	*Carlisle.*	XCVI.	1
On the duration of muscular action.	*Dr. Wollaston.*	C.	1
Musical instruments. On the temperament of those in which the tones, keys, or frets, are fixed.	*Cavallo.*	LXXVIII.	238
Myxine. On the mode of generation of the lamprey and myxine.	*Home.*	CV.	265

N

NAP NAT

		Vol.	Page.
NAPLES.* An account of the tide at Naples.	*Blagden.*	LXXXIII.	168
NARDUS INDICA. An account of the nardus Indica, or spikenard.	*Blane.*	LXXX.	284
NARWHALE. On its tusks.	*Home.*	CIII.	126
NATURAL HISTORY.* Of the tyger-cat of the Cape of Good Hope.	*Forster.*	LXXI.	1
An account of the turkey.	*Pennant.*	—	67
Of the termites of Africa and other hot climates.	*Smeathman.*	—	139
Of the insect which produces the gum lacca.	*Kerr.*	—	374
Of the ophidium barbatum Linnæi.	*Broussonet.*	—	436
Of an English bird of the genus motacilla.	*Lightfoot.*	LXXV.	8
Of a marine animal found near Barbadoes in 1784.	*Home.*	—	333
Of a stag's head and horns found at Alport, in Derbyshire.	*Barker.*	—	353
Observations tending to show that the wolf, jackal, and dog, are all of the same species.	*Hunter.*	LXXVII.	253
Of the cuckoo.	*Jenner.*	LXXVIII.	219
Of amphibia, particularly on the means of distinguishing those serpents which are venomous from others.	*Gray.*	LXXIX.	21
Of the vegetable and mineral productions of Boutan and Thibet.	*Saunders.*	——	79

		Vol.	Page.
NATURAL HISTORY.* Supplementary observations on the dog, wolf, and jackal.	*Hunter.*	LXXIX.	160
On bees.	*Hunter.*	LXXXII.	128
Of the double-horned rhinoceros of Sumatra.	*Bell.*	LXXXIII.	3
Of a species of chætodon, called by the Malays ecan bonna.	*Bell.*	——	7
NEBULÆ.* Of a nebula in Coma Berenices.	*Pigott.*	LXXI.	82
Catalogue of 1000 nebulæ and clusters of stars.	*Herschel.*	LXXVI.	457
Catalogue of another 1000, with remarks on the heavens.	*Herschel.*	LXXIX.	212
On nebulous stars.	*Herschel.*	LXXXI.	71
Catalogue of 500 more, with remarks as above.	*Herschel.*	XCII.	477
Of such as have a cometary appearance.	*Herschel.*	CI.	306
Of planetary.	*Herschel.*	—	317
Of stellar	*Herschel.*	—	325
On the sidereal part of the heavens, and its connection with the nebulous.	*Herschel.*	CIV.	248
On the relative distances of clusters of stars.	*Herschel.*	CVIII.	429
NECESSARIES OF LIFE. A table of various articles, from 1050 to 1800.	*Evelyn.*	LXXXVIII.	176
NERVES.* Experiments on their reproduction.	*Cruikshank.*	LXXXV.	177
On the reproduction of nerves.	*Haighton.*	——	190
Upon their structure.	*Home.*	LXXXIX.	1
On their irritability.	*Home.*	XCI.	1
A case in which one was divided.	*Home.*	—	20
On the influence of the eighth pair on the secretions of the stomach.	*Brodie.*	CIV.	102
On their influence upon the action of the arteries.	*Home.*	—	583

		Vol.	Page.
NERVES.* On the relation between the action of the heart and the nervous system. -	*Philip.*	CV.	65
Additional observations on the same subject.	*Philip.*	—	424
NEUTRO-Earthy compounds. Experiments on their decomposition. -	*H. Davy.*	XCVII.	13
-Saline compounds. Experiments on their decomposition. -	*H. Davy.*	——	18
NITRE.* On the phlogistication of the spirit of nitre.	*Priestley.*	LXXIX.	139
On its action upon gold and platina.	*Tennant.*	LXXXVII.	219
NODE.* Determination of the heliocentric longitude of the descending node of Saturn.	*Bugge.*	LXXVII.	37
NUMBERS.* Some properties of their divisors.	*Waring.*	LXXVIII.	388
A new instrument for performing mechanically the involution and evolution of numbers.	*Roget.*	CV.	9

O

		Vol.	Page.
OAK.* On the infusions of its bark.	*H. Davy.*	XCIII.	260
On its internal organization.	*T. A. Knight.*	—	282
On the alburnum of the spring and winter felled oak.	*T. A. Knight.*	CX.	156
OBLIQUITY. Observations made at the Observatory at Dublin, on the obliquity of the ecliptic, and the maximum of the aberration of light.	*Brinkley.*	CIX.	241
OBSERVATORY.* Remarks on a memorial of M. Cassini de Thury, concerning the latitude and longitude of the Observatory at Greenwich.	*Maskelyne.*	LXXVII.	151
An account of the mode proposed for determining the relative situation of the Observatories of Greenwich and Paris.	*Roy.*	——	188
Further particulars respecting that at Benares.	*Williams.*	LXXXIII.	45
OCCULTATION.* Of Jupiter, by the moon.	*Schröeter.*	LXXXII.	355
Of a telescopic star, by the moon.	*Schröeter.*	——	361
OCEAN.* On the temperature of the ocean and atmosphere, and on the density of the sea water, made during a voyage to Ceylon.	*J. Davy.*	CVII.	275
OCYTHÖE. On the genus ocythöe of Rafinesque, with a description of a new species.	*Leach.*	—	293
On the genus ocythöe.	*Say.*	CIX.	107
OIL. On the composition and analysis of the inflammable gaseous compounds of coal and oil.	*Brande.*	CX.	11
OONG POEY. An astringent vegetable from China.	*Brande.*	CVII.	39

		Vol.	Page.
Ophidium. An account of the ophidium barbatum Linnæi. - - -	*Broussonet.*	LXXI.	436
Opium.* Its effect when applied to the brain.	*Philip.*	CV.	74
Opossum.* On the ova of the opossum and ornithorhynchus. - -	*Home.*	CIX.	234
Optics.* Too much has been taken for granted in optics. - -	*Herschel.*	LXXII.	91
On the indistinctness ascribed to the smallness of the optic pencil. -	*Herschel.*	LXXVI.	500
On the refraction of the rays of light.	*Prevost.*	LXXXVIII.	311
Experiments and calculations relative to physical optics. - - -	*Young.*	XCIV.	1
(Glasses) On the superiority of the single eye-glass to the double. -	*Herschel.*	LXXII.	95
Trials to set aside darkening glasses, by transmitting the solar rays through liquids. - -	*Herschel.*	XCI.	354
Optometer. Description of an instrument so called.	*Young.*	XCI.	34
Orbit.* A new method of deducing a first approximation to the orbit of a comet from three geocentric observations. -	*Ivory.*	CIV.	121
Ore.* Analysis of a new species of copper ore.	*Thomson.*	—	45
Ornithorhynchus paradoxus. Some observations on its head. - - -	*Home.*	XC.	432
A description of its anatomy. -	*Home.*	XCII.	67
Of the anatomy of the ornithorhynchus hystrix.	*Home.*	—	348
Facts respecting some fossil remains, showing that the bones of the sternum resemble those of the ornithorhynchus. - -	*Home.*	CVIII.	24
On the ova of the tribes of opossum and ornithorhynchus. - -	*Home.*	CIX.	234

		Vol.	Page.
Osmium. Name given to a metal found in platina.	*Tennant.*	XCIV.	416
Otter. A description of the anatomy of the sea otter.	*Home.*	LXXXVI.	385
Ova.* Experiments on the ova of rabbits.	*Cruikshank.*	LXXXVII.	197
On the passage of the ovum from the ovarium to the uterus in women.	*Home.*	CVII.	252
The distinguishing characters between the ova of the sepia, and those of the vermes testacea.	*Home.*	—	297
On the ova of the different tribes of the opossum and ornithorhynchus.	*Home.*	CIX.	234
Ovarium.* An extraordinary case of a dropsy of the ovarium.	*Martineau.*	LXXIV.	471
An experiment to determine the effect of extirpating one ovarium upon the number of young produced.	*Hunter.*	LXXVII.	233
An account of a particular change of structure in the human ovarium.	*Baillie.*	LXXIX.	71
The case of a full-grown woman in whom the ovaria were deficient.	*Pears.*	XCV.	225
Of a case of the human fœtus found in the ovarium of the size it usually acquires at the end of the fourth month.	*Granville.*	CX.	101
Oxalic. On oxalic acid.	*Thomson.*	XCVIII.	63
Oxyiodine. A term to be given to the new solid compound of iodine and oxygene.	*H. Davy.*	CV.	212

P

PAI PEB

	Vol.	Page.
PAINTING.* Some experiments on the colours used in painting by the ancients. *H. Davy.*	CV.	97
PALLADIUM. Enquiries concerning the nature of a new metal called palladium. *Chenevix.*	XCIII.	290
Attempts to form it, and subsequent enquiries. *Chenevix.*	XCV.	106
On the discovery of palladium, with observations on other substances found with platina. *Dr. Wollaston.*	—	316
On platina and native palladium from Brazil. *Dr. Wollaston.*	XCIX.	189
PARALLAX. On the annual parallax of α Lyræ. *Brinkley.*	C.	204
On the parallax of the fixed stars. - *Pond.*	CVII.	158
Appendix to the above. - - *Pond.*	—	173
Upon the same subject. - - *Pond.*	—	353
On the parallax of certain fixed stars. *Brinkley.*	CVIII.	275
PARASOL ANTS. An account of them. *Smeathman.*	LXXI.	175
PARENTS. On the comparative influence of male and female parents on their offspring. *T. A. Knight.*	XCIX.	392
PARHELIA.* Description of a set of halo's and parhelia, seen in North America in 1771. *Baxter.*	LXXVII.	44
PARIS.* An account of the mode proposed in determining the relative situations of the Royal Observatories of Greenwich and Paris. *Roy.*	LXXVII.	188
PEACOCK PHEASANTS. A description of them. *Pennant.*	LXXI.	74
PEBBLES.* On those found in the Relistian mine cemented by tin ore. - - *Carne.*	XCVII.	293

		Vol.	Page
PENDULUM.* Account of a new pendulum.	*Fordyce.*	LXXXIV.	2
On its use as a standard of measure.	*Evelyn.*	LXXXVIII.	133
Experiments for determining the length of the pendulum vibrating seconds in the latitude of London.	*Kater.*	CVIII.	33
On the probabilities of error in physical observations, and on the density of the earth, considered, with regard to the reduction of experiments on the pendulum.	*Young.*	CIX.	70
Account of experiments for determining the variation in the length of the pendulum vibrating seconds, in different parts of Great Britain.	*Kater.*	—	337
PERCUSSION.* On the force of percussion.	*Dr. Wollaston.*	XCVI.	13
PESSULUS. A peculiar bone so named in the ear of the marmot and Guinea pig.	*Carlisle.*	XCV.	204
PETRIFACTION.* Conjectures relative to the petrifactions found in St. Peter's mountain, near Maestricht.	*Camper.*	LXXVI.	443
PHLOGISTON. Its nature explained.	*Kirwan.*	LXXII.	195
Experiments relating to it, and the seeming conversion of water into air.	*Priestley.*	LXXIII.	398
On the constituent parts of water and dephlogisticated air.	*Watt.*	LXXIV.	329
Sequel to the above.	*Watt.*	——	354
Experiments on the production of dephlogisticated air from water with various substances.	*Rumford.*	LXXVII.	84
Experiments and observations on it.	*Priestley.*	LXXVIII.	147
Further experiments on it.	*Priestley.*	——	313
Continuation of the above.	*Priestley.*	LXXIX.	7
Experiments relating to the doctrine of it.	*Priestley.*	——	289

		Vol.	Page.
PHLOGISTON. Farther Experiments relating to the decomposition of dephlogisticated and inflammable air.	*Priestley.*	LXXXI.	213
PHŒNOMENON. Remarkable phenomena in an eclipse of the moon.	*Herschel.*	LXXXII.	27
PHOSPHORUS.* On the manner of preparing economically phosphoric acid.	*De Chaulnes.*	LXXIII.	288
Experiments upon phosphorus.	*Tennant.*	LXXXI.	184
Decomposition of it.	*H. Davy.*	XCIX.	67
Experiments on it.	*H. Davy.*	C.	253
No oxygene evolved from it.	*H. Davy.*	—	257
On some combinations of phosphorus and sulphur.	*H. Davy.*	CII.	405
New experiments on the combinations of it.	*H. Davy.*	CVIII.	316
PHYSETER. Remarks on its oil.	*Home.*	XCVII.	100
PLACENTA.* Of a tumour found in the human placenta.	*Clarke.*	LXXXVIII.	361
PLANETS.* On the rotation of them round their axes, with a view to determine whether the earth's diurnal motion is perfectly equable.	*Herschel.*	LXXI.	115
On one lately discovered by Mr. Harding.	*Herschel.*	XCV.	31
Direct and expeditious methods of calculating the excentric from the mean anomaly of a planet.	*Robertson.*	CVI.	127
PLANTS.* Of a new plant of the order of fungi.	*Woodward.*	LXXIV.	423
Of a plant yielding asa fœtida.	*Hope.*	LXXV.	36
Chloranthus, a new genus of plants.	*Swartz.*	LXXVII.	359
Account of the nardus Indica, or spikenard.	*Blane.*	LXXX.	284
On the reproduction of buds.	*T. A. Knight.*	XCV.	257

		Vol.	Page
PLANTS.* On the direction of the radicle and germen during the vegetation of seeds.	*T. A. Knight.*	XCVI.	99
On the origin and formation of roots.	*T. A. Knight.*	XCIX.	169
On the causes which influence the direction of the growth of roots. -	*T. A. Knight.*	CI.	209
On the motions of the tendrils of plants.	*T. A. Knight.*	CII.	314
On the action of detached leaves of plants.	*T. A. Knight.*	CVI.	289
PLATINA. Dust of, found in Santa Fè de Bogotà.	*De Celis.*	LXXVIII.	41
On the action of nitre upon gold and platina.	*Tennant.*	LXXXVII.	219
Experiments upon it. -	*Chenevix.*	XCII.	337
On two metals remaining after its solution.	*Tennant.*	XCIV.	411
On a metal found in crude platina.	*Dr. Wollaston.*	—	419
On the action of platina and mercury upon each other. - - -	*Chenevix.*	XCV.	104
On the discovery of palladium, and on other substances found with platina.	*Dr. Wollaston.*	—	316
On platina and native palladium, from Brazil.	*Dr. Wollaston.*	XCIX.	189
On a new fulminating platinum.	*E. Davy.*	CVII.	136
On some combinations of it. -	*E. Davy.*	CX.	108
PLUMBAGO. Experiments on its combustion. - - -	*Allen.* / *Pepys.*	XCVII.	285
Experiments on it. - -	*H. Davy.*	XCIX.	70
POISON.* On the orifices found in certain poisonous snakes. - - -	*Home.*	XCIV.	70
An account of the effects produced by the bite of a rattle-snake. - -	*Home.*	C.	75

		Vol.	Page.
Poison.*	On the different modes in which death is produced by certain vegetable poisons. *Brodie.*	CI.	178
	Farther experiments on the action of poisons on the animal system. - - *Brodie.*	CII.	205
	On the structure of the poisonous fangs of serpents. - - - *Smith.*	CVIII.	471
Polar distances.	A catalogue of those of some of the fixed stars. - - *Pond.*	CIII.	75
	A catalogue of those of eighty-four principal fixed stars, made with the mural circle at the Royal Observatory. - - - *Pond.*	—	280
	Determination of the north polar distances and proper motion of thirty fixed stars. *Pond.*	CV.	384
Polarization.	On the polarization of light by oblique transmission through all bodies. *Brewster.*	CIV.	219
	On the depolarization of light as exhibited by various bodies. - - *Brewster.*	CV.	29
	On the polarization of light by reflection from transparent bodies. - *Brewster.*	—	125
	On the action of the crystalline lens in fishes and quadrupeds on polarized light. *Brewster.*	CVI.	311
	On the laws of polarization and double refraction in regularly crystallized bodies. *Brewster.*	CVIII.	199
	On the absorption of polarized light by doubly refracting crystals. - *Brewster.*	CIX.	11
Ponza.	Description of the Island of Ponza. *Hamilton.*	LXXV.	365
Poppy. (Corn)	On the colouring matter of the corn poppy. - - - *Smithson.*	CVIII.	115
Population.*	On the Bills of mortality at York. *White.*	LXXII.	35
Porism.	General theorems, chiefly porisms, in the higher geometry. - - *Brougham.*	LXXXVIII.	378
Potash.*	Properties of its basis and composition. *H. Davy.*	XCVIII.	10

		Vol.	Page
Potash.* On its carbonates.	*Dr. Wollaston.*	XCVIII.	97
On the action of potassium.	*H. Davy.*	XCIX.	40
Its decomposition.	*H. Davy.*	C.	29
Composition of its muriate.	*H. Davy.*	—	36
On an easier mode of procuring potassium than that now adopted.	*Tennant.*	CIV.	578
Potatoes. Observations on the substance of the plant.	*T. A. Knight.*	XCIII.	288
Prism.* How concerned in the formation of the blue bow and streaks.	*Herschel.*	XCIX.	280
Of their attractions.	*T. Knight.*	CII.	263
Hexagonal,—origin of this form in crystallography.	*Dr. Wollaston.*	CIII.	59
Prismatic colours. On their heating power.	*Herschel.*	XC.	256
On their illuminating power.	*Herschel.*	—	262
On the reflection of their heat.	*Herschel.*	—	298
On the refraction of their heat.	*Herschel.*	—	310
Remarks on the primary division of the prismatic spectrum.	*Dr. Wollaston.*	XCII.	378
Prize medal. A donation by Sir Benjamin Thomson, Count Rumford, for the purpose of instituting a prize medal.		LXXXVII.	215
Problem, geometrical. One remarkable for generality and simplicity of result.	*T. Knight.*	CII.	310
Profundity, or local situation of celestial objects in space. Of a criterion for ascertaining it.	*Herschel.*	CVII.	308
Proteosaurus. An account of the fossil skeleton of it.	*Home.*	CIX.	209
Reasons for giving that name to the above fossil.	*Home.*	—	212
On its spinal marrow and fins.	*Home.*	CX.	159

		Vol.	Page.
PROTEUS ANGUINUS. Anatomical description of a doubtful amphibious animal of Germany.	*Schreibers.*	XCI.	241
PROVISIONS. On the prices of them at different periods. - -	*Evelyn.*	LXXXVIII.	176
PRUSSIAN BLUE. Observations upon it.	*Priestley.*	LXXIX.	298
PRUSSIATES. On the nature of the salts thus termed, and on acids formed by the union of certain bodies with the elements of the Prussic acid.	*Porrett.*	CIV.	527
Farther analytical experiments upon the same subject. - - -	*Porrett.*	CV.	220
PUDDLING OF IRON. On some appearances attending the conversion of cast into malleable iron.	*Beddoes.*	LXXXI.	173
Farther observations on the same subject.	*Beddoes.*	LXXXII.	257
PUERPERAL FEVER. Reasons why poor women so generally escape that fatal disease.	*Bland.*	LXXI.	361
PUS. On its composition. - -	*Brande.*	XCIX.	384
Observations and experiments on it.	*Pearson.*	C.	294
On its conversion into granulations or new flesh.	*Home.*	CIX.	1
PYRITES.* An analysis of the magnetical pyrites.	*Hatchett.*	XCIV.	315

Q

QUA QUI

		Vol.	Page.
QUADRANT.* A project for a new division of the quadrant.	*Hutton.*	LXXIV.	21
Description of an improvement in the application of the quadrant of altitude to a celestial globe, for the resolution of problems dependent on azimuth and altitude.	*Smeaton.*	LXXIX.	1
QUADRUPED.* Observations on the structure of the eyes of quadrupeds.	*P. Smith.*	LXXXV.	267
A letter on a canal in the medulla spinalis of some quadrupeds.	*Sewell.*	XCIX.	146
On the nature of the intervertebral substance in fish and quadrupeds.	*Home.*	—	177
On the structure of the crystalline lens in fishes and quadrupeds, as ascertained by its action on polarized light.	*Brewster.*	CVI.	311
QUANTITY.* On finding the values of algebraical quantities by converging series.	*Waring.*	LXXVII.	71
On exponential quantities.	*L'Huilier.*	LXXXVI.	142
On the necessary truth of certain conclusions, obtained by means of imaginary quantities.	*Woodhouse.*	XCI.	89
On imaginary quantities.	*Buée.*	XCVI.	23
On impossible quantities.	*Gompertz.*	—	147
QUICKSILVER.* Experiments for ascertaining the point of mercurial congelation.	*Hutchins.*	LXXIII.	*303
Observations upon the above experiments.	*Cavendish.*	——	303

	Vol.	Page.
QUICKSILVER.* History of the congelation of quicksilver. - - - *Blagden.*	LXXIII.	329
Experiments on the congelation of quicksilver in England. - - - *Walker.*	LXXIX.	199

R

RAB REF

		Vol.	Page.
Rabbits.* Sundry experiments respecting impregnation.	*Haighton.*	LXXXVII.	197
Rain.* An account of a remarkable sort of rain on Mount Ætna.	*Gioeni.*	LXXII.	1
Quantity of rain which fell at Barrowby, from 1778 to 1781.	*Lloyd.*	——	71
Rainbow.* An account of several lunar bows.	*Tunstall.*	LXXIII.	100
An account of two seen at the same time at Alverstoke, in 1792.	*Sturges.*	LXXXIII.	1
Remarks on supernumerary rainbows.	*Young.*	XCIV.	8
Rattle-snake.* The case of a man who died in consequence of the bite of a rattle-snake, with the effects produced by the poison.	*Home.*	C.	75
Rectification. Of the rectification of the hyperbola.	*Hellins.*	XCII.	448
An appendix to the above.	*Hellins.*	CI.	110
Refraction.* An experiment proposed for determining whether the rays of light change their velocity according to the ideas concerning the cause of refraction.	*Wilson.*	LXXII.	58
An investigation of a method of allowing for refraction in astronomical observations.	*Smeaton.*	LXXVII.	318
On horizontal refractions.	*Huddart.*	LXXXVII.	29
Remarks on the refraction of light.	*Prevost.*	LXXXVIII.	311
Account of a singular instance of atmospherical refraction.	*Latham.*	——	357

	Vol.	Page.
Refraction.* Upon an unusual horizontal refraction of the air. - - - *Vince.*	LXXXIX.	13
On double images caused by atmospherical refraction. - - *Dr. Wollaston.*	XC.	239
On the refrangibility of the invisible rays of the sun. - - - *Herschel.*	—	284
Method of measuring refractive and dispersive powers by prismatic reflection. *Dr. Wollaston.*	XCII.	365
On the oblique refraction of Iceland crystal. *Dr. Wollaston.*	—	381
On the quantity of horizontal refraction, with a method of measuring the dip at sea. *Dr. Wollaston.*	XCIII.	1
On atmospherical refraction as it affects astronomical observations. - *Groombridge.*	C.	190
Farther observations on the same subject. *Groombridge.*	CIV.	337
On the communication of the structure of doubly refracting crystals to glass and other substances, by mechanical compression and dilatation. - - - *Brewster.*	CVI.	156
On the laws of polarization and double refraction in regularly crystallized bodies. *Brewster.*	CVIII.	199
On the absorption of light by doubly refracting crystals. - - - *Brewster.*	CIX.	11
Refrigeration. A remarkable one at Glasgow. *Six.*	LXXVIII.	103
Relistian. An account of the Relistian tin mine. *Carne.*	XCVII.	293
Remains. An account of organic remains found near Brentford. - - *Trimmer.*	CIII.	131
An account of the fossil remains of an animal more nearly allied to fishes than any other class. - - - *Home.*	CIV.	571
Some farther remarks upon the same subject. *Home.*	CVI.	318

		Vol.	Page.
Remains. An account of some fossil remains of a rhinoceros discovered near Plymouth.	*Home.*	CVII.	176
Additional remarks upon the subject of two preceding papers, showing that the bones of the sternum resemble those of the ornithorhynchus paradoxus.	*Home.*	CVIII.	131
Remedy. On the regulation for the master of the Mint.	*Hatchett.*	XCIII.	115
Resistance.* Experiments upon the resistance of the air.	*Edgworth.*	LXXIII.	136
Upon the resistance of bodies moving in fluids.	*Vince.*	LXXXVIII.	1
Respiration.* Observations on respiration.	*Priestley.*	LXXX.	106
On the changes produced in atmospheric air and oxygene gas.	*Allen and Pepys.*	XCVIII.	249
On Respiration.	*Allen.*	XCIX.	404
On the structure of the organs of respiration in animals between those of the classes pisces and vermes.	*Home.*	CV.	256
Retin-asphaltum. Name given to a bitumen from Bovey.	*Hatchett.*	XCIV.	410
Reversions.* On the probabilities and values of survivorships between two persons of any given ages.	*Morgan.*	LXXVIII.	331
On the contingent reversion of three lives.	*Morgan.*	LXXIX.	40
On the same subject of three lives.	*Morgan.*	LXXXI.	246
On the same subject of three lives.	*Morgan.*	LXXXIV.	223
On the same subject of three lives.	*Morgan.*	XC.	22
On the estimation of the value of life contingencies.	*Gompertz.*	CX.	214

		Vol.	Page.
RHEA AMERICANA. Description of its solvent glands and gizzard.	*Home.*	CIII.	80
RHINOCEROS.* Description of the double-horned rhinoceros of Sumatra.	*Bell.*	LXXXIII.	3
An anatomical description of a male rhinoceros.	*Thomas.*	XCI.	145
An account of some fossil remains of a rhinoceros discovered near Plymouth.	*Home.*	CVII.	176
RHODIUM. A metal found in platina.	*Dr. Wollaston.*	XCIV.	419
RIDERS. On the employment of riders in the construction of ships.	*Young.*	CIV.	303
RIDING.* On its salutary effects.	*Dr. Wollaston.*	C.	11
RIGHT ASCENSION.* Demonstration of the late Dr. Maskelyne's formulæ for finding the longitude and latitude of a celestial object from its right ascension and declination, and *vice versa*.	*Robertson.*	CVI.	138
On the parallax of the fixed stars in right ascension.	*Pond.*	CVIII.	481
RINGS.* Experiments for investigating the cause of the coloured concentric rings between two object glasses.	*Herschel.*	XCVII.	180
Continuation of the above subject.	*Herschel.*	XCIX.	259
Supplement upon the same subject.	*Herschel.*	C.	149
Of an instrument used in experiments on polarized rings.	*J. F. W. Herschel.*	CX.	96
RIVERS.* An account of the Ganges and Burrampooter.	*Rennell.*	LXXI.	87
On ice found in the bottoms of rivers.	*T. A. Knight.*	CVI.	286
ROOTS OF PLANTS.* On the origin and formation of roots.	*T. A. Knight.*	XCIX.	169

	Vol.	Page.
ROOTS OF PLANTS.* On the causes which influence the direction of the growth of roots. *T. A. Knight.*	CI.	209
ROWLEY RAG-STONE.* An analysis of it, and of the toad-stone. - - *Withering.*	LXXII.	327
RUMINATION. Observations on this process. *Home.*	XCVII.	173

S

SAB SAL

	Vol.	Page.
SABRINA. The name given to an island off that of St. Michael. - - - *Tillard.*	CII.	158
ST. MICHAEL. A narrative of an eruption of a volcano in the sea off that island. - *Tillard.*	—	152
ST. PETER'S. Conjectures relative to the petrifactions found in St. Peter's Mountain, near Maestricht. - - - *Camper.*	LXXVI.	443
SALT.* On a saline substance from Mount Vesuvius. *Smithson.*	CIII.	256
(Chemistry) On the specific gravities and attractive powers of various saline substances. *Kirwan.*	LXXI.	7
A continuation of the same experiments. *Kirwan.*	LXXII.	179
On the decomposition of the acid of borax, or sedative salt. - *De Crell.*	LXXXIX.	56
On super-acid and sub-acid salts. *Dr. Wollaston.*	XCVIII.	96
An analysis of several varieties of British and foreign salt, with a view to explain their fitness for economical purposes. *Henry.*	C.	89
On the nature of the salts termed double prussiates - - *Porrett.*	CIV.	527
On the actions of the acids on the salts called hyperoxymuriate. *H. Davy.*	CV.	214
Analytical experiments relative to the constitution of the prussic, of the ferruretted chyazic acids, and of their salts. *Porrett.*	—	220

		Vol.	Page.
SALTPETRE.* Observations respecting the natural production of saltpetre on the walls of subterraneous and other buildings. -	*Kidd.*	CIV.	508
SANSCRITA. A catalogue of Sanscrita manuscripts, presented to the Royal Society by Sir William and Lady Jones. - -	*Wilkins.*	LXXXVIII.	582
SAP.* On the ascent of the sap in trees.	*T. A. Knight.*	XCI.	333
On the descent of the sap in trees.	*T. A. Knight.*	XCIII.	277
On the motion of the sap in trees.	*T. A. Knight.*	XCIV.	183
Concerning the state in which the sap of trees is deposited during winter.	*T. A. Knight.*	XCV.	88
SAP-GREEN. Some facts respecting the colour of this pigment. - - -	*Smithson.*	CVIII.	116
SARCOCELE. Of a species of sarcocele of a most astonishing size in a black man in the Island of Senegal. - - -	*Schotte.*	LXXIII.	85
SATURN.* Determination of the heliocentric longitude of the descending node of Saturn.	*Bugge.*	LXXVII.	37
On the rotation upon its axis. -	*Herschel.*	LXXXIV.	48
Observations on its singular figure.	*Herschel.*	XCV.	272
Observations on its figure, climate, atmosphere, and ring. - - -	*Herschel.*	XCVI.	455
An account of a new irregularity lately perceived in its apparent figure. -	*Herschel.*	XCVIII.	145
(Belt) Observations of a quintuple belt.	*Herschel.*	LXXXIV.	28
(Ring) Of its rotation on an axis.	*Herschel.*	LXXX.	427
Observations on it. -	*Herschel.*	LXXXII.	1
On its figure, climate, and atmosphere.	*Herschel.*	XCVI.	455
(Satellites) On the discovery of a 6th and 7th satellite. - - -	*Herschel.*	LXXX.	1
On the satellites in general.	*Herschel.*	——	427

		Vol.	Page.
SATURN.* (Satellites) On the rotation of the 5th satellite on its axis.	*Herschel.*	LXXXII.	1
SAUCEPAN. Account of an ancient one.	*Pearson.*	LXXXVI.	400
SCHEHALLIEN.* A lithological survey of it, to determine the specific gravity of the rocks which compose it.	*Playfair.*	CI.	347
SCILLY ISLANDS.* Observations on a current that often prevails to the westward of them.	*Rennell.*	LXXXIII.	182
Farther observations on the same subject.	*Rennell.*	CV.	182
SCORIA. On some scoria from iron works, which resemble the vitrified filaments described by Sir Wm. Hamilton.	*More.*	LXXII.	50
SEA.* On the temperature of the ocean and density of sea water.	*J. Davy.*	CVII.	275
On the gravity and temperature of sea waters.	*Marcet.*	CIX.	161
(Sickness) On sea-sickness.	*Dr. Wollaston.*	C.	6
SECRETIONS.* Hints on animal secretions.	*Home.*	XCIX.	385
On the coagulating power of the secretion of the gastric glands.	*Home.*	CIII.	96
On the secretions of some of the amphibia.	*J. Davy.*	CVIII.	303
SEEDS.* On the direction of the radicle and germen during the vegetation of seeds.	*T. A. Knight.*	XCVI.	99
On the effect when made to grow revolving.	*T. A. Knight.*	—	102
SEPIA. On the distinguishing characters between the ova of the sepia and those of the vermes testacea.	*Home.*	CVII.	297
SERIES.* A new method of investigating the sums of infinite series.	*Vince.*	LXXII.	389
On the summation of series, whose general term is a determinate function of Z, the distance from the first term of the series.	*Waring.*	LXXIV.	385

		Vol.	Page.
SERIES.* A supplement to the paper on the summation of infinite series.	*Vince.*	LXXV.	32
On infinite series.	*Waring.*	LXXVI.	81
On finding the values of algebraical quantities by converging series, and demonstrating propositions given by Pappus.	*Waring.*	LXXVII.	71
On infinite series.	*Waring.*	LXXXI.	146
A new method of computing the value of a slowly converging series, of which all the terms are affirmative.	*Hellins.*	LXXXVIII.	183
On swiftly converging series.	*Hellins.*	——	527
On the independence of the analytical and geometrical methods of investigation.	*Woodhouse.*	XCII.	85
On a method of differences to the species of series whose sums are obtained by the help of impossible quantities.	*Gompertz.*	XCVI.	147
On the general term of an important series in the inverse method of finite differences.	*Brinkley.*	XCVII.	114
Observations on the great advantage of descending over ascending series.	*Hellins.*	CI.	110
New methods of investigating the sums of several classes of infinite series.	*Babbage.*	CIX.	249
SERPENTS.* On the means of distinguishing those serpents which are venomous from those which are not so.	*Gray.*	LXXIX.	21
On the voluntary expansion of the skin of the neck in the cobra de capello.	*Home.*	XCIX.	346
The case of a man who died in consequence of the bite of a rattle-snake.	*Home.*	C.	75
On the progressive motion of snakes	*Home.*	CII.	163
On the structure of their poisonous fangs.	*Smith.*	CVIII.	471
SERUM.* On the action of voltaic electricity on the serum of the blood.	*Home.*	XCIX.	389

		Vol.	Page.
SEX. Remarks on it in domesticated animals.	*T. A. Knight.*	XCIX.	397
SHADOWS. Experiments on coloured shadows.	*Rumford.*	LXXXIV.	107
SHARK. On the mode of breeding of the oviparous shark.	*Home.*	C.	205
SHEEP.* On their grinding teeth.	*Home.*	LXXXIX.	252
On a new variety in their breeds.	*Humphreys.*	CIII.	88
SHEERNESS. A description of the king's well there.	*Page.*	LXXIV.	8
SHELLS.* An account of some minute British shells not duly observed or noticed by authors.	*Lightfoot,*	LXXVI.	160
Experiments on shell and bone.	*Hatchett.*	LXXXIX.	315
Of a rare species of worm shells in the East Indies.	*Griffiths.*	XCVI.	269
On the shell of the sea worm found on the coast of Sumatra, being a species of teredo.	*Home.*	—	276
SHIPS.* On their stability.	*Attwood.*	LXXXVI.	46
On the stability of ships.	*Attwood.*	LXXXVIII.	201
On a new principle of constructing H. M. ships of war.	*Seppings.*	CIV.	285
On oblique riders and other alterations.	*Young.*	—	303
On the last improvements in the construction of English shipping.	*Dupin.*	CVII.	86
On the utility of diagonal braces.	*Seppings.*	CVIII.	1
On a new principle of their construction for the mercantile navy.	*Seppings.*	CX.	133
SHIPWRECK. Of the remarkable effects of a shipwreck on the mariners.	*Currie.*	LXXXII.	199
SIAM. On the astronomy and chronology of the Siamese.	*Marsden.*	LXXX.	575
SIGHT.* On the variation of sight by age.	*Wells.*	CI.	385

		Vol.	Page
Sight.*	On the near and distant sight of different persons. *J. Ware.*	CIII.	31
Silex.	Experiments made with a view to its decomposition. *H. Davy.*	XCVIII.	349
Silver.*	Of the discovery of silver in the Herland copper mine. *Hitchins.*	XCI.	159
Skeleton.*	On a fossil human skeleton from Guadaloupe. *König.*	CIV.	107
	Of the fossil skeleton of the proteosaurus. *Home.*	CIX.	209
	Reasons for calling the above by that name. *Home.*	—	212
Sliding rule.	The principles on which it is constructed. *Dr. Wollaston.*	CIV.	16
	A proposition pointed out that leads directly to the solution of every case to which that instrument can be applied. *Roget.*	CV.	13
Small-pox.*	Of a child who had it in the womb. *Wright.*	LXXI.	372
Snakes.*	On the orifices situated between the nostril and the eye, found in certain poisonous snakes. *Home.*	XCIV.	70
Snowdon.	On its measurement by the thermometrical barometer. *F. J. H. Wollaston.*	CX.	295
Sobieski.	An investigation of all the changes of the variable star in Sobieski's shield, from five years observations. *Pigott.*	XCV.	131
Soda.	On the communication of the structure of the doubly refracting crystals to soda. *Brewster.*	CVI.	156
Sodium.	The name given to the metal existing in soda. *H. Davy.*	XCVIII.	32
	An easy mode of obtaining it. *H. Davy.*	CI.	15
Soil.*	On the appearance of the soil at opening a well in Lincolnshire. *Englefield.*	LXXI.	345

		Vol.	Page.
Solids.*	Of the attraction of such solids as are terminated by planes, and of those of greatest attraction. *T. Knight.*	CII.	247
Solstice.	Observation of the summer solstice, 1812. *Pond.*	CIII.	27
	Observation of the winter solstice, 1812. *Pond.*	—	123
	Observation of the summer solstice, 1813. *Pond.*	—	304
	Observations of the solstices of 1818 and 1819. *Groombridge.*	CX.	330
Solution.*	Of problems relating to survivorships. *Morgan.*	LXXXI.	248
	Of problems respecting angles. *Cavallo.*	—	290
	Of propositions relating to infinite series. *Vince.*	—	299
Sorbic acid	newly discovered. *Donovan.*	CV.	231
Sound.*	Experiments respecting sound and light. *T. Young.*	XC.	106
	On sounds inaudible by certain ears. *Dr. Wollaston.*	CX.	306
Spar.*	On the multiplication of images and colours in some specimens of calcareous spar. *Brewster.*	CV.	270
Speaking-pipe.	Description of one to a forty feet telescope. *Herschel.*	LXXXV.	385
Spear.	Of the head of a spear found imbedded in an elephant's tusk. *Combe.*	XCI.	165
Spermaceti.*	On the conversion of animal substances into a fatty matter resembling it. *Gibbes.*	LXXXV.	239
Sphere.*	Demonstration of a theorem, by which such portions of the solidity of a sphere are assigned as admit an algebraic expression. *Woodhouse.*	XCI.	153
Spheroids.	On Laplace's method for computing the attraction of spheroids. *Ivory.*	CII.	1
	On the attractions of an extensive class of them. *Ivory.*	—	46

		Vol.	Page.
SPINAL. On the spinal marrow of living animals.	*Cruikshank.*	LXXXV.	177
On a canal in the medulla spinalis of some quadrupeds.	*Sewell.*	XCIX.	146
On the influence of the spinal marrow on the action of the heart in fishes.	*Clift.*	CV.	91
On the canal for containing that of the proteosaurus.	*Home.*	CX.	159
SPIRIT.* Experiments to ascertain the state in which spirit exists in fermented liquors; with a table exhibiting the relative proportion of pure alcohol contained in several kinds of wine and some other liquors.	*Brande.*	CI.	337
SPLEEN.* On its structure and uses.	*Home.*	XCVIII.	45
Farther experiments on it.	*Home.*	——	133
Experiments to prove that fluids pass directly from the stomach to the circulation of the blood, and from thence into the cells of the spleen without going through the thoracic duct.	*Home.*	CI.	163
SPRING. (Season) Indications of spring.	*Marsham.*	LXXIX.	154
SPRINGS.* On the heat of wells and springs in the Island of Jamaica.	*Hunter.*	LXXVIII.	53
SQUALUS MAXIMUS. An anatomical account of it, showing that it forms an intermediate link between the whale and cartilaginous fishes.	*Home.*	XCIX.	206
Farther observations on the same subject.	*Home.*	CIII.	227
SQUINTING.* Remarks upon it.	*Hosack.*	LXXXIV.	213
Remarks upon it.	*Home.*	LXXXVII.	15
STAGGERS. Cause of that disorder in sheep.	*Home.*	LXXXV.	205
STAG'S HEAD. An account of a stag's head and horns found at Alport, in Derbyshire.	*Barker.*	LXXV.	353
STANDARD. An account of some endeavours to ascertain a standard of weight and measure.	*Evelyn.*	LXXXVIII.	133

		Vol.	Page.
Stannane. The name given to a compound of chlorine and tin.	*J. Davy.*	CII.	177
Stapes. The physiology of the stapes, one of the bones of the organ of hearing.	*Carlisle.*	XCV.	198
Starch. On its decomposition by air and water at the temperature of the atmosphere.	*De Saussure.*	CIX.	29
Stars.* (Fixed) An experiment for determining by the fixed stars the velocity and refraction of the rays of light.	*Maskelyne.*	LXXII.	58
An account of several changes that have happened among them since the time of Mr. Flamstead.	*Herschel.*	LXXIII.	247
On the means of discovering their distance in consequence of the diminution of the velocity of their light.	*Michell.*	LXXIV.	35
On a method of describing their relative positions and magnitudes.	*F. Wollaston.*	——	181
On the nature and construction of the sun and fixed stars.	*Herschel.*	LXXXV.	46
On the method of observing the changes that happen to them, and a catalogue of comparative brightness.	*Herschel.*	LXXXVI.	166
On their rotatory motion on their axes.	*Herschel.*	——	452
On the periodical changes of brightness of two fixed stars.	*Pigott.*	LXXXVII.	133
On the declinations of some of them.	*Pond.*	XCVI.	420
The north polar distances of some of the principal ones.	*Pond.*	CIII.	75
Ditto of 84 principal fixed stars.	*Pond.*	—	280
On the sidereal part of the heavens, and its connection with the nebulous.	*Herschel.*	CIV.	248

		Vol.	Page.
STARS.* (Fixed) The north polar distances of 30 principal fixed stars, with their proper motion.	*Pond.*	CV.	384
On the different methods of constructing a catalogue of fixed stars. - -	*Pond.*	CVIII.	405
(Double) Double stars, discovered in 1779, at Frampton House. -	*N. Pigott.*	LXXI.	84
A catalogue of double stars.	*Herschel.*	LXXII.	112
A catalogue of double stars.	*Herschel.*	LXXV.	40
On the changes during the last 25 years in the relative situation of double stars.	*Herschel.*	XCIII.	339
Continuation of the above. -	*Herschel.*	XCIV.	353
(Particular) On the variation of the light in Algol. - - -	*Goodricke.*	LXXIII.	474
On the variation of light in Algol.	*Englefield.*	LXXIV.	1
On the obscuration of Algol.	*Palitch.*	——	4
Farther observations by the same.	*Palitch.*	——	5
On the periods of the changes of light in Algol. - -	*Goodricke.*	——	287
On the period of the variation of light of *δ* near the head of Cepheus.	*Goodricke.*	LXXVI.	48
On the periodical appearance of *o* Ceti.	*Herschel.*	LXXXII.	24
On the disappearance of the 55th Herculis.	*Herschel.*	LXXXII.	26
On the periodical star *α* Herculis.	*Herschel.*	LXXXVI.	452
On Mr. Harding's lately discovered star.	*Herschel.*	XCV.	31
On the variable star in Sobjeski's shield.	*Pigott.*	—	131

		Vol.	Page.
STARS.* (Particular) On the annual parallax of α Lyræ. - - -	*Brinkley.*	C.	204
On the annual parallax of α Aquilæ.	*Pond.*	CVIII.	477
(Changeable) On a new variable star.	*Pigott.*	LXXV.	127
On a new variable star. -	*Goodricke.*	——	153
On those stars which the astronomers of the last century suspected to be changeable.	*Pigott.*	LXXVI.	189
(Lustre) A catalogue of the comparative brightness of the stars in several constellations.	*Herschel.*	LXXXVI.	194
A second catalogue of ditto.	*Herschel.*	——	452
A third catalogue of ditto. -	*Herschel.*	LXXXVII.	293
A fourth catalogue of ditto.	*Herschel.*	LXXXIX.	121
(Nebulæ) On a nebula in Coma Berenices.	*E. Pigott.*	LXXI.	82
Catalogue of 1000 new nebulæ and clusters of them. -	*Herschel.*	LXXVI.	457
Catalogue of a second thousand ditto.	*Herschel.*	LXXIX.	212
On nebulous stars, properly so called.	*Herschel.*	LXXXI.	71
Observations on various nebulæ.	*Herschel.*	CI.	306
On the nebulous part of the heavens.	*Herschel.*	CIV.	248
On the relative distances of clusters of stars.	*Herschel.*	CVIII.	429
(Parallax) On the parallax of the fixed stars.	*Herschel.*	LXXII.	82
On the parallax of α Lyræ. -	*Brinkley.*	C.	204
On the parallax of the fixed stars. -	*Pond.*	CVII.	158
Appendix to ditto. - -	*Pond.*	—	173
On the same subject. - -	*Pond.*	—	353

		Vol.	Page
Stars.* (Parallax) On the parallax of certain fixed stars.	*Brinkley.*	CVIII.	275
On the parallax of α Aquilæ.	*Pond.*	—	477
On the parallax of the fixed stars in right ascension.	*Pond.*	—	481
Steel. On welding cast steel.	*Frankland.*	LXXXV.	296
Experiments to investigate the nature of a kind of steel manufactured at Bombay, called wootz, with remarks on the different states of iron.	*Pearson.*	——	322
Stomach. On the camel's stomach.	*Home.*	XCVI.	357
On the stomach of the whale.	*Home.*	XCVII.	93
On the stomachs of different animals, to elucidate the process of converting substances into chyle.	*Home.*	——	139
On that of the squalus maximus.	*Home.*	XCIX.	206
On the influence of the nerves of the eighth pair on the secretions of the stomach.	*Brodie.*	CIV.	102
On the gastric glands of the human stomach, and the contraction which takes place in that viscus.	*Home.*	CVII.	347
Stones.* (Disorder) On human calculi.	*Lane.*	LXXXI.	223
On the composition and properties of urinary concretions.	*Pearson.*	LXXXVIII.	15
On the differences in the structure of calculi formed in different parts of the passages, and on the effects of solvent medicines upon them.	*Brande.*	XCVIII.	223
Observations upon the above paper.	*Home.*	XCVIII.	244
Of a calculus from the human bladder of an uncommon magnitude.	*Earle.*	XCIX.	303
On cystic oxide, a new species of urinary calculus.	*Dr. Wollaston.*	C.	223

		Vol.	Page.
Stones.*	(Disorder) A new mode of performing the high operation. - - *Home.*	CX.	209
	(Meteoric) Account of a fall near Siena, in 1794. *Lord Bristol.*	LXXXV.	103
	On certain stony and metalline substances said to have fallen on the earth at different times. - - *Howard.*	XCII.	168
	On stone said to have fallen on the earth in France, and on native iron said to have fallen in India. - *Greville.*	XCIII.	200
	(Natural history) Of the discovery of some very singular balls of stone found in the works of the Huddersfield canal. - *Outram.*	LXXXVI.	350
	A method of analyzing stones containing fixed alkali by boracic acid. *H. Davy.*	XCV.	231
Storm.*	Of the violent storm of lightning at Eastbourn, in 1780. - - *Brereton.*	LXXI.	42
	Of a thunder storm in Scotland, in 1786, with meteorological observations. - *Brydone.*	LXXVII.	61
	Remarks on the above. - *Lord Stanhope.*	——	130
Strata.	Of the strata observed in sinking for water at Boston, in Lincolnshire. - *Limbird.*	LXXVII.	50
	Of the strata and volcanic appearances in the North of Ireland, and Western Islands of Scotland. - - - *Mills.*	LXXX.	73
Stream.	On the heat of the water in the Gulph stream. - - - *Blagden.*	LXXI.	334
	On an ebbing and flowing stream discovered by boring in the harbour of Bridlington. *Storer.*	CV.	54
Strength.	Experiments on the strength of materials. *Rennie.*	CVIII.	118
Strontianite.	An account of its external, physical, and chemical characters. - *Schmeisser.*	LXXXIV.	418
Submarine forest.	An account of one on the coast of England. - *Correa de Serra.*	LXXXIX.	145

		Vol.	Page
Subsidence. Of a subsidence of the ground near Folkstone.	*Lyon.*	LXXVI.	220
Sulphate. On the manufacture of the sulphate of magnesia at Monte della Guardia, near Genoa.	*Holland.*	CVI.	294
Sulphur. On the nature of sulphur.	*H. Davy.*	XCIX.	39
Some experiments on it.	*H. Davy.*	C.	231
On some combinations of phosphorus and sulphur.	*H. Davy.*	CII.	405
Sulphuret. Of a triple sulphuret of lead, antimony, and copper, from Cornwall, and upon different kinds of sulphuret of copper.	*Bournon.*	XCIV.	30
Analysis of the triple sulphuret from Cornwall.	*Hatchett.*	—	63
On the magnetical pyrites and other sulphurets of iron.	*Hatchett.*	—	315
On the compound sulphuret from Huelboys.	*Smithson.*	XCVIII.	55
Experiments on the alcohol of sulphur, or sulphuret of carbon.	*Berzelius.*	CIII.	171
On production of cold by evaporation of ditto.	*Marcet.*	—	252
Sumatra. A phenomenon observed upon this island.	*Marsden.*	LXXI.	383
Of a rare species of worm shells at an island off the north-west coast of Sumatra.	*Griffiths.*	XCVI.	269
Summer. Observation of the summer solstice, 1812, at the Royal Observatory.	*Pond.*	CIII.	27
Ditto, of 1813.	*Pond.*	—	304
Sun.* (In general) On the proper motion of the sun and solar system.	*Herschel.*	LXXIII.	247
On the nature and construction of the sun and fixed stars.	*Herschel.*	LXXXV.	46

		Vol.	Page.
Sun.* (In general) Some remarks on the stability of its light.	*Herschel.*	LXXXVI.	187
On finding the latitude of a place by means of two altitudes of the sun.	*Lax.*	LXXXIX.	74
On the method of viewing the sun advantageously with telescopes of large apertures and high magnifying powers.	*Herschel.*	XC.	255
On the refrangibility of its rays.	*Herschel.*	—	284
On the solar and terrestrial rays that occasion heat.	*Herschel.*	—	293
On the nature of the sun, on the causes of its variable emission of light and heat, with remarks on the utility of solar observations.	*Herschel.*	XCI.	265
Farther observations on the same subject.	*Herschel.*	—	354
On the direction and velocity of its motion, and on the solar system.	*Herschel.*	XCV.	233
On the quantity and velocity of the solar motion.	*Herschel.*	XCVI.	205
(Eclipses*) Observed at Bath, 1778.	*Herschel.*	LXXI.	138
Observed at Cambridge, in New England, 1780.	*Willard.*	—	505
Result of calculations on the observations at various places, in June 1788.	*Piazzi.*	LXXIX.	55
Some particulars on the eclipse in September 1793.	*Herschel.*	LXXXIV.	39
On the same eclipse at Lilienthal.	*Schröeter.*	LXXXIV.	262
On the solar eclipse which is said to have been predicted by Thales.	*F. Baily.*	CI.	220
(Spots*) An answer to the objections of Mr. De la Lande against the solar spots being excavations in the luminous matter of the sun.	*Wilson.*	LXXIII.	144

Survey. *See Trigonometry.*

		Vol.	Page.
SURVIVORSHIP.* On the probabilities between two persons, and the method of valuing reversions.	*Morgan.*	LXXVIII.	331
On the method of valuing the reversion upon three lives.	*Morgan.*	LXXIX.	40
On the same subject.	*Morgan.*	LXXXI.	246
On the same subject.	*Morgan.*	LXXXIV.	223
On the same subject.	*Morgan.*	XC.	22
SUS ÆTHIOPICUS. On the structure of its teeth.	*Home.*	LXXXIX.	237
SWALLOW. Some account of the nests of the Java swallow, and of the glands that secrete the mucus of which they are composed.	*Home.*	CVII.	332
SYDNEIA. An analysis of an earthy substance from New South Wales, called sydneia, or terra australis.	*Hatchett.*	LXXXVIII.	110

T

TAB TAN

		Vol.	Page.
TABASHEER. An account of the tabasheer.	*Russell.*	LXXX.	273
An account of some chemical experiments on tabasheer.	*Macie.*	LXXXI.	368
On the optical and physical properties of tabasheer.	*Brewster.*	CIX.	283
TABLE MOUNTAIN. A curious phenomenon on its summit.	*J. Davy.*	CVII.	289
TABLES.* Indications of spring, from 1736 to 1788.	*Marsham.*	LXXIX.	154
(Sundry tables in Vol. LXXX, as per Index, p. 632 and 633.)			
On the construction of logarithmic tables.	*Knight.*	CVII.	217
TADPOLE.* On the formation of fat in the intestine of the tadpole, and on the use of the yelk in the formation of the embryo in the egg.	*Home.*	CVI.	301
TANGENT.* On a new property of the tangents of the three angles of a plane triangle.	*Garrard.*	XCVIII.	120
On a new property of the tangents of three arches trisecting the circumference of a circle.	*Maskelyne.*	——	122
On some properties of tangents to circles.	*Hey.*	CIV.	348
TANNING.* On the quantity of tanning principle and gallic acid contained in the bark of various trees.	*Biggin.*	LXXXIX.	259
On the tanning principles of certain astringent vegetables.	*H. Davy.*	XCIII.	233

		Vol.	Page.
TANNING.* On an artificial substance which possesses the principal characteristic properties of tannin.	*Hatchett.*	XCV.	211
Additional remarks on the above.	*Hatchett.*	—	285
Additional remarks on the same subject.	*Hatchett.*	XCVI.	109
TANTALUM. On the identity of columbium and tantalum.	*Dr. Wollaston.*	XCIX.	246
TATTIES. Their use in cooling rooms.	*Williams.*	LXXXIII.	131
TEAS.* On the infusions of them.	*H. Davy.*	XCIII.	268
TEETH.* A description of the teeth of the anarrhichas lupus, and of those of the chætodon nigricans; with an attempt to prove that the teeth of cartilaginous fishes are perpetually renewed.	*André.*	LXXIV.	274
Observations on the different species of Asiatic elephants, and their mode of dentition.	*Corse.*	LXXXIX.	205
Observations on the structure of the teeth of graminivorous quadrupeds, particularly those of the elephant and sus æthiopicus	*Home.*	——	237
Observations on the structure, and mode of growth, of the grinding teeth of the wild boar and animal incognitum.	*Home.*	XCI.	319
On the tusks of the narwhale.	*Home.*	CIII.	126
A description of the teeth of the delphinus Gangeticus.	*Home.*	CVIII.	417
On the milk tusks of the dugong.	*Home.*	CX.	144
TELESCOPES.* Improvements in the construction of them.	*Herschel.*	LXXII.	89
Double stars of use in trying them.	*Herschel.*	——	101
Description of a system of wires in the focus.	*F. Wollaston.*	LXXV.	347
Description of a forty feet reflecting telescope.	*Herschel.*	LXXXV.	347

	Vol.	Page.
TELESCOPE.* On the power of penetrating into space by telescopes, with a comparative determination of that power. *Herschel.*	XC.	49
On a method of viewing the sun advantageously with telescopes of large apertures and highly magnifying powers. *Herschel.*	—	255
On ascertaining how far telescopes will enable us to determine very small angles. *Herschel.*	XCV.	31
On the light of the Cassegrainian telescope compared with that of the Gregorian. *Kater.*	CIII.	206
Farther experiments on the above subject. *Kater.*	CIV.	231
Account of a telescopic apparatus. *Herschel.*	CV.	293
Astronomical observations selected for investigating how far the power of our telescopes may be expected to reach into space. *Herschel.*	CVIII.	429
TELLURETTED HYDROGEN. A name given to a compound of tellurium and hydrogen. *H. Davy.*	C.	28
TEMPERATURE.* On the temperature of the earth below the surface in different climates. *Hunter.*	LXXVIII.	53
On the temperature of the ocean and atmosphere made during a voyage to Ceylon. *J. Davy.*	CVII.	275
On the specific gravity and temperature of sea waters in different parts of the ocean, and in particular seas. *Marcet.*	CIX.	161
TENDRILS. On the motions of the tendrils of plants. *T. A. Knight.*	CII.	314
TENTACULA. Animals with tentacula consist of an almost infinite variety. *Hunter.*	LXXV.	343
TEREBELLA. A double coned one found at Bamff, in Scotland. *Hunter.*	——	343
TEREDO. On the teredo gigantea and navalis of the Island of Sumatra. *Griffiths.*	XCVI.	269

		Vol.	Page.
TEREDO. On the shell and anatomy of the teredo navalis.	*Home.*	XCVI.	276
TERMITES. Some account of the termites which are found in Africa and other hot climates.	*Smeathman.*	LXXI.	139
TERRA AUSTRALIS. Analysis of an earthy substance so called.	*Hatchett.*	LXXXVIII.	110
TERRA JAPONICA. Experiments on catechu, or terra japonica.	*H. Davy.*	XCIII.	252
TERRA PONDEROSA. Experiments and observations on it.	*Withering.*	LXXIV.	293
TEST. On a method of preparing a test liquor to show the presence of acids in alkalis.	*Watt.*	——	419
THALES.* On the solar eclipse which is said to have been predicted by Thales.	*F. Baily.*	CI.	220
THEOREM. On a remarkable application of Cotes's theorem.	*J. F. W. Herschel.*	CIII.	8
THERMOMETER.* Account of an improved thermometer.	*Six.*	LXXII.	72
An attempt to make a thermometer for measuring the higher degrees of heat.	*Wedgwood.*	——	305
An attempt to compare and connect the thermometer for strong fire with the mercurial ones.	*Wedgwood.*	LXXIV.	358
Additional observations on the same subject.	*Wedgwood.*	LXXVI.	390
Description of an instrument called a passage thermometer.	*Count Rumford.*	LXXXII.	51
Description of some particular thermometers.	*Count Rumford.*	XCIV.	78
Description of a thermometrical barometer for measuring altitudes.	*F. J. H. Wollaston.*	CVII.	183

		Vol.	Page.
THERMOMETRICAL EXPERIMENTS. I. Relating to cold produced by the evaporation of fluids. II. Relating to the expansion of mercury. III. Description of a thermometrical barometer.	*Cavallo.*	LXXI.	509
THERMOSCOPE.* Description of an instrument so called.	*Count Rumford.*	XCIV.	101
THIBET.* The mountains of Thibet are the sources of the Ganges and Burrampooter.	*Rennell.*	LXXI.	88
An account of the vegetable and mineral productions of Boutan and Thibet.	*Saunders.*	LXXIX.	79
THUNDER.* An account of a thunder storm in Scotland.	*Brydone.*	LXXVII.	61
Remarks on the above.	*Lord Stanhope.* ——		130
TIC DOULEUREUX. Remarks on a case of it.	*Home.*	XCI.	20
TIDES.* An account of the tides at Naples.	*Blagden.*	LXXXIII.	168
On the peculiarity of the tides between Fairleigh and the North Foreland, with an explanation of the supposed meeting of the tides near Dungeness.	*Anderson.*	CIX.	217
TIN.* An account of the Relistian tin mine.	*Carne.*	XCVII,	293
TITLARK. Selected by the cuckoo to take charge of its young.	*Jenner.*	LXXVIII.	223
TOAD-STONE. An analysis of the Rowley rag-stone, and the toad-stone.	*Withering.*	LXXII.	327
TOES.* An account of a family having hands and feet with supernumerary fingers and toes.	*Carlisle.*	CIV.	94
TONGUE.* Galvanic experiments on the human tongue and that of quadrupeds.	*Volta.*	LXXXIII.	42
Observations on the structure of the tongue, and a case in which a portion of that organ has been removed by ligature.	*Home.*	XCIII.	205

		Vol.	Page.
TORPEDO.* Its battery governed by a voluntary muscle.	*Carlisle.*	XCV.	11
Experiments on that of the Cape of Good Hope, in 1812.	*Todd.*	CVI.	120
Experiments on the torpedo electricus at la Rochelle.	*Todd.*	CVII.	32
TOURMALIN.* Remarks on the quality found in Ceylon.	*Bournon.*	XCII.	313
TRANSIT. (Of Mercury) Observations on its transit over the sun, in 1782, in Ireland.	*J. A. Hamilton.*	LXXIII.	453
Observations on ditto, at the Royal Observatory at Paris, with remarks on the apparent refraction in the atmosphere of Mercury.	*Wallet.*	LXXIV.	312
Observations on ditto, at Louvain, May 3, 1786.	*Pigott.*	LXXVI.	384
Farther observations by the same.	*Pigott.*	——	389
Observations made at Dresden, May 4, 1786.	*Köhler.*	LXXVII.	47
Observations made at Petersburg, May 3, 1786.	*Rumovski.*	——	48
Observations of the transit of Mercury, the 9th November, 1802.	*Herschel.*	XCIII.	214
TRAPEZIUM. On trapeziums inscribed in circles, and non-inscribed.	*Hey.*	CIV.	348
TRAVELS.* An account of a voyage to the Island of Ponza.	*Hamilton.*	LXXVI.	365
TREES.* A farther account of the usefulness of washing the stems of trees.	*Marsham.*	LXXI.	449
An account of a new species of the bark-tree found in the Island of Santa Lucia.	*Davidson.*	LXXIV.	452
An account of the sensitive quality of the tree averrhoa Carambola.	*Bruce.*	LXXV.	356
Description of the Benjamin tree of Sumatra.	*Dryander.*	LXXVII.	307

		Vol.	Page.
TREES.* On the annual growth of trees.	*Barker.*	LXXVIII.	408
Observations on the grafting of trees.	*T. A. Knight.*	LXXXV.	290
A supplement to the measures in trees, printed in Vol. LI. 7.	*Marsham.*	LXXXVII.	128
On the recovery of injured trees.	*Barker.*	LXXXIX.	26
On the quantity of tanning principle in the bark of various trees.	*Biggin.*	——	259
Some experiments on the ascent of sap in trees.	*T. A. Knight.*	XCI.	333
Some experiments on the descent of the sap in trees.	*T. A. Knight.*	XCIII.	277
Experiments on the motion of the sap in trees.	*T. A. Knight.*	XCIV.	183
Concerning the state in which the true sap of trees is deposited during winter.	*T. A. Knight.*	XCV.	88
On the inverted action of the alburnous vessels of trees.	*T. A. Knight.*	XCVI.	293
On the formation of the bark of trees.	*T. A. Knight.*	XCVII.	103
On the origin and office of the alburnum of trees.	*T. A. Knight.*	XCVIII.	313
On the origin and formation of roots.	*T. A. Knight.*	XCIX.	169
On the parts of trees primarily impaired by age.	*T. A. Knight.*	C.	178
On the causes which influence the direction of the growth of roots.	*T. A. Knight.*	CI.	209
On the expansion and contraction of timber in different directions relative to the position of the medulla.	*T. A. Knight.*	CVII.	269
On the office of the heart wood of trees.	*T. A. Knight.*	CVIII.	137
TRIGONOMETRY.* An account of the measurement of a base on Hounslow Heath.	*Roy.*	LXXV.	385

		Vol.	Page.
Trigonometry.* An account of the mode proposed to be followed in determining the relative situation of the Royal Observatories of Greenwich and Paris.	*Roy.*	LXXVII.	188
Appendix to the above.	*Roy.*	——	465
An account of the trigonometrical operation whereby the distance between the meridians of Greenwich and Paris has been determined.	*Roy.*	LXXX.	111
Remarks on the above operation.	*Dalby.*	——	593
The latitudes and longitudes of several places in Denmark calculated from trigonometrical operations.	*Bugge.*	LXXXIV.	43
An account of the trigonometrical survey of Great Britain.	*Ordnance.*	LXXXV.	414
On the trigonometrical functions of circular arches.	*L'Huilier.*	LXXXVI.	142
An account of the trigonometrical survey of Great Britain continued.	*Ordnance.*	LXXXVII.	432
Ditto, continued.	*Ordnance.*	XC.	539
An account of the measurement of an arc of the meridian, from Dunnose in the Isle of Wight, to Clifton in Yorkshire.	*Mudge.*	XCIII.	383
Trinidad. An account of a bituminous lake, or plain, in the Island of Trinidad.	*Anderson.*	LXXIX.	65
Tropics.* Observations on a diurnal variation of the barometer between the tropics.	*Horsburgh.*	XCV.	177
Tumour.* On a tumour found in the human placenta.	*Clarke.*	LXXXVIII.	361
Turkey.* An account of the turkey.	*Pennant.*	LXXI.	67
Turnsol. Its colouring matter.	*Smithson.*	CVIII.	110
Tusk. On the tusks of the narwhale.	*Home.*	CIII.	126
On the milk tusks of the dugong.	*Home.*	CX.	144

	Vol.	Page.
TWILIGHT. Observations on that of Venus. *Schröeter.*	LXXXII.	309
Ditto of the moon. - - *Schröeter.*	——	337
TYGER-CAT. Natural history and description of the tyger-cat of the Cape of Good Hope. *Forster.*	LXXI.	1

U

ULM URI

		Vol.	Page.
Ulmin. On a substance from the elm tree called ulmin.	*Smithson.*	CIII.	64
Upas. Experiments with the upas antiar.	*Brodie.*	CI.	196
Uran glimmer. Remarks on two species of uran glimmer.	*Gregor.*	XCV.	331
Urethra. On the internal structure of the human urethra.	*Home.*	CX.	183
Urine. On the changes which blood undergoes when extravasated into the urinary bladder, and retained for some time in that viscus mixed with urine.	*Home.*	LXXXVI.	486
On gouty and urinary concretions.	*Wollaston.*	LXXXVII.	386
Experiments and observations tending to show the composition and properties of urinary concretions.	*Pearson.*	LXXXVIII.	15
An account of some peculiarities in the urine of the camel.	*Home.*	XCVI.	357
On the differences in the structure of calculi, which arise from their being formed in different parts of the urinary passages.	*Home.*	XCVIII.	223
Some remarks on the composition of urine.	*Brande.*	C.	136
Remarks upon the influence of acids upon the composition of urine.	*Brande.*	CIII.	213
On the urinary organs and secretions of some of the amphibia.	*J. Davy.*	CVIII.	303

Vol. Page.

UTERUS.* Experiments in which, on the third day after impregnation, the ova of rabbits were found in the fallopian tubes, and on the fourth day in the uterus itself, with the first appearances of the fœtus. - - *Cruikshank.* LXXXVII. 197

On the passage of the ovum from the ovarium to the uterus in women. - - *Home.* CVII. 252

On a mal-conformation of the uterine system in women, and conclusions to be derived from it. *Granville.* CVIII. 308

V

VAL VEL

		Vol.	Page
VALUES. On the method of correspondent values, &c. - - -	*Waring.*	LXXIX.	166
The method of correspondent values affords a resolution of the problems contained in Mr. Briggs's or Sir Isaac Newton's method of differences. - -	*Waring.*	LXXIX.	177
VEGETABLES.* On the influence of the vegetable kingdom on the animal creation.	*Ingenhousz.*	LXXII.	426
Observations on the irritability of vegetables.	*Smith.*	LXXVIII.	158
An account of the vegetable and mineral productions of Boutan and Thibet.	*Saunders.*	LXXIX.	79
Some experiments on the fecundation of vegetables. - - - -	*T. A. Knight.*	LXXXIX.	195
Observations on the parts of astringent vegetables, and their operation in tanning.	*H. Davy.*	XCIII.	233
On the change of some of the proximate principles of vegetables into bitumen.	*Hatchett.*	XCIV.	385
Of a newly discovered vegetable acid.	*Donovan.*	CV.	231
On an astringent vegetable substance from China.	*Brande.*	CVII.	39
VEGETATION.* On the direction of the radicle and germen during the vegetation of seeds.	*T. A. Knight.*	XCVI.	99
VELOCITY.* A new method of determining the velocities of all kinds of military projectiles.	*Thompson.*	LXXI.	229

		Vol.	Page.
Velocity.* A method of determining the velocity of the rays of light in every medium whose refractive density is known.	*Wilson.*	LXXII.	58
On the direction and velocity of the motion of the sun and solar system.	*Herschel.*	XCV.	233
Ventotienne. Some particulars of the birds, and of some Roman tiles found in the Island of Ventotienne.	*Hamilton.*	LXXVI.	371
Venus.* Astronomical observations on the planets Venus and Mars, made with a view to determine the heliocentric longitude of their nodes, the annual motion of the nodes, and the greatest inclination of their orbits.	*Bugge.*	LXXX.	21
Observations on the atmospheres of Venus and the Moon, their respective densities, perpendicular heights, and the twilight occasioned by them.	*Schröeter.*	LXXXII.	309
Observation on Venus.	*Herschel.*	LXXXIII.	201
Observations in farther proof of the mountainous inequalities, rotation, atmosphere, and twilight, of the planet Venus.	*Schröeter.*	LXXXV.	117
On the perturbation of her motion.	*Hellins.*	LXXXVIII.	527
Vermes.* On the structure of the organs of respiration in animals which appear to hold an intermediate place between those of the class pisces and class vermes, and in two genera of the last-mentioned class.	*Home.*	CV.	256
An account of the circulation of the blood in the class vermes of Linnæus, and the principle explained in which it differs from that in the higher classes.	*Home.*	CVII.	1
Distinguishing characters between the ova of the sepia and those of the vermes testacea.	*Home.*	—	297
Vertebræ.* On the nature of the intervertebral substance in fish and quadrupeds.	*Home.*	XCIX.	177

		Vol.	Page.
VERTEBRÆ.* On the structure of those of the proteosaurus.	*Home.*	CX.	160
VESTA. Observations and measurements of the planet Vesta.	*Schröeter.*	XCVII.	245
VESUVIUS.* On the state of Mount Vesuvius in 1786, with the account of a journey into the province of Abruzzo, and a voyage to the Island of Ponza.	*Hamilton.*	LXXVI.	365
An account of the eruption of Vesuvius in 1794.	*Hamilton.*	LXXXV.	73
On a saline substance from Mount Vesuvius.	*Smithson.*	CIII.	256
VIBRATION. Investigations, founded on the theory of motion, for determining the times of vibration of watch balances.	*Atwood.*	LXXXIV.	119
VINE.* Effects of artificial heat on it.	*T. A. Knight.*	XCI.	343
Experiments on its leaves.	*T. A. Knight.*	—	346
VISCERA. An account of a remarkable transposition of the viscera.	*Baillie.*	LXXVIII.	350
Account of two instances of uncommon formation in the viscera of the human body.	*Abernethy.*	LXXXIII.	59
VISION.* On the cause of that indistinctness of vision which has been ascribed to the smallness of the optic pencil.	*Herschel.*	LXXVI.	500
An attempt to explain a difficulty in the theory of vision, depending on the different refrangibility of light.	*Maskelyne.*	LXXIX.	256
Observations on vision.	*Young.*	LXXXIII.	169
Observations on vision.	*Hosack.*	LXXXIV.	196
Remarks on double vision.	*Home.*	LXXXVII.	7
Observations and experiments on vision.	*Wells.*	CI.	378
Observations relative to the near and distant sight of different persons.	*Ware.*	CIII.	31
Appendix to the above.	*Blagden.*	—	110

	Vol.	Page.
VOLCANO.* An account of three volcanos in the moon. - - - *Herschel.*	LXXVII.	229
Some account of the strata and volcanic appearances in the North of Ireland and Western Islands of Scotland. - - *Mills.*	LXXX.	73
A narrative of the eruption of a volcano in the sea off the Island of St. Michael. *Tillard.*	CII.	152
VOLTAISM. Experiments performed with a view to ascertain the most advantageous method of constructing a voltaic apparatus for the purposes of chemical research. - *Children.*	XCIX.	32
An account of some experiments with a large voltaic battery. - - *Children.*	CV.	363

W

WAG WAT

		Vol.	Page.
WAGTAIL, WATER. Nest chosen by a cuckoo to lay her egg in. - - -	*Jenner.*	LXXVIII.	223
WALES.* An account of several earthquakes felt in Wales. - - -	*Pennant.*	LXXI.	193
WATER.* (Chemistry) On the constituent parts of water and dephlogisticated air. -	*Watt.*	LXXIV.	329
Sequel to the above. -	*Watt.*	——	354
On the production of dephlogisticated air from water with various substances.	*Rumford.*	LXXVII.	84
Experiments on the cooling of water below its freezing point. - -	*Blagden.*	LXXVIII.	125
Experiments on the effect of various substances in lowering the point of congelation in water.	*Blagden.*	——	277
On its compressibility. -	*Perkins.*	CX.	324
(Mineral) Observations on the sulphur wells at Harrogate. - -	*Bp. of Landaff.*	LXXVI.	171
Analysis of the water of Kilburn Wells.	*Schmeisser.*	LXXXII.	115
(Natural history) On the heat of the water in the Gulph stream. - -	*Blagden.*	LXXI.	334
An account of an artificial spring of water.	*Darwin.*	LXXV.	1
Analysis of the water of the Mere of Diss.	*Hatchett.*	LXXXVIII.	567
Analysis of the waters of the Dead Sea and the River Jordan. -	*Marcet.*	XCVII.	296

		Vol.	Page.
Wavellite. On a fossil from Devonshire so called.	*H. Davy.*	XCV.	155
Waves. Their force upon a ship.	*Young.*	CIV.	309
Wax.* Observations and experiments on a wax-like substance resembling the pé-la of the Chinese, collected at Madras by Dr. Anderson, and called by him white lac.	*Pearson.*	LXXXIV.	383
An account of a vegetable wax from Brazil.	*Brande.*	CI.	261
Weight.* Some experiments on the loss of weight in bodies on being melted or heated.	*Fordyce.*	LXXV.	361
On the cause of the additional weight which metals acquire by being calcined.	*Fordyce.*	LXXXII.	374
Tables for reducing the quantities by weight in any mixture of pure spirit and water to those by measure.	*Gilpin.*	LXXXIV.	275
An account of some endeavours to ascertain a standard of weight and measure.	*Evelyn.*	LXXXVIII.	133
Welding. On welding cast steel.	*Frankland.*	LXXXV.	296
Well.* Account of the appearance of the soil at opening a well at Hanby, in Lincolnshire.	*Englefield.*	LXXI.	345
Descriptions of the King's wells at Sheerness, Languard Fort, and Harwich.	*Page.*	LXXIV.	6
Observations on the sulphur wells at Harrogate, in 1783.	*Bp. of Landoff.*	LXXVI.	171
Some observations on the heat of wells and springs in the Island of Jamaica, and on the temperature of the earth below the surface in different climates.	*Hunter.*	LXXVIII.	53
An account of the means employed to obtain an overflowing well.	*Vulliamy.*	LXXXVII.	325
Whale.* Observations on the structure and economy of whales.	*Hunter.*	LXXVII.	371
An account of ambergris found in spermaceti whales.	*Coffin.*	LXXXI.	43

		Vol.	Page.
Whale.* Some particulars in the anatomy of a whale.	*Abernethy.*	LXXXVI.	27
Observations on the structure of the different cavities which constitute the stomach of the whale, compared with those of ruminating animals, with a view to ascertain the situation of the digestive organ.	*Home.*	XCVII.	93
An anatomical account of the squalus maximus, which in the structure of its stomach forms an intermediate link between the whale tribe and cartilaginous fishes.	*Home.*	XCIX.	212
An account of some peculiarities in the structure of the organ of hearing in the balæna mysticetus.	*Home.*	CII.	83
Wild boar. On the structure and mode of growth of the grinding teeth of the wild boar and animal incognitum.	*Home.*	XCI.	319
Willow.* On the infusions of the bark of the Leicester willow.	*H. Davy.*	XCIII.	260
On the infusions of the bark of the common willow.	*H. Davy.*	—	266
Wind.* On the effect of westerly winds in raising the level of the British channel.	*Rennell.*	XCIX.	400
Wine. A table exhibiting the relative proportion of pure alcohol in several kinds of wine.	*Brande.*	CI.	337
Winter.* Observation of the winter solstice of 1812 with the mural circle.	*Pond.*	CIII.	123
Wires.* A description of a new system of wires in the focus of a telescope, for observing the comparative right ascension and declinations of celestial objects.	*F. Wollaston.*	LXXV.	347
A method of drawing extremely fine wires.	*Dr. Wollaston.*	CIII.	114
Witch meal, or semen lycopodii. Its extraordinary properties.	*Thompson.*	LXXXII.	66

Vol. Page.

WOLF.* Observations tending to show that the wolf, jackal, and dog, are all of the same species. *Hunter.* LXXVII. 253

A supplementary letter on the same subject. *Hunter.* LXXIX. 160

WOMAN.* An account of a woman washed into the sea by a wave. - - *Hamilton.* LXXIII. 204

WOMB.* Account of a child who had the small-pox in the womb. - - *Wright.* LXXI. 372

WOMBAT. An account of some peculiarities in the anatomical structure of the wombat, with observations on the female organs of generation. *Home.* XCVIII. 304

WOORARA. Its effects on the animal economy. *Brodie.* CI. 194

WOOTZ. Experiments and observations to investigate the nature of a kind of steel manufactured at Bombay, and there called wootz, with remarks on the properties and composition of the different states of iron. - *Pearson.* LXXXV. 322

Experiments on wootz. - - *Mushet.* XCV. 163

Y

YEA YOU

		Vol.	Page
YEAR.	On the year of the Fantee nation.	*Dobson.* LXXI.	56
	On the civil year of the Hindoos, and its divisions, with an account of three Hindoo almanacs.	*Cavendish.* LXXXII.	383
YOULGREAVE.	An account of a stag's head and horns found at Alport, in the parish of Youlgreave, in Derbyshire.	*Barker.* LXXV.	353

Z

ZEO ZOO

		Vol.	Page.
ZEOLITE. On a mineral substance formerly supposed to be zeolite.	*Gregor.*	XCV.	331
On the composition of zeolite.	*Smithson.*	CI.	171
ZINC.* Experiments on the cause of the additional weight which metals acquire by being calcined.	*Fordyce.*	LXXXII.	375
On its combination with chlorine.	*J. Davy.*	CII.	185
ZINCANE. The name given to a compound of Zinc and chlorine.	*J. Davy.*	—	186
ZIRCONE. Experiments on its decomposition.	*H. Davy.*	XCVIII.	352
Its peculiar relation to water.	*J. Davy.*	CII.	415
ZONE-CLOCK. Description of it.	*Herschel.*	LXXXV.	399
ZOOPHYTES.* Chemical experiments on zoophytes, with some observations on the component parts of membrane.	*Hatchett.*	XC.	327

A CONTINUATION

TO THE

ALPHABETICAL INDEX

OF

THE WRITERS IN THE PHILOSOPHICAL TRANSACTIONS,

From { Vol. LXXI. to Vol. CX. } Inclusive.
{ The Year 1781 to The Year 1820. }

N. B. An Asterisk is prefixed to the names of those Authors who had presented papers which are inserted in the preceding Index to the Transactions of the Royal Society.

A

ABB ALL

	Vol.	Page.
ABBS, Rev. COOPER. Observations on the remarkable failure of haddocks on the coasts of Northumberland, Durham, and Yorkshire.	LXXXII.	367
ABERNETHY, JOHN. Account of two instances of uncommon formation in the viscera of the human body. - - - -	LXXXIII.	59
Some particulars in the anatomy of a whale.	LXXXVI.	27
Observations on the foramina thebesii of the heart. - - -	LXXXVIII.	103
ALCHORNE,* STANESBY. Experiments on mixing gold with tin. - - -	LXXIV.	463
ALLEN, WILLIAM. On the quantity of carbon in carbonic acid, and on the nature of the diamond.	XCVII.	267
On the changes produced in atmospheric air and oxygen gas by respiration. -	XCVIII.	249
On respiration. - - -	XCIX.	404

	Vol.	Page.
ALLMAN, WILLIAM, M. D. Methods of clearing equations of quadratic, cubic, quadratocubic, and higher surds.	CIV.	23
ANDERSON, ALEXANDER. An account of a bituminous lake or plain in the Island of Trinidad.	LXXIX.	65
ANDERSON, JAMES. An account of Morne Garou, a mountain in the Island of St. Vincent, with a description of the volcano on its summit.	LXXV.	16
An account of a monster of the human species.	LXXIX.	157
ANDERSON, JAMES, Capt. R. N. On the peculiarities of the tides between Fairleigh and the North Foreland; with an explanation of the supposed meeting of the tides near Dungeness.	CIX.	217
ANDRÉ, WILLIAM. A microscopic description of the eyes of the monoculus polyphemus Linnæi.	LXXII.	440
A description of the teeth of the anarrhichas lupus Linnæi, and of those of the chætodon nigricans of the same author; to which is added, an attempt to prove that the teeth of cartilaginous fishes are perpetually renewed.	LXXIV.	274
ANSPACH, H. S. H. The Margrave of. Account of some remarkable caves in the principality of Bayreuth, and of the fossil bones found therein.	LXXXIV.	402
ATKINS, JOHN. Meteorological journal for the year 1782, kept at Minehead, in Somersetshire.	LXXIV.	58
ATWOOD, GEORGE, M. A. A general theory for the mensuration of the angle subtended by two objects.	LXXI.	395
Investigations founded on the theory of motion, for determining the times of vibration of watch balances.	LXXXIV.	119
The construction and analysis of geometrical propositions determining the positions assumed by homogeneal bodies which float freely, and at rest, on a fluid's surface; also determining the stability of ships and of other floating bodies.	LXXXVI.	46

	Vol.	Page.
ATWOOD, GEORGE, M. A. A disquisition on the stability of ships. - - - -	LXXXVIII.	201
AUBERT,* ALEXANDER. An account of the meteors of August 18, and October 4, 1783. -	LXXIV.	112
AUSTIN, Rev. GILBERT. On a new construction of a condenser and air-pump. - -	CIII.	138
AUSTIN, WILLIAM, M.D. Experiments on the formation of volatile alkali, and on the affinities of the phlogisticated and light inflammable airs. - - - - - -	LXXVIII.	379
Experiments on the analysis of the heavy inflammable air. - - - - -	LXXX.	51

B

	Vol.	Page.
BABBAGE, CHARLES. An essay towards the calculus of functions. - - - -	CV.	389
Another essay, as above. - - - -	CVI.	179
Observations on the analogy which subsists between the calculus of functions and other branches of analysis. - - -	CVII.	197
On some new methods of investigating the sums of several classes of infinite series. -	CIX.	249
BAILLIE, MATTHEW, M. D. An account of a remarkable transposition of the viscera. - -	LXXVIII.	350
An account of a particular change of structure in the human ovarium. - - -	LXXIX.	71
BAILY, FRANCIS. On the solar eclipse which is said to have been predicted by Thales. -	CI.	220
BARKER, Rev. ROBERT. An account of a stag's head and horns found at Alport, in the county of Derby. - - - - - -	LXXV.	353
BARKER,* THOMAS. Abstract of a register of the barometer, thermometer, and rain, at Lyndon, in Rutland, 1780. - - -	LXXI.	351
Register as above, for 1781. - - -	LXXII.	281
Register as above, for 1782. - -	LXXIII.	242
Register as above, for 1783. - - -	LXXIV.	283
Register as above, for 1784; also of the rain at different places. - - -	LXXV.	481
Register as above, for 1785. - -	LXXVI.	236
Register as above, for 1786. - -	LXXVII.	368

	Vol.	Page.
BARKER,* THOMAS. Abstract of a register of the barometer, thermometer, and rain at Lyndon, in Rutland, for 1787; also of the rain at different places; and some account of the annual growth of trees.	LXXVIII.	408
Register as above, for 1788; also of rain at different places.	LXXIX.	162
Register as above, for 1789.	LXXXI.	89
Register as above, for 1790.	——	278
Register as above, for 1791.	LXXXII.	362
Register as above, for 1792; and a comparison of wet seasons.	LXXXIII.	220
Register as above, for 1793.	LXXXIV.	174
Register as above, for 1794.	LXXXV.	410
Register as above, for 1795.	LXXXVI.	483
Register as above, for 1796.	LXXXVIII.	130
Register as above, for 1797; with some remarks on the recovery of injured trees.	LXXXIX.	24
Register as above, for 1798.	XC.	46
BAUER, FRANCIS. Some experiments on the fungi which constitute the colouring matter of the red snow discovered in Baffin's Bay.	CX.	165
BAXTER, ALEXANDER. Description of a set of halo's and parhelia, seen in the year 1771, in North America.	LXXVII.	44
BEDDOES, THOMAS, M. D. An account of some new experiments on the production of artificial cold.	LXXVII.	282
Observations on the affinity between basaltes and granite.	LXXXI.	48
An account of some appearances attending the conversion of cast into malleable iron.	——	173
Farther observations on the process for converting cast into malleable iron.	LXXXII.	257

	Vol.	Page.
Bell, William. Description of the double-horned rhinoceros of Sumatra.	LXXXIII.	3
Description of a species of chætodon, called by the Malays ecanbonna.	——	7
Bennet, Rev. Abraham. Description of a new electrometer.	LXXVII.	26
Appendix to the above description.	——	32
An account of a doubler of electricity, or a machine by which the least conceivable quantity of positive or negative electricity may be continually doubled, till it becomes perceptible by common electrometers or visible in sparks.	——	288
A new suspension of the magnetic needle, intended for the discovery of minute quantities of magnetic attraction; also an air vane of great sensibility, with new experiments on the magnetism of iron filings and brass.	LXXXII.	81
Berzelius, J., M. D. Experiments on the alcohol of sulphur, or sulphuret of carbon.	CIII.	171
Biggin, George. Experiments to determine the quantities of tanning principle and gallic acid contained in the bark of various trees.	LXXXIX.	259
Blagden,* Sir Charles, M. D. On the heat of the water in the Gulph stream.	LXXI.	334
History of the congelation of quicksilver.	LXXIII.	329
An account of some fiery meteors, and observations.	LXXIV.	201
Some observations on ancient inks, with the proposal of a new method of recovering the legibility of decayed writings.	LXXVII.	451
Experiments on the cooling of water below its freezing point.	LXXVIII.	125
Experiments on the effect of various substances in lowering the point of congelation in water.	——	277

	Vol.	Page.
BLAGDEN,* Sir CHARLES, M. D. Report on the best method of proportioning the Excise upon spirituous liquors. - - -	LXXX.	321
Supplementary report to the above. - -	LXXXII.	425
Some account of the tide at Naples. -	LXXXIII.	168
An appendix to Mr. WARE's paper on vision.	CIII.	110
BLAND, ROBERT, M. D. Midwifery reports of the Westminster General Dispensary. - -	LXXI.	355
BLANE, GILBERT, M. D. Account of the nardus Indica, or spikenard. - - -	LXXX.	284
BLANE, WILLIAM. Some particulars relative to the production of borax. - - -	LXXVII.	297
BLUMENBACH, JOHN FREDERICK, M. D. Observations on some Egyptian mummies, opened in London in 1792. - - -	LXXXIV.	177
BRANDE, WILLIAM THOMAS. Chemical experiments on guaiacum. - - -	XCVI.	89
On the differences in the structure of calculi, which arise from their being formed in different parts of the urinary passages; and on the effects that are produced on them by the internal use of solvent medicines. - -	XCVIII.	223
Observations on albumen, and some other animal fluids, with remarks on their analysis by electro-chemical decomposition. - -	XCIX.	373
Observations on the effects of magnesia in preventing an increased formation of uric acid; with some remarks on the composition of the urine. - - - -	C.	136
An account of a vegetable wax from Brazil.	CI.	261
Experiments to ascertain the state in which spirit exists in fermented liquors; with a table, exhibiting the relative proportion of pure alcohol contained in several kinds of wine, and some other liquors. - - -	—	337

	Vol.	Page.
BRANDE, WILLIAM THOMAS. Chemical researches on the blood, and some other animal fluids. -	CII.	90
Additional remarks on the state in which alcohol exists in fermented liquors. - - -	CIII.	82
Additional observations on the effects of magnesia in preventing an increased formation of uric acid; with remarks on the influence of acids upon the composition of the urine. -	——	213
The Bakerian Lecture—on some new electro-chemical phenomena. - - -	CIV.	51
Observations on an astringent vegetable substance from China. - - -	CVII.	39
On the composition and analysis of the inflammable gaseous compounds resulting from the destructive distillation of coal and oil, with some remarks on their relative heating and illuminating powers. - - -	CX.	11
BRERETON, OWEN SALISBURY. An account of the violent storm of lightning at Eastbourn, in Sussex, 17th September, 1780. - -	LXXI.	42
BREWSTER, DAVID, LL.D. On some properties of light. - - - -	CIII.	101
On the affections of light transmitted through crystallized bodies. - - -	CIV.	187
On the polarization of light by oblique transmission through all bodies, whether crystallized or not. - - - -	—	219
On new properties of light exhibited in the optical phenomena of mother-of-pearl, and other bodies to which the superficial structure of that substance can be communicated. -	—	397
Results of some recent experiments on the properties impressed upon light by the action of glass raised to different temperatures, and cooled under different circumstances. -	—	436

	Vol.	Page.
BREWSTER, DAVID, LL. D. Additional observations on the optical properties and structure of heated glass and unannealed glass drops.	CV.	1
Experiments on the polarization of light exhibited by various mineral, animal, and vegetable bodies, with a reference of the phenomena in the general principles of polarization. -	—	29
On the effects of simple pressure in producing that species of crystallization which forms two oppositely polarized images, and exhibits the complementary colours by polarized light.	—	60
On the laws which regulate the polarization of light by reflection from transparent bodies.	—	125
On the multiplication of images, and the colours which accompany them, in some specimens of calcareous spar. - - -	—	270
On new properties of heat, as exhibited in its propagation along plates of glass. -	CVI.	46
On the communication of the structure of doubly refracting crystals to glass, muriate of soda, fluor spar, and other substances, by mechanical compression and dilatation. - -	—	156
On the structure of the crystalline lens in fishes and quadrupeds, as ascertained by its action on polarized light. - - -	—	311
On the laws of polarization and double refraction in regularly crystallized bodies. -	CVIII.	199
On the laws which regulate the absorption of polarized light by doubly refracting crystals.	CIX.	11
On the action of crystallized surfaces upon light.	—	145
On the optical and physical properties of tabasheer. - - - -	—	283
BRINKLEY, Rev. JOHN, D.D. An investigation of the general term of an important series in the inverse method of finite differences. -	XCVII.	114

	Vol.	Page
BRINKLEY, Rev. JOHN, D. D. On the annual parallax of α Lyræ.	C.	204
On the parallax of certain fixed stars.	CVIII.	275
The results of observations made at the Observatory of Trinity College, Dublin, for determining the obliquity of the ecliptic, and the maximum of the aberration of light.	CIX.	241
BRODIE, BENJAMIN COLLINS. An account of the dissection of a human fœtus, in which the circulation of the blood was carried on without a heart.	XCIX.	161
The Croonian Lecture—on some physiological researches respecting the influence of the brain on the action of the heart, and on the generation of animal heat.	CI.	36
Experiments and observations on the different modes in which death is produced by certain vegetable poisons.	—	178
Farther experiments on poisons.	CII.	205
Farther experiments on the influence of the brain on the generation of animal heat.	—	378
Experiments and observations on the influence of the nerves of the eighth pair on the secretions of the stomach.	CIV.	102
BROMHEAD, EDWARD FRENCH. On the fluents of irrational functions.	CVI.	335
BROOK, ABRAHAM. Account of a new electrometer.	LXXII.	384
BROUGHAM, HENRY. Experiments on the inflection, reflection, and colours of light.	LXXXVI.	227
Farther experiments on light as above.	LXXXVII.	352
General theorems, chiefly porisms, in the higher geometry.	LXXXVIII.	378
BROUSSONET, P. M. AUGUSTUS, M. D. An account of the ophidium barbatum Linnæi.	LXXI.	436

	Vol.	Page.
BRUCE, ROBERT, M.D. An account of the sensitive quality of the tree averrhoa Carambola, -	LXXV.	356
BRYDONE,* PATRICK. An account of a thunder storm in Scotland, with some meteorological observations. - - - -	LXXVII.	61
BUÉE, M. On imaginary quantities. - -	XCVI.	23
BUGGE,* THOMAS. Determination of the heliocentric longitude of the descending node of Saturn.	LXXVII.	37
Astronomical observations on the planets Venus and Mars, made with a view to determine the heliocentric longitude of their nodes, and the greatest inclination of their orbits. -	LXXX.	21
The latitudes and longitudes of several places in Denmark, calculated from the trigonometrical operations. - - - -	LXXXIV.	43
BURNEY, Captain JAMES. A memoir on the geography of the North-eastern part of Asia, and on the question whether Asia and America are contiguous, or are separated by the sea. -	CVIII.	9

C

	Vol.	Page
CAMPER, PETRUS, M. D. Conjectures relative to the petrifactions found in St. Peter's Mount, near Maestricht.	LXXVI.	443
CARLISLE, ANTHONY. Account of a peculiarity in the distribution of the arteries sent to the limbs of slow-moving animals, together with some other similar facts.	XC.	98
Account of a monstrous lamb.	XCI.	139
Continuation of an account on the arteries of slow-moving animals.	XCIV.	17
The Croonian Lecture—on muscular motion.	XCV.	1
The physiology of the stapes, one of the bones of the organ of hearing, deduced from a comparative view of its structure and uses in different animals.	——	198
The Croonian Lecture—on the arrangement and mechanical action of the muscles of fish.	XCVI.	1
An account of a family having hands and feet with supernumerary fingers and toes.	CIV.	94
CARNE, JOSEPH. An account of the Relistian tin mine.	XCVII.	293
CARSON, JAMES, M. D. On the elasticity of the lungs.	CX.	29
CASTLES, JOHN. Observations on the sugar ants.	LXXX.	346
CAVALLO,* TIBERIUS. Account of a luminous appearance in the heavens the 27th March, 1781.	LXXI.	329
An account of some thermometrical experiments.	——	509
Description of an improved air pump, and the account of some experiments made with it.	LXXIII.	435

	Vol.	Page.
CAVALLO,* TIBERIUS. Description of a meteor observed the 18th August, 1783.	LXXIV.	108
Magnetical experiments and observations.	LXXVI.	62
Magnetical experiments and observations.	LXXVII.	6
Of the methods of manifesting the presence and ascertaining the quality of small quantities of natural or artificial electricity.	LXXVIII.	1
On the temperament of those musical instruments in which the tones, keys, or frets, are fixed, as in the harpsichord, organ, guitar, &c.	——	238
Description of a new electrical instrument capable of collecting together a diffused or little condensed quantity of electricity.	——	255
Description of a simple micrometer for measuring small angles with the telescope.	LXXXI.	283
CAVENDISH, HENRY. An account of a new eudiometer.	LXXIII.	106
Observations on Mr. HUTCHINS's experiments for determining the degree of cold at which quicksilver freezes.	——	303
Experiments on air.	LXXIV.	119
Answer to Mr. KIRWAN's remarks upon the experiments on air.	——	170
Experiments on air.	LXXV.	372
An account of experiments made by Mr. JOHN M'NAB, in Hudson's Bay, relating to freezing mixtures.	LXXVI.	241
Another account as above.	LXXVIII.	166
On the conversion of a mixture of dephlogisticated and phlogisticated air into nitrous acid, by the electric spark.	——	261
On the height of the luminous arch which was seen on the 23d February, 1784.	LXXX.	101

	Vol.	Page.
CAVENDISH, HENRY. On the civil year of the Hindoos, and its divisions; with an account of three Hindoo almanacs belonging to Charles Wilkins.	LXXXII.	383
Experiments to determine the density of the earth.	LXXXVIII.	469
On an improvement in the manner of dividing astronomical instruments.	XCIX.	221
CHAULNES, DUC DE. Mémoire sur la maniere de preparer, avec le moins de perte possible, le sel fusible d'urine blanc, et pur, et l'acide phosphorique parfaitement transparent.	LXXIII.	288
CHENEVIX, RICHARD. Analysis of the arseniates of copper and of iron; likewise an analysis of the red octaedral copper ore of Cornwall; with remarks on some particular modes of analysis.	XCI.	193
Observations and experiments upon Dr. JAMES's powder, with a method of preparing, in the humid way, a similar substance.	—	375
Observations and experiments upon oxygenized and hyperoxygenized muriatic acid; and upon some combinations of the muriatic acid in its three states.	XCII.	126
Analysis of corundum and of some of the substances which accompany it; with observations on the affinities which the earths have been supposed to have for each other in the humid way.	—	327
Observations on the chemical nature of the humours of the eye.	XCIII.	195
Inquiries concerning the nature of a metallic substance under the title of Palladium.	—	290
On the action of platina and mercury upon each other.	XCV.	104
CHILDREN, JOHN GEORGE. An account of some experiments formed with a view to ascertain the most advantageous method of constructing a voltaic apparatus, for the purposes of chemical research.	XCIX	32

	Vol.	Page.
CHILDREN, JOHN GEORGE. An account of some experiments with a large voltaic battery. -	CV.	363
CLANNY, WILLIAM REID, M.D. On the means of procuring a steady light in coal mines, without the danger of explosion. - -	CIII.	200
CLARKE, JOHN, M.D. Description of an extraordinary production of human generation, with observations. - - - -	LXXXIII.	154
Account of a tumour found in the human placenta. - - - -	LXXXVIII.	361
CLARKE, JOSEPH, M.D. Observations upon some causes of the excess of the mortality of males above that of females. - -	LXXVI.	349
CLIFT, WILLIAM. Experiments to ascertain the influence of the spinal marrow on the action of the heart in fishes. - - - -	CV.	91
COMBE, CHARLES. Account of an elephant's tusk, in which the iron head of a spear was found imbedded. - - - -	XCI.	165
COOPER, ASTLEY. Observations on the effects which take place from the destruction of the membrana tympani of the ear. - -	XC.	151
Farther observations on ditto, with an account of an operation for the removal of a particular species of deafness. - - -	XCI.	435
COOPER, WILLIAM, D.D. Observations on a remarkable meteor seen on the 18th August, 1783.	LXXIV.	116
CORREA DE SERRA, JOSEPH, LL.D. On the fructification of the submersed algæ. - -	LXXXVI.	494
On a submarine forest on the East coast of England. - - -	LXXXIX.	145
CORSE, JOHN. Observations on the manners, habits, and natural history of the elephant. -	——	31
Observations on the different species of Asiatic elephants, and their mode of dentition. -	——	205

	Vol.	Page.
CRAWFORD, ADAIR, M.D. Experiments on the powers that animals possess of producing cold, when placed in certain circumstances.	LXXI.	479
Experiments and observations on the matter of cancer, and on the aerial fluids extricated from animal substances by distillation and putrefaction; together with some remarks on sulphureous hepatic air.	LXXX.	391
CRELLIUS,* D. LAURENTIUS. Nova experimenta chemica quæ ad penitiorem acidi e pinguedine eruti cognitionem valere videntur.	LXXII.	8
CRUIKSHANK, WILLIAM. Experiments on the nerves, particularly on their reproduction; and on the spinal marrow of living animals.	LXXXV.	177
Experiments in which, on the third day after impregnation, the ova of rabbits were found in the fallopian tubes, and on the fourth day after impregnation, in the uterus itself, with the first appearances of the fœtus.	LXXXVII.	197
CULLUM, Rev. Sir JOHN, Bart. An account of a remarkable frost on the 23d June, 1783.	LXXIV.	416
CURRIE, JAMES, M.D. An account of the remarkable effects of a shipwreck on the mariners; with experiments and observations on the influence of immersion in fresh and salt water, hot and cold, on the powers of the living body.	LXXXII.	199

D

DAL DAV

	Vol.	Page.
DALBY, ISAAC. Remarks on Major-General Roy's account of the trigonometrical operation.	LXXX.	593
The longitude of Dunkirk and Paris from Greenwich, deduced from the triangular measurement in 1787 and 1788, supposing the earth to be ellipsoid.	LXXXI.	236
An account of the trigonometrical survey carried on in the years 1791, 1792, 1793, and 1794.	LXXXV.	414
The above surveys continued in 1795 and 1796.	LXXXVII.	432
DA ROVATO, F. JOSEPH. Some observations on borax.	LXXVII.	301
DARWIN, ERASMUS, M. D. An account of an artificial spring of water.	LXXV.	1
Frigorific experiments on the mechanical expansion of air, explaining the cause of the great degree of cold on the summits of high mountains, the sudden condensation of aerial vapour, and of the perpetual mutability of atmospheric heat.	LXXVIII.	43
DARWIN, ROBERT WARING, M. D. New experiments on the ocular spectra of light and colours.	LXXVI.	313
DAVIDSON, GEORGE. Account of a new species of the bark tree found in the Island of St. Lucia.	LXXIV.	452
DAVY, EDMUND. On a new fulminating platinum.	CVII.	136
On some combinations of platinum.	CX.	108

	Vol.	Page.
Davy, Sir Humphry, LL.D. An account of some galvanic combinations formed by single metallic plates and fluids, analogous to the galvanic apparatus of M. Volta.	XCI.	397
On the constituent parts of astringent vegetables, and on their operation in tanning.	XCIII.	233
Analytical experiments on a mineral from Derbyshire, consisting of alumine and water.	XCV.	155
On analyzing stones containing fixed alkali, by means of boracic acid.	——	231
The Bakerian Lecture: on some chemical agencies of electricity.	XCVII.	1
The Bakerian Lecture: on some phenomena of chemical changes by electricity, and on the nature of alkaline bodies.	XCVIII.	1
Electro-chemical researches on earths, and observations on the amalgam procured from ammonia.	——	333
The Bakerian Lecture: new analytical researches in chemistry, with observations on chemical theory.	XCIX.	39
An appendix to the above Bakerian Lecture for 1808.	——	450
The Bakerian Lecture for 1809: electro-chemical researches on various bodies, and some combinations of hydrogen.	C.	16
On muriatic acid, with experiments on sulphur and phosphorus made in the laboratory of the Royal Institution.	—	231
The Bakerian Lecture: on oxymuriatic gas and oxygene, and on the chemical relations to inflammable bodies.	CI.	1
On a combination of oxymuriatic and oxygene gas.	—	155

	Vol.	Page.
DAVY, Sir HUMPHRY, LL. D. On combinations of phosphorus and sulphur, and other subjects of chemical inquiry.	CII.	405
On a new detonating compound.	CIII.	1
Some farther observations on a new detonating substance.	—	242
Some experiments and observations on the substances produced in different chemical processes on fluor spar.	—	263
An account of some new experiments on the fluoric compounds, with some observations on other objects of chemical enquiry.	CIV.	62
Some experiments on a new substance which becomes a violet coloured gas by heat.	—	74
Farther experiments and observations on iodine.	—	487
Some experiments on the combustion of the diamond and other carbonaceous substances.	—	557
Some experiments and observations on the colours used in painting by the ancients.	CV.	97
Some experiments on a solid compound of iodine and oxygene, and on its chemical agencies.	—	203
On the action of acids on the salts usually called hyperoxymuriates, and on the gases produced from them.	—	214
On the fire-damp of coal mines, and on methods of lighting the mines so as to prevent explosion.	CVI.	1
An account of an invention for giving light in explosive mixtures of fire-damp in coal mines, by consuming the fire-damp.	—	23
Farther experiments on the combustion of explosive mixtures confined by wire-gauze, with some observations on flame.	—	115

	Vol.	Page.
Davy, Sir Humphry, LL. D. Some researches on flame.	CVII.	45
Some new experiments and observations on the combustion of gaseous mixtures; with an account of a method of preserving a continued light in mixtures of inflammable gases and air without flame.	——	77
On the fallacy of the experiments in which water is said to have been formed by the decomposition of chlorine.	CVIII.	169
New experiments on some of the combinations of phosphorus.	——	316
Some observations on the formation of mists in particular situations.	CIX.	123
Davy, John. On a gaseous compound of carbonic oxide and chlorine.	CII.	144
An account of some experiments on the combinations of different metals and chlorine, &c.	—	169
An account of some experiments on different combinations of fluoric acid.	—	352
An account of some experiments on arterial heat.	CIV.	590
Observations on the temperature of the ocean and atmosphere on the density of sea water, made during a voyage to Ceylon.	CVII.	275
On the urinary organs and secretions of some of the amphibia.	CVIII.	303
De Bournon, James Louis, Count. Description of the arseniates of copper and of iron, from Cornwall.	XCI.	169
Description of the corundum stone, and its varieties, commonly known by the names of Oriental ruby, sapphire, &c.; with observations on some other mineral substances.	XCII.	233

	Vol.	Page.
De Bournon, James Louis, Count. Observations on a new species of hard carbonate of lime; also on a new species of oxide of iron.	XCIII.	325
Description of a triple sulphuret of lead, antimony, and copper, from Cornwall; with some observations upon the various modes of attraction which influence the formation of mineral substances, and upon the different kinds of sulphuret of copper.	XCIV.	30
De Bruhl, Count. Observations on the obscuration of the star Algol, by Palitch, a farmer.	LXXIV.	4
Farther observations on Algol.	——	5
De Celis, Don Michael Rubin. An account of a mass of native iron found in South America.	LXXVIII.	37
De Crell, Lawrence, M. D. On the decomposition of the acid of borax, or sedative salt.	LXXXIX.	56
De la Trobe. Meteorological journal of the weather at Nain and Okak, on the coast of Labradore.	LXXI.	197
De Luc, J. A. A second paper on hygrometry.	LXXXI.	1
Another paper on hygrometry.	——	389
On Evaporation.	LXXXII.	400
De Mendoza y Rios, Don Josef. On the principal problems of nautical astronomy.	LXXXVII.	43
On an improved reflecting circle.	XCI.	363
De Saussure, Theodore. Observations on the decomposition of starch at the temperature of the atmosphere, by the means of air and water.	CIX.	29
De Zach, Francis. Astronomical observations.	LXXV.	137
Dobson,* Matthew, M.D. An account of the harmattan, a singular African wind.	LXXI.	46
Donovan, M. On the nature and combinations of a newly discovered vegetable acid; with observations on the malic acid, and suggestions on the state in which acids may have previously existed in vegetables.	CV.	231

	Vol.	Page.
DRYANDER, JONAS. Botanical description of the Benjamin tree of Sumatra. - -	LXXVII.	307
DUPIN, CHARLES. On the construction of English vessels in their last improvements. -	CVII.	86

E

EAR EVE

	Vol.	Page.
EARLE, Sir JAMES. An account of a calculus from the human bladder of uncommon magnitude.	XCIX.	303
EDGWORTH, RICHARD LOVELL. Experiment upon the resistance of the air. - - - -	LXXIII.	136
An account of the meteor of the 18th Aug. 1783.	LXXIV.	118
ELLIOT, JOHN, M. D. Observations on the affinities of substances in spirits of wine. - - -	LXXVI.	155
ENGLEFIELD, Sir HENRY CHARLES, Bart. Appearance of the soil on opening a well. -	LXXI.	345
An observation on the variation of light in the star Algol. - - - - -	LXXIV.	1
EVELYN, Sir GEORGE SHUCKBURGH. An account of some endeavours to ascertain a standard of weights and measures. - - - -	LXXXVIII.	133

F

FAR FOR	Vol.	Page.
FAREY, JOHN, Sen. An account of the great Derbyshire denudation.	CI.	242
FAWKENER, WILLIAM. On the production of ambergris.	LXXXI.	43
FISHER, GEORGE. On the errors in longitude, as determined by chronometers at sea, arising from the action of the iron in the ships upon the chronometers.	CX.	196
FITZGERALD,* KEANE. Experiments with Chinese hemp seed.	LXXII.	46
FLINDERS, MATTHEW. Concerning the difference in the magnetic needle on board the Investigator, arising from an alteration in the direction of the ship's head.	XCV.	186
Observations upon the marine barometer, made during the examination of the coasts of New Holland and New South Wales, in the years 1801, 1802, and 1803.	XCVI.	239
FORDYCE,* GEORGE. An account of experiments on the loss of weight in bodies on being melted or heated.	LXXV.	361
An account of an experiment on heat.	LXXVII.	310
The Croonian Lecture: on muscular motion.	LXXVIII.	23
On the cause of the additional weight which metals acquire by being calcined.	LXXXII.	374
Account of a new pendulum.	LXXXIV.	2

	Vol.	Page.
FORSTER,* JOHN REINHOLD, LL. D. A natural history and description of the tyger cat of the Cape of Good Hope. - - - -	LXXI.	1
FRANKLAND, Sir THOMAS. On welding cast steel.	LXXXV.	296
FRANKLIN, J. An account of a luminous arch. -	LXXX.	46

G

GAL GOL

	Vol.	Page
GALVEZ, Comte de. On a manner of directing aerostatic machines. - - -	LXXIV.	469
GARRARD, WILLIAM. On a new property of the tangents of the three angles of a plane triangle.	XCVIII.	120
GARTHSHORE, MAXWELL, M. D. A remarkable case of numerous births, with observations. -	LXXVII.	344
GIBBES, GEORGE SMITH. On the conversion of animal muscle into a substance much resembling spermaceti. - - -	LXXXIV.	169
Another treatise on the same subject. -	LXXXV.	239
GIBSON, BENJAMIN. Description of an extraordinary human fœtus. - - - - -	C.	123
GILPIN, GEORGE. Appendix to Dr. BLAGDEN'S report on the Excise of spirituous liquors. -	LXXXII.	439
Tables for reducing the quantities, by weight, in any mixture of pure spirit and water, to those by measure; and for determining the proportion, by measure, of each of the two substances in such mixtures. - - -	LXXXIV.	275
Observations on the variation and on the dip of the magnetic needle, made at the apartments of the Royal Society, between the years 1786 and 1805 inclusive. - - -	XCVI.	385
GIORNI, Conte di. Account of a new kind of rain on Mount Etna, in 1781. - - -	LXXII.	1
GOLDINGHAM, JOHN. Eclipses of the satellites of Jupiter, observed at Madras. - -	XCVIII.	322

	Vol.	Page.
GOMPERTZ, BENJAMIN. The application of a method of differences to the species of series whose sums are obtained by Mr. LANDEN, by the help of impossible quantities.	XCVI.	147
A sketch of an analysis and notation applicable to the estimation of the value of life contingencies.	CX.	214
GOODRICKE, JOHN. A series of observations on, and a discovery of, the period of variation of light of the bright star in the head of Medusa, called Algol.	LXXIII.	474
On the period of the changes of light in the star Algol.	LXXIV.	287
Observations on a new variable star.	LXXV.	153
A series of observations on, and a discovery of, the period of the variation of light of the star marked δ by BAYER, near the head of Cepheus.	LXXVI.	48
GORSUCH,* Rev. WILLIAM. Extract of the register of the parish of Holy Cross, from Michaelmas 1770 to Michaelmas 1780.	LXXII.	53
GRANVILLE, AUGUSTUS BOZZI, M. D. On a mal-conformation of the uterine system in women; and on some physiological conclusions to be derived from it.	CVIII.	308
A case of the human fœtus found in the ovarium, of the size it usually acquires at the end of the fourth month.	CX.	101
GRAY, EDWARD WHITAKER, M. D. Observations on the manner in which glass is charged and discharged with the electric fluid.	LXXVIII.	121
Observations on the class of animals called by LINNÆUS amphibia; particularly on the means of distinguishing those serpents which are venomous from those which are not so.	LXXIX.	21
Account of an earthquake felt in various parts of England, November 18, 1795, with some observations thereon.	LXXXVI.	353

	Vol.	Page.
GREATOREX, THOMAS. Observations on the heights of mountains in the North of England. -	CVIII.	395
GREGOR, Rev. WILLIAM. Experiments on a mineral substance formerly supposed to be zeolite, with some remarks on two species of uran-glimmer.	XCV.	331
On a native arseniate of lead. - -	XCIX.	195
GREGORY, Rev. EDWARD. An account of the discovery of a comet, with observations thereon.	LXXXIII.	50
GRENVILLE, Rt. Hon. CHARLES. On the corundum stone from Asia. - - -	LXXXVIII.	403
An account of some stones said to have fallen on the earth in France; and of a lump of native iron said to have fallen in India. -	XCIII.	200
GRIFFITHS, J. Description of a rare species of worm shells discovered at an island lying off the north-west coast of the Island of Sumatra, in the East Indies. - - -	XCVI.	269
GROOMBRIDGE, STEPHEN. Observations on atmospherical refraction as it affects astronomical observations. - - - -	C.	190
Some farther observations on the same subject.	CIV.	337
Astronomical observations -	CX.	330

H

	Vol.	Page.
HAIGHTON, JOHN, M.D. An experimental inquiry concerning the reproduction of the nerves.	LXXXV.	190
An experimental inquiry on animal impregnation.	LXXXVII.	159
HAMILTON, Rev. JAMES AUGUSTUS. Account of his observations of the transit of Mercury over the sun, November 12, 1782.	LXXIII.	453
HAMILTON,* Sir WILLIAM. An account of the earthquakes which happened in Italy, from February to May, 1783.	——	169
Some particulars of the state of Mount Vesuvius in 1786; with an account of a journey into the province of Abruzzo, and a voyage to the Island of Ponza.	LXXVI.	365
An account of the eruption of Mount Vesuvius, in 1794.	LXXXV.	73
HASSENFRATZ, Monsieur. On hepatic air.	LXXVII.	305
HATCHETT, CHARLES. An analysis of the Carinthian molybdate of lead, with experiments on the molybdic acid; to which are added some experiments and observations on the decomposition of the sulphate of ammoniac.	LXXXVI.	285
An analysis of the earthy substance from New South Wales called Sydneia, or terra Australis.	LXXXVIII.	110
Analysis of the water of the mere of Diss.	——	567
Experiments and observations on shell and bone.	LXXXIX.	315
Chemical experiments on zoophytes, with some observations on the component parts of membrane.	XC.	327

	Vol.	Page.
HATCHETT, CHARLES. An analysis of a mineral substance from North America, containing a metal unknown. - - - -	XCII.	49
Experiments and observations on the various alloys, on the specific gravity, and on the comparative wear of gold. - - -	XCIII.	43
Analysis of a triple sulphuret of lead, antimony, and copper, from Cornwall. - -	XCIV.	63
Analytical experiments and observations on lac.	——	191
An analysis of the magnetical pyrites; with remarks on some of the other sulphurets of iron.	——	315
Observations on the change of some of the proximate principles of vegetables into bitumen; with analytical experiments on a peculiar substance which is found with the Bovey coal.	——	385
On an artificial substance which possesses the principal characteristic properties of tannin.	XCV.	211
Additional experiments on the above subject.	—	285
A third series of experiments on the same subject.	XCVI.	109
A description of a process by which corn tainted with must may be completely purified. -	CVII.	36
HEBERDEN, WILLIAM, M. D. A table of the mean heat of every month for ten years, in London, from 1763 to 1772 inclusive. - -	LXXVIII.	66
HEBERDEN, WILLIAM, Jun., M. D. On the influence of cold upon the health of the inhabitants of London. - - - -	LXXXVI.	279
HELLINS,* Rev. JOHN. A new method of finding the equal roots of an equation by division. -	LXXII.	417
Dr. HALLEY's quadrature of the circle improved; being a transformation of his series for that purpose, to others which converge by the powers of 80. - - - -	LXXXIV.	217

	Vol.	Page.
HELLINS,* Rev. JOHN. Mr. JONES's computation of the hyperbolic logarithm of 10 improved; being a transformation of the series which he used in that computation, to others which converge by the powers of 80. To which is added a postscript, containing an improvement of Mr. EMERSON's computation of the same logarithm.	LXXXVI.	135
A new method of computing the value of a slowly converging series, of which all the terms are affirmative. - - - -	LXXXVIII.	183
An improved solution of a problem in physical astronomy, by which swiftly converging series are obtained, which are useful in computing the perturbations of the motions of the Earth, Mars, and Venus, by their mutual attraction.	——	527
A second appendix to the above, containing formulæ for computing the coefficients A and B, by which the arithmetical work is considerably facilitated. - - -	XC.	86
Of the rectification of the conic sections. -	XCII.	448
On the rectification of the hyperbola by means of two ellipses, proving that method to be circuitous, and a process in which a new theorem for the rectification of that curve is discovered.	CI.	110
HENRY, WILLIAM, M. D. Experiments on carbonated hydrogenous gas, with a view to determine whether carbon be a simple or a compound substance. - - - -	LXXXVII.	401
A series of experiments with a view of decomposing the muriatic acid. - -	XC.	188
Experiments on the quantity of gas absorbed by water at different temperatures, and under different pressures. - - -	XCIII.	29
Appendix to the above. - - -	——	274
Description of an apparatus for the analysis of the compound inflammable gases by slow combustion; with experiments on the gas from coal.	XCVIII.	282

	Vol.	Page.
HENRY, WILLIAM, M. D. Experiments on ammonia, and an account of analyzing it by combustion with oxygen and other gases.	XCIX.	430
An analysis of several varieties of British and foreign salt (muriate of soda), with a view to explain their fitness for economical purposes.	C.	89
Additional experiments on the muriatic acids.	CII.	238
HERSCHEL, CAROLINE. An account of a new comet, 1786.	LXXVII.	1
An account of the discovery of a comet, 1793.	LXXXIV.	1
An account of the discovery of a comet, 1795.	LXXXVI.	131
HERSCHEL, JOHN FREDERICK WILLIAM. On a remarkable application of COTES's theorem.	CIII.	8
Consideration of various points of analysis.	CIV.	440
On the developement of exponential functions; together with several new theorems relating to finite differences.	CVI.	25
On circulating functions, and on the integration of a class of equations of finite differences into which they enter as coefficients.	CVIII.	144
On the action of crystallized bodies on homogeneous light; and on the causes of the deviations from NEWTON's scale in the tints which many of them develope on exposure to a polarized ray.	CX.	45
HERSCHEL,* Sir WILLIAM, Knt., LL. D. Astronomical observations on the rotation of the planets round their axes, with a view to determine whether the earth's diurnal motion is perfectly equable.	LXXI.	115
Account of a comet in 1781, called afterwards the Georgium Sidus.	——	492
On the parallax of the fixed stars.	LXXII.	82
Catalogue of double stars.	——	112

	Vol.	Page.
HERSCHEL,* Sir WILLIAM, Knt., LL. D. Description of a lamp micrometer.	LXXII.	163
A paper to obviate some doubts concerning the great magnifying powers used.	——	173
A letter naming the Georgium Sidus.	LXXIII.	1
On the diameter of the Georgium Sidus, with a description of the dark and lucid disk and periphery micrometers.	——	4
On the proper motion of the solar system, with an account of changes among the fixed stars, since the time of Mr. FLAMSTEED.	——	247
On the remarkable appearance at the Polar regions of the planet Mars, and its spheroidical figure.	LXXIV.	233
Account of some observations tending to investigate the construction of the heavens.	——	437
A catalogue of double stars.	LXXV.	40
On the construction of the heavens.	——	213
Catalogue of a thousand new nebulæ and clusters of stars.	LXXVI.	457
Investigation of the cause of that indistinctness of vision which has been ascribed to the smallness of its optic pencils.	——	500
Remarks on the new comet.	LXXVII.	4
An account of the discovery of two satellites revolving round the Georgian planet.	——	125
Account of three volcanos in the moon.	——	229
On the Georgian planet and its satellites.	LXXVIII.	364
Observations on a comet.	LXXIX.	151
Catalogue of a second thousand of new nebulæ and clusters of stars; with a few remarks on the structure of the heavens.	——	212

	Vol.	Page.
HERSCHEL,* Sir WILLIAM, Knt., LL. D. Account of the discovery of a sixth and seventh satellite of the planet Saturn, with remarks on the construction of its ring, its atmosphere, its rotation, and its spheroidical figure. -	LXXX.	1
On the satellites of the planet Saturn, and the rotation of its ring on an axis. - -	——	427
On nebulous stars, properly so called. -	LXXXI.	71
On the ring of Saturn, and the rotation of the fifth satellite upon its axis. - -	LXXXII.	1
Miscellaneous observations. - -	——	23
Observations on the planet Venus. - -	LXXXIII.	201
Observations on a quintuple belt on the planet Saturn. - - - -	LXXXIV.	28
Account of some particulars observed during the eclipse of the sun the 5th September, 1793.	——	39
On the rotation of the planet Saturn on its axis.	——	48
On the nature and construction of the sun and fixed stars. - - -	LXXXV.	46
Description of a forty-feet reflecting telescope.	——	347
On the method of observing the changes that happen to the fixed stars; with some remarks on the stability of the light of our sun. To which is added a catalogue of comparative brightness, for ascertaining the permanency of the lustre of stars. - - -	LXXXVI.	166
On the periodical star α Herculis; with remarks tending to establish the rotatory motion of the stars on their axes. To which is added a second catalogue of the comparative brightness of the stars. - - - -	——	452

	Vol.	Page.
HERSCHEL,* Sir WILLIAM, Knt., LL. D. A third catalogue of the comparative brightness of the stars; with an introductory account of an index to Mr. FLAMSTEED's observations of the fixed stars, contained in the second volume of the Historia Cœlestis, with several useful results derived from that index. - -	LXXXVII.	293
Observations of the changeable brightness of the satellites of Jupiter, and of the variation in their magnitudes, with a determination of the time of their rotatory motion on their axes; to which is added, a measure of the diameter of the second satellite, and an estimate of the comparative size of the four. - -	——	332
On the discovery of four additional satellites of the Georgium Sidus, the retrograde motion of its old satellites announced, and the cause of their disappearance at certain distances from the planet explained. - -	LXXXVIII.	47
A fourth catalogue of the comparative brightness of the stars. - - -	LXXXIX.	121
On the power of penetrating into space by telescopes, with a comparative determination of the extent of that power in natural vision, and in telescopes of various sizes and constructions, illustrated by select observations. -	XC.	49
Investigation of the powers of the prismatic colours to heat and illuminate objects; with remarks that prove the different refrangibility of radiant heat. To which is added an inquiry into the method of viewing the sun advantageously with telescopes of large apertures and high magnifying powers. - -	—	255
Experiments on the refrangibility of the invisible rays of the sun. - - -	—	284
Experiments on the solar and on the terrestrial rays that occasion heat; with a comparative view of the laws to which light and heat are subject. Part I. - - -	—	29

	Vol.	Page
HERSCHEL,* Sir WILLIAM, Knt., LL. D. Experiments on the rays of heat. Part II. - -	XC.	437
Observations tending to investigate the nature of the sun, in order to find the causes or symptoms of its variable emission of heat and light; with remarks on the use that may be drawn from solar observations. - -	XCI.	265
Additional observations on the above subject, with trials to set aside darkening glasses by transmitting the solar rays through liquids.	—	354
Observations on the two celestial bodies lately discovered (Ceres and Pallas). - -	XCII.	213
Catalogue of five hundred new nebulæ, with remarks on the construction of the heavens.	——	477
Observations of the transit of Mercury over the sun; with observations on the action of mirrors. - - - -	XCIII.	214
Account of the changes that have happened in the relative situation of double stars, with the cause to which they are owing. - -	——	339
Continuation of the account on the above subject. - - - -	XCIV.	353
Experiments for ascertaining how far telescopes will enable us to determine very small angles, and to distinguish the diameters of objects, with an application of the result on Mr. HARDING's star. - - - -	XCV.	31
On the direction and velocity of the motion of the sun and solar system. - -	——	233
Observations on the singular figure of the planet Saturn. - - - -	——	272
On the quantity and velocity of the solar motion.	XCVI.	205
Observations on the figure, the climate, and the atmosphere of Saturn and its ring. -	——	455
Experiments for investigating the cause of the coloured concentric rings discovered by Sir ISAAC NEWTON, between two object-glasses laid upon one another. - - -	XCVII.	180

	Vol.	Page.
HERSCHEL,* Sir WILLIAM, Knt., LL.D. Observations on the nature of the new celestial body discovered by Dr. OLBERS, and of the comet which was expected to appear in January 1807, on its return from the sun. - -	XCVII.	260
Observations of a comet with a view to investigate its magnitude and the nature of its illumination; also an account of an irregularity perceived in the apparent figure of the planet Saturn. - - - - -	XCVIII.	145
Continuation of experiments for investigating the cause of coloured concentric rings, and other similar appearances. - -	XCIX.	259
Supplement to the experiments on coloured concentric rings. - - - -	C.	149
Astronomical observations on the construction of the heavens, which appear to throw some new light upon the organization of the celestial bodies. - - - -	CI.	269
Observations on a comet, with remarks on the construction of its different parts. - -	CII.	115
Observations on a second comet, with similar remarks. - - - - -	—	229
Astronomical observations on the sidereal part of the heavens, and its connection with the nebulous part. - - -	CIV.	248
A series of observations of the satellites of the Georgian planet, with an account of the telescopic apparatus used on this occasion. -	CV.	293
Astronomical observations to investigate the space of the celestial bodies, and the extent of the milky way. - - -	CVII.	302
Astronomical observations to ascertain the relative distances of clusters of stars, and to investigate the powers of our telescopes. -	CVIII.	429

	Vol.	Page.
HEY, RICHARD, LL. D. Propositions containing some properties of tangents to circles, and of trapeziums inscribed in circles, and non-inscribed; together with propositions upon the elliptic representations of circles upon a plane surface by perspective. - - -	CIV.	348
HEY, WILLIAM. An account of some luminous arches.	LXXX.	32
HITCHINS, Rev. MALACHY. Account of the discovery of silver in Herland copper mine. -	XCI.	159
HOLLAND, HENRY, M.D. On the manufacture of the sulphate of magnesia at Monte della Guardia, near Genoa. - - -	CVI.	294
HOME, Sir EVERARD, Bart. Description of a new marine animal. - - - -	LXXV.	333
An account of a child with a double head. -	LXXX.	296
Observations on certain horny excrescences of the human body. - - -	LXXXI.	95
Some facts relative to the late Mr. JOHN HUNTER's preparation for the Croonian Lecture.	LXXXIV.	21
The Croonian Lecture: on muscular motion.	LXXXV.	1
The Croonian Lecture: on muscular motion.	——	202
On the mode of generation of the Kangaroo, with a particular description of the organs themselves. - - -	——	221
The Croonian Lecture: on muscular motion.	LXXXVI.	1
A description of the anatomy of the sea otter, from a dissection made November 15th, 1795.	LXXXVI.	385
On the changes which blood undergoes when extravasated into the urinary bladder, and retained for some time in that viscus mixed with the urine. - - - - -	——	486
The Croonian Lecture: on some of the morbid actions of the straight muscles and cornea of the eye, and their treatment considered. -	LXXXVII.	1

	Vol.	Page.
HOME, Sir EVERARD, Bart. On the orifice in the retina of the human eye, discovered by Professor SOEMMERING, with proofs of this appearance being extended to the eyes of animals.	LXXXVIII.	332
The Croonian Lecture: upon the structure of nerves.	LXXXIX.	1
On a paper read in 1790, on the subject of a child with a double head.	——	28
On the dissection of an hermaphrodite dog, with observations on hermaphrodites in general.	——	157
On the structure of the teeth of graminivorous quadrupeds, particularly those of the elephant and sus Æthiopicus.	——	237
The Croonian Lecture: on the structure and uses of the membrana tympani of the ear.	XC.	1
On the head of the ornithorhynchus paradoxus.	—	432
The Croonian Lecture: on the irritability of nerves.	XCI.	1
On the structure and mode of growth of the grinding teeth of the wild boar, and animal incognitum.	——	319
The Croonian Lecture: on the power of the eye to adjust itself to different distances, when deprived of the crystalline lens.	XCII.	1
On the anatomy of the ornithorhynchus paradoxus.	——	67
On the anatomy of the ornithorhynchus hystrix.	——	348
On the structure of the tongue, with cases in which a portion of that organ has been removed by ligature.	XCIII.	205
On the structure of the orifices in certain poisonous snakes, and description of a bag connected with the eye, met with in some snakes.	XCIV.	70

	Vol.	Page.
Home, Sir Everard, Bart. Of the structure of the parts which cause the expansion of the skin of the neck of the cobra di capello.	XCIV.	346
On a small lobe of the human prostate gland, which has not before been taken notice of by anatomists.	XCVI.	195
On the shell of the sea worm found on the coast of Sumatra, proving it to be a species of teredo; with an account of the anatomy of the teredo navalis.	——	276
On the camel's stomach, and the reservoirs in which water is inclosed; with some peculiarities on the urine.	——	357
An account of two children born with cataracts in their eyes, with experiments on their knowledge of objects immediately after the cataracts were removed.	XCVII.	83
On the structure of the stomach of the whale, compared with those of ruminating animals, with a view to ascertain the situation of the digestive organ.	——	93
On the structure of the stomachs of different animals, with a view to elucidate the process of converting animal and vegetable substances into chyle.	——	139
On the structure and uses of the spleen.	XCVIII.	45
Farther experiments on the spleen.	——	133
Some observations on Mr. Brande's paper on calculi.	——	244
Some peculiarities in the structure of the wombat, with some observations on the female organs of generation.	——	304
On the nature of the intervertebral substance of fish and quadrupeds.	XCIX.	177

	Vol.	Page.
HOME, Sir EVERARD, Bart. An anatomical account of the squalus maximus, which in the structure of its stomach forms an intermediate link between the whale tribe and cartilaginous fishes. - - -	XCIX.	212
Hints on the subject of animal secretions. -	——	385
The case of a man who died in consequence of the bite of a rattle-snake, with an account of the effects produced by the poison. -	C.	75
On the gizzards of grazing birds. - - -	—	184
On the mode of breeding of the oviparous shark, and on the aeration of the fœtal blood in different classes of animals. - -	—	205
Experiments to prove that fluids pass directly from the stomach to the circulation of the blood, without going through the thoracic duct. - - - -	CI.	163
An account of some peculiarities in the structure of the organ of hearing in the balæna mysticetus Linnæi. - - -	CII.	83
Observations intended to show that the progressive motion of snakes is partly performed by means of the ribs. - - -	—	163
On the structure of the solvent glands in the digestive organs of birds, according to their food and particular modes of life. - -	—	394
A description of the solvent glands and gizzards of the ardea argala, the casuarius emu, and the long-legged casowary from New South Wales. - - -	CIII.	77
On the coagulating power of the secretion of the gastric glands. - - -	—	96
On the tusks of the narwhale. - -	—	126
On the formation of fat in the intestines of living animals. - - - -	—	146

	Vol.	Page.
HOME, Sir EVERARD, Bart. Addition to the account of the anatomy of the squalus maximus, with observations on the structure of the branchial artery.	CIII.	227
On the functions of the brain.	CIV.	469
On the fossil remains of an animal more nearly allied to fishes than any of the other classes of animals.	—	571
On the influence of the nerves upon the action of the arteries.	—	583
On the organs of respiration in animals between those of the class pisces and the class vermes, and in two genera of the last-mentioned class.	CV.	256
On the mode of generation in the lamprey and myxine.	—	265
On the feet of those animals whose progressive motion can be carried on in opposition to gravity.	CVI.	149
Experiments to prove that the beneficial effects of many medicines are produced through the medium of the circulating blood, more particularly that of the colchicum autumnale on the gout.	—	257
An appendix on the effects of the colchicum autumnale on gout.	—	262
On the formation of fat in the intestine of the tadpole, and on the use of the yelk on the embryo in the egg.	—	301
Some farther account of the fossil remains of an animal described to the Society in 1814.	—	318
Farther observations on the feet of animals whose progressive motion can be carried on against gravity.	—	322

	Vol.	Page.
HOME, Sir EVERARD, Bart. On the circulation of blood in the class vermes of Linnæus, and the principle in which it differs from that in the higher classes.	CVII.	1
An account of some fossil remains of the rhinoceros, discovered by Mr. WHIDBEY, in a cavern inclosed in the lime-stone rock, from which he is forming the Break-water at Plymouth.	——	176
On the passage of the ovum from the ovarium to the uterus in women.	——	252
Farther observations on the use of colchicum autumnale in the gout.	——	262
The distinguishing characters between the ova of the sepia and those of the vermes testacea, that live in water, explained.	——	297
Some account of the nests of the Java swallow, and of the glands that secrete the mucus of which they are composed.	——	332
On the gastric glands of the human stomach, and the contraction which takes place in that viscus.	——	347
Additional facts respecting the fossil remains of animals, showing that the bones of the sternum resemble those of the ornithorhynchus paradoxus.	CVIII.	24
The Croonian Lecture: on the changes which blood undergoes in the act of coagulation.	——	172
Some additions to the preceding Croonian Lecture.	——	185
A description of the teeth of the delphinus gangeticus.	——	417
On the conversion of pus into granulations, or new flesh.	CIX.	1
On corpora lutea.	—	59

	Vol.	Page.
Home, Sir Everard, Bart. An account of the fossil skeleton of the proteosaurus.	CIX.	209
Reasons for giving that name to the fossil above.	—	212
On the ova of the different tribes of opossum and ornithorhynchus.	—	234
A farther investigation of the component parts of the blood.	CX.	1
On the milk tusks and organs of hearing of the dugong.	—	144
On the mode of formation of the canal for containing the spinal marrow; and on the form of the fins of the proteosaurus.	—	159
Observations on the human urethra, showing its internal structure, as it appeared in the microscope of F. Bauer, Esq.	—	183
An account of a new mode of performing the high operation for the stone.	—	209
Particulars respecting the anatomy of the dugong, as a supplement to Sir T. S. Raffles' account of that animal.	—	315
Hope,* John. Description of a plant yielding asafœtida.	LXXV.	36
Horner, W. G. A new method of solving numerical equations of all orders, by continuous approximation.	CIX.	308
Horsburgh, James. Observations on a diurnal variation of the barometer between the Tropics.	XCV.	177
Hosack, David, M.D. Observations on vision.	LXXXIV.	196
Howard,* Edward. On a new fulminating mercury.	XC.	204
On certain stony and metalline substances, which at different times are said to have fallen on the earth; also on various kinds of native iron.	XCII.	168

	Vol.	Page.
HUDDART,* JOSEPH. On horizontal refractions which affect the appearance of terrestrial objects, and the dip or depression of the horizon of the sea.	LXXXVII.	29
HULME, NATHANIEL, M.D. Experiments on the light which is spontaneously emitted, with some degree of permanency, from various bodies.	XC.	161
A continuation of the above experiments, with others on solar light, when imbibed by CANTON's phosphorus.	XCI.	403
HUMFRIES, ISAAC. Account of a spontaneous inflammation.	LXXXIV.	426
HUMPHREYS, Colonel DAVID. On a new variety in the breed of sheep.	CIII.	88
HUNTER,* JOHN, On the organ of hearing in fish.	LXXII.	379
On the effect of extirpating one ovarium upon the number of young produced.	LXXVII.	233
Observations tending to show that the wolf, jackal, and dog, are all of the same species.	——	253
On the structure and economy of whales.	——	371
A supplementary letter on the identity of the species of the dog, wolf, and jackal.	LXXIX.	160
Observations on bees.	LXXXII.	128
On the fossil bones presented to the Royal Society by His Serene Highness the MARGRAVE OF ANSPACH.	LXXXIV.	407
HUNTER, JOHN, M.D. On the heat of wells and springs in Jamaica, and on the temperature of the earth below the surface, in different climates.	LXXVIII.	53
HUNTER,* WILLIAM. On a new method of applying the screw.	LXXI.	58

	Vol.	Page.
HUTCHINS,* THOMAS. On the point of mercurial congelation. - - -	LXXIII.	303
HUTCHINSON, Rev. B. On the dryness of the year 1788. - - - - -	LXXIX.	37
An account of a luminous arch. - -	LXXX.	45
HUTTON,* CHARLES, LL.D. Project for a new division of the quadrant. - - -	LXXIV.	21

J

JAC IVO

	Vol.	Page
Jacob, Arthur, M. D. An account of a membrane in the eye, now first described. - -	CIX.	300
Jenner, Edward. On the natural history of the cuckoo. - - - -	LXXVIII.	219
Ingenhousz, John, M. D. Some further considerations on the influence of the vegetable kingdom on the animal creation. - -	LXXII.	426
Johnson, James Rawlins, M. D. Observations on the hirudo vulgaris. - - -	CVII.	13
Observations on the hirudo complanata and hirudo stagnalis, now formed into a distinct genus under the name glossopora. - -	——	339
Ippolito, Count Francesco. Account of the earthquake in the kingdom of Naples, the 28th March, 1783. - - - -	LXXIII.	209
Ivory, James, M. D. On the attractions of homogeneous ellipsoids. - -	XCIX.	345
On the method which Laplace has given of his Mecanique Celeste, for computing the attractions of spheroids of every description. -	CII.	1
On the attractions of an extensive class of spheroids. - - - -	—	46
A new method of deducing a first approximation to the orbit of a comet, from three geocentric observations. - - -	CIV.	121

K

KAT KIR

	Vol.	Page.
KATER, Captain HENRY. On the light of the Cassegrainian telescope, compared with that of the Gregorian.	CIII.	206
Farther experiments on the above subject.	CIV.	231
An improved method of dividing astronomical circles and other instruments.	—	419
An account of experiments for determining the length of the pendulum vibrating seconds in the latitude of London.	CVIII.	33
On the length of the French mètre estimated in parts of the English standard.	——	103
KEIR,* JAMES. Experiments on the congelation of the vitriolic acid.	LXXVII.	267
Letter on the principle of acidity, the decomposition of water and phlogiston.	LXXVIII.	313
On the dissolution of metals in acid, and their precipitations; with an account of a new compound acid menstruum, useful in technical operations of parting metals.	LXXX.	359
KERR, JAMES. Natural history of the insect which produces the gum lacca.	LXXI.	374
KIDD, JOHN, M.D. On the natural production of saltpetre on the walls of subterraneous and other buildings.	CIV.	508
KIRWAN, RICHARD. On the specific gravities and attractive powers of various saline substances.	LXXI.	7
Continuation of experiments on the above subject.	LXXII.	179

	Vol.	Page
KIRWAN, RICHARD. Conclusion of experiments on the above subject.	LXXIII.	15
Remarks on Mr. CAVENDISH's experiment on air.	LXXIV.	154
Reply to Mr. CAVENDISH's answer.	——	178
On specific gravities taken at different degrees of heat, and an easy method of reducing them to a common standard.	LXXV.	267
Experiments on hepatic air.	LXXVI.	118
KNIGHT, THOMAS. On the expansion of any functions of multinomials.	CI.	49
Of the attraction of such solids as are terminated by planes; and of solids of greatest attraction.	CII.	247
Of the penetration of a hemisphere by an indefinite number of equal and similar cylinders.	——	310
A new demonstration of the binomial theorem.	CVI.	331
Of the construction of logarithmic tables.	CVII.	217
Two general propositions in the method of differences.	——	234
Note respecting the demonstration of the binomial theorem, inserted in Vol. CVI. p. 331.	——	245
KNIGHT, THOMAS ANDREW. On the grafting of trees.	LXXXV.	290
Experiments on the fecundation of vegetables.	LXXXIX.	195
On the ascent of sap in trees.	XCI.	333
On the descent of sap in trees.	XCIII.	277
On the motion of the sap in trees.	XCIV.	183
On the state in which the true sap of trees is deposited during winter.	XCV.	88
On the reproduction of buds.	——	257
On the direction of the radicle and germen during the vegetation of seeds.	XCVI.	99

	Vol.	Page.
KNIGHT, THOMAS ANDREW. On the inverted action of the alburnous vessels of trees.	XCVI.	292
On the formation of the bark of trees.	XCVII.	103
On the economy of bees.	——	234
On the inconvertibility of bark into alburnum.	XCVIII.	103
On the origin and office of the alburnum of trees.	——	313
On the origin and formation of roots.	XCIX.	169
On the comparative influence of male and female parents on their offspring.	——	392
On the parts of trees impaired by age.	C.	178
On the causes which influence the direction of the growth of roots.	CI.	209
On the motions of the tendrils of plants.	CII.	314
On ice found in the bottoms of rivers.	CVI.	286
On the action of detached leaves of plants.	—	289
Upon the extent of the expansion and contraction of timber, in different directions, relative to the position of the medulla of the tree.	CVII.	269
On the office of the heart-wood of trees.	CVIII.	137
Upon the different qualities of the alburnum of spring and winter felled oak trees.	CX.	156
KÖHLER, M. Observations on the transit of Mercury at Dresden, May 4th, 1786.	LXXVII.	47
KÖNIG, CHARLES. On a fossil human skeleton, from Guadaloupe.	CIV.	107

L

LAM LEE

	Vol.	Page
LAMBTON, Lieut.-Col. WILLIAM. An abstract of the results deduced from the measurement of an arc on the meridian, extending from latitude 8°:9′:38″,4. to 18°:3′:23″,6. N., being an amplitude of 9°:53′:45″,2. - - - -	CVIII.	486
LANDEN,* JOHN. Of the rotatory motion of a body of any form whatever, revolving without restraint upon any axis passing through its centre of gravity. - - - - -	LXXV.	311
LANDERBECK, NICOLAUS. Methodus inveniendi lineas curvas ex proprietatibus variationis curvaturæ. - - - - -	LXXIII.	456
Second part, on the same subject. - -	LXXIV.	477
LANE, TIMOTHY. On human calculi. - -	LXXXI.	223
On the magnetic attraction of oxides of iron.	XCV.	281
LATHAM, WILLIAM. Account of a singular instance of atmospherical refraction. - -	LXXXVIII.	357
LAX, Rev. W. A. Method of finding the latitude of a place by means of two altitudes of the sun and the time elapsed between them. -	LXXXIX.	74
On a method of examining the divisions of astronomical instruments. - - -	XCIX.	232
LEACH, WILLIAM ELFORD. Observations on the genus ocythoe of RAFINESQUE, with a description of a new species. - -	CVII.	293
LEE, STEPHEN. On the dispersive power of the atmosphere, and its effects on astronomical observations. - - - -	CV.	375

	Vol.	Page.
LETTSOM, JOHN COAKLEY, M.D. History and dissection of an extraordinary intro-susception.	LXXVI.	305
L'HUILIER, SIMON. An elementary manner of obtaining the series of circular arches. -	LXXXVI.	142
LIGHTFOOT, Rev. JOHN, M.A. An account of an English bird of the genus motacilla, supposed not to have been known to British ornithologists. - - - -	LXXV.	8
An account of some minute British shells, either not duly observed, or totally unnoticed by authors. - - - -	LXXVI.	160
LIMBIRD, JAMES. An account of the strata observed in sinking for water at Boston, in Lincolnshire.	LXXVII.	50
LLOYD, GEORGE. Quantity of rain which fell at Barrowby, near Leeds, from 1778 to 1781. -	LXXII.	71
LLOYD,* JOHN. Account of an earthquake at Hafodunos, near Denbigh, in 1781. - -	LXXI.	331
Account of an earthquake in Wales, in 1782.	LXXIII.	104
An account of the discovery of native gold in Ireland. - - - -	LXXXVI.	34
LYON, Rev. JOHN. An account of a subsidence of the ground near Folkstone, on the coast of Kent. - - - -	LXXVI.	220

M

MAC MAR

	Vol.	Page.
MACARTNEY, JAMES. Upon luminous animals.	C.	258
An account of an appendix to the small intestines of birds.	CI.	257
MAC CAUSLAND, RICHARD. Particulars relative to the nature and customs of the Indians of North America.	LXXVI.	229
MAC DONALD, JOHN. Observations of the diurnal variation of the magnetic needle at Fort Marlborough, in Sumatra.	LXXXVI.	340
Similar observations in the Island of St. Helena, with a continuation of those at Fort Marlborough.	LXXXVIII.	397
MACIE, JAMES. An account of some chemical experiments on tabasheer.	LXXXI.	368
MANNING, THOMAS. New method of computing logarithms.	XCVI.	327
MARCET, ALEXANDER, M. D. An analysis of the waters of the Dead Sea, and the river Jordan.	XCVII.	296
Experiments on the alcohol of sulphur, or sulphuret of carbon.	CIII.	171
On the production of cold by the evaporation of the sulphuret of carbon.	——	252
On the specific gravity and temperature of sea waters in different parts of the ocean, and in particular seas; with some account of their saline contents.	CIX.	161

	Vol.	Page.
MARSDEN, WILLIAM. Account of a phenomenon observed upon the Island of Sumatra. -	LXXI.	383
On the era of the Mahometans, called the hejerà.	LXXVIII.	414
On the chronology of the Hindoos. -	LXXX.	560
Correction of an error in the above. - -	LXXXII.	195
MARSHALL, WILLIAM. Account of the black canker caterpillar, which destroys the turnips in Norfolk. - - - -	LXXIII.	217
MARSHAM,* ROBERT. A further account of the usefulness of washing the stems of trees. -	LXXI.	449
Indications of spring. - - -	LXXIX.	154
A supplement to the measure of trees, printed in 1759. - - - -	LXXXVII.	128
MARTIN, EDWARD. Description of the mineral bason in the counties of Monmouth, Glamorgan, Brecon, Carmarthen, and Pembroke. -	XCVI.	342
MARTINEAU, PHILIP MEADOWS. An extraordinary case of dropsy in the ovarium, with some remarks. - - - -	LXXIV.	471
MASKELYNE,* Rev. NEVILLE, D. D. Advertisement of the expected return of the comet of 1532 and 1661, in the year 1788. - -	LXXVI.	426
Concerning the latitude and longitude of the Royal Observatory at Greenwich; with remarks on a memorial of the late Mr. CASSINI de THURY. - - - -	LXXVII.	151
An attempt to explain a difficulty on the different refrangibility of light. - -	LXXIX.	256
Observations of the comet of 1793. - -	LXXXIII.	55
An account of an appearance of light like a star, seen in 1794, in the dark part of the moon, by THOMAS STRETTON; with remarks upon this observation, and Mr. WILKINS's. -	LXXXIV.	435
On a new property of the tangents of three arches trisecting the circumference of a circle. -	XCVIII.	122

	Vol.	Page.
MENZIES, ARCHIBALD. On the anatomy of a sea otter, from a dissection made Nov. 18th, 1795.	LXXXVI.	385
MICHELL,* Rev. JOHN, B.D. On the means of discovering the distance, magnitude, &c. of the fixed stars, in consequence of the diminution of the velocity of their light, in case such a diminution should be observed.	LXXIV.	35
MILLS, ABRAHAM. Some account of the strata and volcanic appearances in the North of Ireland, and Western Islands of Scotland.	LXXX.	73
A mineralogical account of the native gold discovered in Ireland.	LXXXVI.	38
MILNER, Rev. ISAAC, B.D. On the production of nitrous acid and nitrous air.	LXXIX.	300
MORE,* SAMUEL. An account of some scoria from iron works, which resemble the vitrified filaments described by Sir WILLIAM HAMILTON.	LXXII.	50
Some account of an earthquake felt in the Northern part of England, in August 1786.	LXXVII.	35
MORGAN, Rev. M. On the light of bodies in a state of combustion.	LXXV.	190
MORGAN, WILLIAM. Electrical experiments made to ascertain the non-conducting power of a perfect vacuum.	——	272
On the probabilities of survivorships between two persons of any given age, and the method of determining the values of reversions depending on those survivorships.	LXXVIII.	331
On the method of determining, from the real probabilities of life, the value of a contingent reversion, in which three lives are involved in the survivorship.	LXXIX.	40
Another treatise on the same subject.	LXXXI.	246
A farther treatise on the same subject.	LXXXIV.	223
A farther treatise on the same subject.	XC.	22

	Vol.	Page
MORNAY, A. F. An account of the discovery of a mass of native iron in Brazil. - -	CVI.	270
MUDGE, Captain WILLIAM. An account of the trigonometrical survey, carried on in the years 1791 to 1794 inclusive. - -	LXXXV.	414
A continuation of the above, in 1795 and 1796.	LXXXVII.	432
A continuation of the above, in 1797, 1798, and 1799. - - - -	XC.	539
Account of a measurement of an arc of the meridian, from Dunnose, in the Isle of Wight, to Clifton, in Yorkshire, in the course of the trigonometrical survey of England, in 1800, 1801, and 1802. - - -	XCIII.	383
MURDOCH, WILLIAM. An account of the application of the gas from coal to economical purposes.	XCVIII.	124
MUSHET, DAVID. Experiments on wootz. -	XCV.	163

N

NAI NIC

	Vol.	Page.
NAIRNE,* EDWARD. An account of wire being shortened by lightning. - - -	LXXIII.	223
NICHOLSON, WILLIAM. On an advantageous method of arranging the differences of logarithms on lines graduated for the purpose of computation. - - - -	LXXVII.	246
Description of an instrument producing the two states of electricity, without friction or communication with the earth. - -	LXXVIII.	403
Experiments on electricity. - -	LXXIX.	265

O

OUT OUT

	Vol.	Page.
OUTRAM, BENJAMIN. Particulars of the discovery of some very singular balls of stone, found in the works of the Huddersfield canal. -	LXXXVI.	350

P

	Vol.	Page.
PAGE, Sir THOMAS HYDE, Knt. Descriptions of the King's wells at Sheerness, Languard Fort, and Harwich. - - - -	LXXIV.	6
PARRY, C. H., M.D On a case of nervous affection cured by pressure of the carotids, with physiological remarks. - - -	CI.	89
PATERSON, Lieut. WILLIAM. An account of a new electrical fish. - - -	LXXVI.	382
PEACOCK, JAMES. Descriptions of three simple instruments for drawing architecture and machinery in perspective. - -	LXXV.	366
PEARS, CHARLES. The case of a full grown woman, in whom the ovaria were deficient. -	XCV.	225
PEARSON, GEORGE, M.D. Experiments to investigate the composition of JAMES's powder. -	LXXXI.	317
Experiments made with a view of decompounding fixed air or carbonic acid. - -	LXXXII.	289
Experiments on a wax-like substance resembling the pé-la of the Chinese, collected at Madras by Dr. ANDERSON, and called by him white lac. - - - -	LXXXIV.	383
Experiments to investigate the nature of a kind of steel manufactured at Bombay, and there called wootz; with remarks on the different states of iron. - - -	LXXXV.	322
Observations on some ancient metallic arms and utensils, with experiments to determine their composition. - - -	LXXXVI.	395

	Vol.	Page.
PEARSON, GEORGE, M. D. Experiments made with the view of ascertaining the nature of the gas produced by passing electric discharges through the water.	LXXXVII.	142
Experiments tending to show the composition and properties of urinary concretions.	LXXXVIII.	15
On expectorated matter.	XCIX.	313
Experiments on pus.	C.	294
On the colouring matter of the black bronchial glands, and of the black spots of the lungs.	CII.	159
PEARSON, JOHN. An account of two mummies of the Egyptian ibis, one of which was in a remarkably perfect state.	XCV.	264
PENNANT,* THOMAS. An account of the turkey.	LXXI.	67
An account of several earthquakes felt in Wales, in 1781.	——	193
PEPYS, WILLIAM HASELDINE. A new eudiometer, accompanied with experiments on its application.	XCVII.	247
On the quantity of carbon in carbonic acid, and on the nature of the diamond.	——	267
On the changes produced in atmospheric air and oxygen gas by respiration.	XCVIII.	249
On respiration.	XCIX.	404
PERKINS, JACOB. On the compressibility of water.	CX.	324
PHILIP, A. P. WILSON. Experiments made with a view to ascertain the principles on which the action of the heart depends, and the relation between that organ and the nervous system.	CV.	65
Some additional experiments on the above subject.	——	424
On the effects of galvanism in restoring the due action of the lungs.	CVII.	22

	Vol.	Page.
PIAZZI, Rev. JOSEPH. Result of calculations of the observations made at various places of the eclipse of the sun the 3d of June, 1788. -	LXXIX.	55
PICTET, MARK AUGUSTUS. Considerations on the convenience of measuring an arc of the meridian, and of the parallel of latitude, having the Observatory of Geneva for their common intersection. - - -	LXXXI.	106
PIGOTT, EDWARD. Account of a nebula in Comâ Berenices. - - -	LXXI.	82
On the discovery of a comet in 1783. -	LXXIV.	20
Observations on the comet in 1783. - -	——	460
Observations of a new variable star. -	LXXV.	127
On those stars which the astronomers of the last century suspected to be changeable. -	LXXVI.	189
On the transit of Mercury over the sun, made at Louvain, in the Netherlands. - -	——	389
The latitude and longitude of York determined from astronomical observations, with the method of determining the longitudes of places by observation of the moon's transit over the meridian. - - -	——	409
An account of some luminous arches. -	LXXX.	47
Determination of the longitudes and latitudes of some remarkable places near the Severn. -	——	385
On the periodical changes of brightness of two fixed stars. - - -	LXXXVII.	133
On the changes of the variable star in Sobieski's shield, from five years observations; with conjectures respecting unenlightened heavenly bodies. - - - - -	XCV.	131
PIGOTT,* NATHANIEL. Discovery of double stars in 1799, at Frampton House, in Glamorganshire.	LXXI.	84
Astronomical observations. - -	——	347

	Vol.	Page.
PIGOTT,* NATHANIEL. An observation of the meteor of August 18th, 1783, made on Hewitt Common, near York.	LXXIV.	457
Observations of the transit of Mercury over the sun's disc, made at Louvain, May 3d, 1786.	LXXVI.	384
PLAYFAIR, JOHN. Account of a lithological survey of Schehallien, made to determine the specific gravity of the rocks which compose that mountain	CI.	347
POND, JOHN. On the declinations of some of the principal fixed stars; with a description of an astronomical circle, and some remarks on the construction of circular instruments.	XCVI.	420
Observations of the summer solstice, 1812.	CIII.	27
A catalogue of North Polar distances of some of the principal fixed stars.	——	75
Observations of the winter solstice, 1812, with the mural circle.	——	123
Catalogue of North Polar distances of 84 principal fixed stars, deduced from observations made with the mural circle at the Royal Observatory.	——	280
Observations of the summer solstice, 1813, with the mural circle at the Royal Observatory.	——	304
Determination of the North Polar distances and proper motion of thirty fixed stars.	CV.	384
On the parallax of the fixed stars.	CVII.	158
Appendix to the above.	——	173
On the parallax of the fixed stars.	——	353
On the different methods of constructing a catalogue of fixed stars.	CVIII.	405
On the parallax of α Aquilæ.	——	477
On the parallax of the fixed stars in right ascension.	——	481

	Vol.	Page.
PORRETT, ROBERT. On the nature of salts termed triple Prussiates; and on acids formed by the union of certain bodies with the elements of the Prussic acid.	CIV.	527
Farther analytical experiments relative to the constitution of the Prussic, of the ferruretted chyazic, and of the sulphuretted chyazic acids; and to that of their salts; with the application of the atomic theory to the analyses of those bodies.	CV.	220
PREVOST, P. Optical remarks, chiefly on the reflexibility of light.	LXXXVIII.	311
Remarks on heat, and the action of bodies which intercept it.	XCII.	403
PRIESTLEY,* Rev. JOSEPH, LL. D. Experiments relative to phlogiston, and the seeming conversion of water into air.	LXXIII.	398
Experiments relating to air and water.	LXXV.	279
Experiments on the principle of acidity, the composition of water and phlogiston.	LXXVIII.	147
Farther experiments on the above subjects; with letters from Dr. WITHERING and JAMES KEIR, Esq.	——	313
Objections to the above experiments considered.	LXXIX.	7
Experiments on the phlogistication of spirit of nitre.	——	139
Experiments on the transmission of the vapour of acids through a hot earthen tube, and farther observations relating to phlogiston.	——	289
Observations on respiration.	LXXX.	106

	Vol.	Page.
PRIESTLEY,* Rev. JOSEPH, LL. D. Farther experiments on the decomposition of dephlogisticated and inflammable air. - - -	LXXXI.	213
PROUT, WILLIAM, M. D. Description of an acid principle prepared from the lithic or uric acid. - - - - -	CVIII.	420

R

RAF REN

	Vol.	Page.
RAFFLES, Sir THOMAS STAMFORD. Some account of the dugong. - - -	CX.	174
RAMSDEN, Mr. A description of a new construction of eye-glasses for such telescopes as may be applied to mathematical instruments. -	LXXIII.	94
READ,* JOHN. A meteorological journal, principally relating to atmospherical electricity, kept at Knightsbridge, from the 9th May, 1789, to the 8th May, 1790. - - -	LXXXI.	185
A continuation of the above, from the 9th May, 1790, to the 8th May, 1791. - -	LXXXII.	225
Experiments made with the doubler of electricity, to determine its real utility in the investigation of the electricity of atmospheric air in different degrees of purity. - -	LXXXIV.	266
REEVE, HENRY, M. D. Some account of cretinism.	XCVIII.	111
REICHEL, Baron. An account of a monster of the human species. - - -	LXXIX.	137
RENNELL, JAMES. An account of the Ganges and Burrampooter rivers. - -	LXXI.	87
On the rate of travelling, as performed by camels; and its application as a scale to the purposes of geography. - -	LXXXI.	129
Observations on a current that often prevails to the westward of Scilly, endangering the safety of ships that approach the British Channel.	LXXXIII.	182
On the effect of westerly winds in raising the level of the British Channel. - -	XCIX.	400

	Vol.	Page.
RENNELL, JAMES. Some farther observations on the current that often prevails to the westward of the Scilly Islands.	CV.	182
RENNIE, GEORGE, Jun. An account of experiments made on the strength of materials.	CVIII.	118
RICHARDSON, WILLIAM, D. D. On the alterations that have taken place in the structure of rocks on the surface of the basaltic country in the counties of Derry and Antrim.	XCVIII.	187
ROBERTSON, Rev. ABRAM. The binomial theorem demonstrated by the principles of multiplication.	LXXXV.	298
A new demonstration of the binomial theorem, when the exponent is a positive or negative fraction.	XCVI.	305
On the precession of the equinoxes.	XCVII.	57
Direct and expeditious methods of calculating the excentric from the mean anomaly of a planet.	CVI.	127
Demonstration of the late Dr. MASKELYNE's formulæ for finding the longitude and latitude of a celestial object from its right ascension and declination, and *vice versa*.	——	138
ROBERTSON, JAMES. Observations on the permanency of variation of the compass at Jamaica.	XCVI.	348
RODRIGUEZ, Don JOSEPH. Observations on the measurement of three degrees of the meridian, conducted in England by Lieut.-Col. MUDGE.	CII.	321
ROGET, PETER MARK, M. D. Description of a new instrument for performing mechanically the involution and evolution of numbers.	CV.	9
ROY,* Major-General WILLIAM. An account of a measurement of a base on Hounslow Heath.	LXXV.	385
An account of the mode proposed to be followed in determining the relative situation of the Royal Observatories of Greenwich and Paris.	LXXVII.	188
A supplement to the above.	——	465

	Vol.	Page.
ROY, Major-General WILLIAM. An account of the trigonometrical operation, whereby the distance between the meridians of the Royal Observatories of Greenwich and Paris has been determined. - - - -	LXXX.	111
ROYAL SOCIETY.* Proceedings and report relative to an accident by lightning at Heckingham, in 1781. - - - -	LXXII.	355
Journals kept by order of the President and Council, - - for 1780.	LXXI.	199
1781.	LXXII.	285
1787.	LXXVIII.	191
1788.	LXXIX.	113
After 1788 the annual journal will be found as an Appendix to each volume.		
ROXBURGH,* WILLLIAM, M. D. Chermes lacca. -	LXXXI.	228
RUMFORD, Lieut-General Sir BENJAMIN THOMPSON, Count of. New experiments on gunpowder, and description of an accurate eprouvette of gunpowder. - - - -	LXXI.	230
New experiments upon heat. - -	LXXVI.	273
Experiments on the production of dephlogisticated air from water with various substances.	LXXVII.	84
Experiments made to determine the positive and relative quantities of moisture absorbed from the atmosphere by various substances, under similar circumstances. - -	——	240
Experiments upon heat. - - -	LXXXII.	48
An account of a method of measuring the comparative intensities of the light emitted by luminous bodies. - - -	LXXXIV.	67
An account of some experiments upon coloured shadows. - - - -	——	107
Letter announcing a donation for a prize medal.	LXXVII.	215
Experiments to determine the force of fired gunpowder. - - - -	——	222

	Vol.	Page.
Rumford, Lieut.-General Sir Benjamin Thompson, Count of. An inquiry concerning the source of the heat which is excited by friction.	LXXXVIII.	80
An inquiry concerning the chemical properties that have been attributed to light.	——	449
An inquiry concerning the weight ascribed to heat.	LXXXIX.	179
An account of a curious phenomenon observed on the glaciers of Chamouny; with some observations on the propagation of heat in fluids.	XCIV.	23
Concerning the nature of heat, and the mode of its communication.	——	77
Rumovski, M. Observations of the transit of Mercury at St. Petersburg, in 1786.	LXXVII.	48
Russell, Patrick, M. D. An account of the tabasheer.	LXXX.	273
On the orifices found in certain poisonous snakes, between the nostril and the eye.	XCIV.	70
On the voluntary expansion of the skin of the neck in the cobra di capello of the East Indies.	——	346

S

SAB SCH

	Vol.	Page
SABINE, EDWARD. On irregularities in the compass of H. M. Ships Isabella and Alexander, caused by the attraction of the iron contained in the ships.	CIX.	112
On the dip and variation of the magnetic needle, and on the intensity of the magnetic force, during the voyage of the above ships in search of a north-west passage.	——	132
SAUNDERS, ROBERT. Some account of the vegetable and mineral productions of Boutan and Thibet.	LXIX.	79
SAY, THOMAS. On the genus ocythoë.	CIX.	107
SCHMEISSER, JOH. GODF. Description of Kilburn Wells, and analysis of their water.	LXXXII.	115
Description of an instrument for ascertaining the specific gravities of fluids.	LXXXIII.	164
Account of a mineral substance called strontianite, in which are exhibited its external, physical, and chemical characters.	LXXXIV.	418
SCHOTTE, J. P., M.D. A description of a sarcocele of a most astonishing size in a black man in the Island of Senegal.	LXXIII.	85
SCHREIBERS, CHARLES, M. D. An historical and anatomical description of a doubtful amphibious animal of Germany, called by LAURENTI proteus anguinus.	XCI.	241
SCHRÖETER, JOHN JEROME. Observations on the atmospheres of Venus and the Moon, their respective densities, perpendicular heights, and the twilight occasioned by them.	LXXXII.	309

	Vol.	Page.
SCHRÖETER, JOHN JEROME. Observations on the eclipse of the sun, September, 1793. -	LXXXIV.	262
On the mountainous inequalities, rotation, atmosphere, and twilight, of the planet Venus. -	LXXXV.	117
Observations and measurements of the planet Vesta: - - - -	XCVII.	245
SCHWEDIAWER, Dr. An account of ambergris.	LXXIII.	226
SCORESBY, WILLIAM. On the anomaly in the variation of the magnetic needle, as observed on ship-board. - - -	CIX.	96
SEPPINGS, Sir ROBERT. On a new principle of constructing His Majesty's ships of war. -	CIV.	285
On the great strength given to ships of war by the application of diagonal braces. -	CVIII.	1
On a new principle of constructing ships in the mercantile navy. - - - -	CX.	133
SEWELL, WILLIAM. On a canal in the medulla spinalis of some quadrupeds. - -	XCIX.	146
SEWELL, Rev. WILLIAM, A. M. NEWTON's binomial theorem legally demonstrated by algebra.	LXXXVI.	382
SHUCKBURGH,* Sir GEORGE. An account of the equatorial instrument. - - -	LXXXIII.	67
SIX, JAMES. An account of an improved thermometer. - - - - -	LXXII.	72
Experiments to investigate the variation of local heat. - - - - -	LXXIV.	428
Experiments on local heat. - -	LXXVIII.	103
SMEATHMAN, HENRY. Some account of the termites, or white ants, which are found in hot climates. - - - - -	LXXI.	139
SMEATON, JOHN. New fundamental experiments upon the collision of bodies. - -	LXXII.	337

	Vol.	Page.
SMEATON,* JOHN. Observations on the graduation of astronomical instruments, with an explanation of the method invented by the late Mr. HENRY HINDLEY, of York, to divide circles into any given number of parts. - - -	LXXVI.	1
Account of an observation of the right ascension and declination of Mercury out of the meridian near his greatest elongation, September, 1786, with an equatorial micrometer of his own invention and workmanship; with an investigation of a method of allowing for refraction in such kind of observations. - -	LXXVII.	318
Description of an improvement in the application of the quadrant of altitude to a celestial globe, for the resolution of problems dependent on azimuth and altitude - - -	LXXIX.	1
SMITH, JAMES EDWARD, M. D. Some observations on the irritability of vegetables. - -	LXXVIII.	158
SMITH, PIERCE. Observations on the structure of the eyes of birds. - - - -	LXXXV.	263
SMITH, THOMAS. On the structure of the poisonous fangs of serpents. - - -	CVIII.	471
SMITHSON, JAMES. A chemical analysis of some calamines. - - - -	XCIII.	12
Account of a discovery of native minium. -	XCVI.	267
On the composition of the compound sulphuret from Huel Boys, and an account of its crystals.	XCVIII.	55
On the composition of zeolite. - -	CI.	171
On a substance from the elm tree, called Ulmin.	CIII.	64
On a saline substance from Mount Vesuvius.	—	256
A few facts relative to the colouring matter of some vegetables. - - -	CVIII.	110
SNEYD, THOMAS. On the conversion of the substance of a bird into a hard fatty matter. -	LXXXII	197

	Vol.	Page.
STANDERT, HUGH CHUDLEIGH. A description of malformation in the heart of an infant.	XCV.	228
STANHOPE, CHARLES, Earl of. Remarks on Mr. BRYDONE's account of a remarkable thunder-storm in Scotland, in 1787.	LXXVII.	130
STANHOPE, PHILIP, Earl of. Letter on adfected equations.	LXXI.	195
STORER, JOHN, M.D. On an ebbing and flowing stream, discovered by boring in the harbour of Bridlington.	CV.	54
STURGES, Rev. Dr. An account of two rainbows seen at the same time, at Alverstoke, Hants, July 9th, 1792.	LXXXIII.	1
SWARTZ, OLOF. Cloranthus a new genus of plants.	LXXVII.	359

T

	Vol.	Page.
TENNANT, SMITHSON. On the decomposition of fixed air.	LXXXI.	182
On the nature of the diamond.	LXXXVII.	123
On the action of nitre upon gold and platina.	——	219
On different sorts of lime used in agriculture.	LXXXIX.	305
On the composition of emery.	XCII.	398
On two metals found in the black powder remaining after the solution of platina.	XCIV.	411
On an easier mode of procuring potassium than that which is now adopted.	CIV.	578
On the means of producing a double distillation by the same heat.	——	587
THOMAS, H. LEIGH. An anatomical description of a male rhinoceros.	XCI.	145
THOMSON, THOMAS, M. D. On oxalic acid.	XCVIII.	63
Analysis of a new species of copper ore.	CIV.	45
TILLARD, Captain S., R. N. A narrative of the eruption of a volcano in the sea, off the Island of St. Michael.	CII.	152
TODD, JOHN T. Observations and experiments made on the torpedo of the Cape of Good Hope, in 1812	CVI.	120
An account of experiments on the torpedo electricus, at La Rochelle.	CVII.	32

	Vol.	Page.
TOPPING, MICHAEL. Account of the measurement of a base line upon the sea beach, near Porto Novo, on the coast of Coromandel. -	LXXXII.	99
TORLESE, JOHN. Account of a monstrous birth at Anjingo, 1780. - - - -	LXXII.	44
TRIMMER, WILLIAM KIRBY. An account of some organic remains found near Brentford, Middlesex. - - - -	CIII.	131
TROUGHTON, EDWARD. An account of a method of dividing instruments by ocular inspection, in which the usual tools for graduating are not employed; no error can occur but what is chargeable to vision, when assisted by the best optical means of viewing and measuring minute quantities. - - -	XCIX.	105
TUNSTALL, MARMADUKE. Account of several lunar bows. - - - -	LXXIII.	100
TURNOR, EDMUND. A narrative of the earthquake felt in Lincolnshire and the neighbouring counties, the 25th of February, 1792. -	LXXXII.	283

U

	Vol.	Page.
URE, ANDREW, M. D. New experimental researches on some of the leading doctrines of caloric; particularly on the relation between the elasticity, temperature, and latent heat of different vapours, and on thermometric admeasurement and capacity. - - - -	CVIII.	338

V

VIN VOL	Vol.	Page.
VINCE,* Rev. SAMUEL. A new method of investigating the sums of infinite series. - -	LXXII.	389
A supplement to the third part of the above paper on infinite series. - - -	LXXV.	32
On the motion of bodies affected by friction. -	——	165
A new method of finding fluents by continuation.	LXXVI.	432
On the precession of the equinoxes. - -	LXXVII.	363
Observations on the fundamental property of the lever, with a proof of the principle assumed by ARCHIMEDES in his demonstration. -	LXXXIV.	33
The Bakerian Lecture. On the theory of the motion and resistance of fluids, with a description of the construction of experiments to obtain some fundamental principles. -	LXXXV.	24
The Bakerian Lecture. Experiments upon the resistance of bodies moving in fluids. -	LXXXVIII.	1
The Bakerian Lecture. Upon an unusual horizontal refraction of the air; with remarks on the variations to which the lower parts of the atmosphere are sometimes subject. -	LXXXIX.	13
VOLTA, ALEXANDER. Of the method of rendering very sensible the weakest natural or artificial electricity. - - - -	LXXII.	237
Account of some discoveries made by Mr. GALVANI, of Bologna; with experiments and observations on them. - - -	LXXXIII.	10

Vol. Page.

VOLTA, ALEXANDER. On the electricity excited by the mere contact of conducting substances of different kinds. - - - XC. 403

VULLIAMY, BENJAMIN. An account of the means employed to obtain an overflowing well. - LXXXVII. 325

WAL WAR

	Vol.	Page.
WALES,* WILLIAM. Hints on the use which may be made of the tables of natural and logarithmic sines, tangents, &c. in the numerical resolution of adfected equations. - - -	LXXI.	454
WALKER, RICHARD. Experiments on the production of artificial cold. - - -	LXXVIII.	395
On the congelation of quicksilver in England.	LXXIX.	199
On the best methods of producing artificial cold.	LXXXV.	270
On the production of artificial cold by means of muriate of lime. - - -	XCI.	120
WALLOT, JOHANN WILHELM. Observations du passage de Mercure sur le disque du Soleil, le 12 Novembre, 1782, à l'Observatoire Royale de Paris. - - - -	LXXIV.	312
WARE, JAMES. Case of a young gentleman who recovered his sight when seven years of age, after being deprived of it by cataracts before he was a year old. - - -	XCI.	382
Observations on the near and distant sight of different persons. - - -	CIII.	31
WARING,* EDWARD, M. D. On the summation of series whose general term is a determinate function of Z, the distance from the first term of the series. - - -	LXXIV.	385
On infinite series. - - -	LXXVI.	81

	Vol.	Page.
WARING,* EDWARD, M.D. On finding the values of algebraical quantities by converging series, and extending propositions given by PAPPUS and others.	LXXVII.	71
On centripetal force.	LXXVIII.	67
Some properties of the sum of the divisors of numbers.	——	388
On the method of correspondent values, &c.	LXXIX.	166
On the resolution of attractive powers.	——	185
On infinite series.	LXXXI.	146
WATSON,* RICHARD, Bishop of Landaff. On the sulphur wells at Harrogate, in July and August, 1785.	LXXVI.	171
WATT, GREGORY. Observations on basalt, and on the transition from vitreous to the stony texture in the gradual refrigeration of melted basalt.	XCIV.	279
WATT, JAMES. Thoughts and experiments on the constituent parts of water and dephlogisticated air.	LXXIV.	329
Sequel to the above.	——	354
On a method of preparing a test liquor, to show the presence of acids and alkalies in chemical mixtures.	——	419
WEDGWOOD, JOSIAH. An attempt to make a thermometer for measuring the higher degrees of heat.	LXXII.	305
Experiments upon the ochra friabilis nigrofusca of DA COSTA, and called by the miners of Derbyshire Black wadd.	LXXIII.	284
An attempt to compare and connect the thermometer for strong fire with the common mercurial ones.	LXXIV.	358
Additional observations on making a thermometer for the higher degrees of heat.	LXXVI.	390

	Vol.	Page.
WEDGWOOD, JOSIAH. On the analysis of a mineral substance from New South Wales.	LXXX.	306
WEDGWOOD, THOMAS. Experiments and observations on the production of light from different bodies, by heat and by attrition.	LXXXII.	28
Continuation of experiments on the above subject.	——	270
WELLS, WILLIAM CHARLES, M. D. On the influence which incites the muscles of animals to contract in Mr. GALVANI's experiments.	LXXXV.	246
Experiments on the colour of blood.	LXXXVII.	416
Experiments on vision.	CI.	379
WHIDBEY, JOSEPH. An account of the sinking of the Dutch frigate Ambuscade, of 32 guns, near the Great Nore, with the mode used in recovering her.	XCIII.	321
WHITE, WILLIAM, M. D. Observations on the bills of mortality, at York, in 1782.	LXXII.	35
WILDBORE, Rev. CHARLES. On spherical motion.	LXXX.	496
WILKINS, CHARLES. A catalogue of Sanscrit manuscripts, presented to the Royal Society by Sir WILLIAM and Lady JONES.	LXXXVIII.	582
A catalogue of Oriental manuscripts presented by Sir WILLIAM and Lady JONES.	LXXXIX.	335
WILKINS, WILLIAM. An account of an appearance of light like a star, seen in the dark part of the moon, the 7th of March, 1794.	LXXXIV.	429
WILLARD, JOSEPH. Letter concerning the longitude of Cambridge, in New England.	LXXI.	502
WILLIAMS, Colonel EDWARD. An account of the trigonometrical survey, carried on from the years 1791 to 1794 inclusive.	LXXXV.	414
An account of the survey continued in 1795 and 1796.	LXXXVII.	432

	Vol.	Page.
WILLIAMS, JOHN LLOYD. Farther particulars respecting the Observatory at Benares.	LXXXIII.	45
Account of the method of making ice at Benares.	——	56
Additional observations on the above subject.	——	129
WILSON,* ALEXANDER, M. D. An answer to the objections stated by M. De La LANDE, in 1776, against the solar spots being excavations in the luminous matter of the sun.	LXXIII.	144
WILSON, GIFFIN. Essay on the resolution of algebraic equations, in order to distinguish the real principle of every method, and the true causes of the limitations to which it is subject.	LXXXIX.	265
WILSON, JAMES. A description of a very unusual formation of the human heart.	LXXXVIII.	346
WILSON,* PATRICK. Farther experiments on cold.	LXXI.	386
An experiment to determine, by the aberration of the fixed stars, whether the rays of light in pervading different media change their velocity.	LXXII.	58
WISEMAN, BENJAMIN. Account of a substance found in a clay pit; and of the effect of the Mere of Diss upon various substances immersed in it.	LXXXVIII.	567
WITHERING,* WILLIAM, M. D. An analysis of two mineral substances, viz. the Rowley rag-stone, and the toad-stone.	LXXII.	327
On the terra ponderosa.	LXXIV.	293
On the decomposition of water, the principle of acidity, and phlogiston.	LXXVIII.	313
An account of some extraordinary effects of lightning.	LXXX.	293
WOLLASTON,* Rev. FRANCIS. On a method of describing the relative positions and magnitudes of the fixed stars, with some astronomical observations.	LXXIV.	181
A description of a system of wires for observing celestial objects.	LXXV.	346

	Vol.	Page.
WOLLASTON,* Rev. FRANCIS. On Miss HERSCHEL's comet, in August and September, 1786.	LXXVII.	55
A description of a transit circle for determining the place of celestial objects as they pass the meridian.	LXXXIII.	133
WOLLASTON, Rev. Archdeacon FRANCIS JOHN HYDE. A letter on the observation of a luminous arch.	LXXX.	43
Description of a thermometrical barometer for measuring altitudes.	CVII.	183
On the measurement of Snowdon by the thermometrical barometer.	CX.	295
WOLLASTON, WILLIAM HYDE, M. D. On gouty and urinary concretions.	LXXXVII.	386
On double images caused by atmospherical refraction.	XC.	239
On the chemical production and agency of electricity.	XCI.	427
A method of examining refractive and dispersive powers by prismatic reflection.	XCII.	365
On the oblique refraction of Iceland crystal.	——	381
The Bakerian Lecture. On the quantity of horizontal refraction, with a method of measuring the dip at sea.	XCIII.	1
On a new metal found in crude platina.	XCIV.	419
On the discovery of palladium, with observations on other substances found with platina.	XCV.	316
The Bakerian Lecture. On the force of percussion.	XCVI.	13
On fairy-rings.	XCVII.	133
On super-acid and sub-acid salts.	XCVIII.	96
On platina and native palladium from Brazil.	XCIX.	189
On the identity of columbium and tantalum.	——	246

	Vol.	Page.
WOLLASTON, WILLIAM HYDE, M.D. Description of a reflecting goniometer.	XCIX.	253
The Croonian Lecture. On muscular action, sea-sickness, and the salutary effects of exercise on gestation.	C.	1
On cystic oxide, a new species of urinary calculus.	—	223
On the non-existence of sugar in the blood of persons labouring under diabetes mellitus.	CI.	96
On the primitive crystals of carbonate of lime, bitter-spar, and iron-spar.	CII.	159
On a periscopic camera obscura and microscope.	—	370
The Bakerian Lecture. On the elementary particles of certain crystals.	CIII.	51
On a method of freezing at a distance.	——	71
A method of drawing extremely fine wires.	——	114
Description of a single-lens micrometer.	——	119
A synoptic scale of chemical equivalents.	CIV.	1
On the cutting diamond.	CVI.	265
Observations and experiments on the mass of native iron found in Brazil.	——	281
On the methods of cutting rock crystal for micrometers.	CX.	126
On sounds inaudible by certain ears.	—	306
WOOD, JAMES, B. D. On the roots of equations.	LXXXVIII.	369
WOODHOUSE, ROBERT, M.A. On the necessary truth of conclusions obtained by means of imaginary quantities.	XCI.	89
Demonstration of a theorem by which such portions of the solidity of a sphere are assigned as admit an algebraic expression.	——	153
On the independence of the analytical and geometrical methods of investigation; and on the advantages to be derived from their separation.	XCII.	85

	Vol.	Page.
WOODHOUSE, ROBERT, M. A. On the integration of certain differential expressions with which problems in physical astronomy are connected.	XCIV.	219
WOODWARD, THOMAS. An account of a new plant of the order of fungi.	LXXIV.	423
WRIGHT,* WILLIAM, M. D. Account of a child who had the small-pox in the womb.	LXXI.	372

Y

	Vol.	Page.
YOUNG, THOMAS, M. D. Observations on vision.	LXXXIII.	169
Experiments respecting sound and light. -	XC.	106
The Bakerian Lecture. On the mechanism of the eye. - - - -	XCI.	23
The Bakerian Lecture. On the theory of light and colours. - - -	XCII.	12
An account of some cases of the production of colours not hitherto described. - -	——	387
The Bakerian Lecture. Experiments and calculations relative to physical optics. - -	XCIV.	1
An essay on the cohesion of fluids. -	XCV.	71
Hydraulic investigations, subservient to an intended Croonian Lecture on the motion of the blood. - - - - -	XCVIII.	164
The Croonian Lecture. On the functions of the heart and arteries. - - -	XCIX.	1
A numerical table of elective attractions, with remarks on the sequences of double decompositions. - - - - -	——	148
Remarks on the employment of oblique riders, and on other alterations in the construction of ships, being the substance of a Report presented to the Board of Admiralty, with illustrations. - - - -	CIV.	303

	Vol.	Page.
YOUNG, THOMAS, M.D. Remarks on the probabilities of error in physical observations, and on the density of the earth, considered, especially with regard to the reduction of experiments on the pendulum. - - -	CIX.	70
